Yet, for some reason, they abandoned their village and all that remains are the ruins of Tyuoni at the Bandelier National Monument in New Mexico. In this work of fiction, Jopin, an eighty year-old elder desperate for an answer, embarks on a prayer quest that takes him on a chain of events which will unveil the fate of Tyuoni. Deer-tracker, his pre-teen grandson, and Knee-nose, a young spotted deer, help Jopin deal with Chief Salamander's questionable actions and motives as the tribe journeys on a treacherous and intriguing odyssey. In his story, the author strives to demonstrate how a significant religious event could have influenced the people to abandon their majestic village, join the Great Migration, and follow the spinning sun to their new homeland, even though popular belief purports that the Anasazi vanished because of war, severe drought, or famine. The wonder of living in such an extraordinary time and place will provoke interest in the age-old mystery of what really happened.

bear canyon health circle: *Rachel Carson and Her Sisters* Robert K Musil, 2014-04-01 In *Rachel Carson and Her Sisters*, Robert K. Musil redefines the achievements and legacy of environmental pioneer and scientist Rachel Carson, linking her work to a wide network of American women activists and writers and introducing her to a new, contemporary audience. Rachel Carson was the first American to combine two longstanding, but separate strands of American environmentalism—the love of nature and a concern for human health. Widely known for her 1962 best-seller, *Silent Spring*, Carson is today often perceived as a solitary “great woman,” whose work single-handedly launched a modern environmental movement. But as Musil demonstrates, Carson's life's work drew upon and was supported by already existing movements, many led by women, in conservation and public health. On the fiftieth anniversary of her death, this book helps underscore Carson's enduring environmental legacy and brings to life the achievements of women writers and advocates, such as Ellen Swallow Richards, Dr. Alice Hamilton, Terry Tempest Williams, Sandra Steingraber, Devra Davis, and Theo Colborn, all of whom overcame obstacles to build and lead the modern American environmental movement.
