I topic assessment form a: Project-Based Learning Applied to the Language Classroom Juliana Franco Tavares/ Louise Emma Potter, 2018-03-05 In Project-Based Learning Applied to the Language Classroom, the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language. It is about teaching English as a second or foreign language using Project-Based Learning (PBL). We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it, but feel that there aren't enough materials based on this methodology. In fact, most researchers and writers we have come across discuss the applications of PBL in the students' mother tongue to subjects such as Math, History, Literature, Social Studies, and Science. However, there are few published works about the specifics of PBL in foreign language classes. Besides, it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language.

1 topic assessment form a: Assessment And Testing In The Primary School Colin Conner, 2003-10-04 First Published in 2004. The terms 'assessment' and 'testing' conjure up all sorts of images in most people's minds. Rows of desks in quiet halls, working to the clock, trying to remember the answers to obscure and sometimes irrelevant questions. Recent invitations to teachers to reflect upon an occasion when they remember being assessed or tested drew up long-forgotten memories of the 11-plus or taking a first driving test. Often these were memories tinged with unhappiness, sadness and a feeling of failure. Assessment for many of us has been an emotional experience and it is not surprising that we should reject facing children with such experiences too early in their lives. This book looks at assessment as a positive experience in the primary classroom, as a fundamental feature of teaching and successful learning
