because of a teacher: Maladjusted Schooling (RLE Edu L) John Schostak, 2012-05-16 The problems this book discusses are the same now as they were 25 years ago: unemployment, poor housing, inadequate facilities, poverty, racism, violence. What is the function of a school in such a situation? Although many schools hold reformist ideals, their practice is constrained by organisational demands. School organisation is based upon a coercive theory of social control which is intolerant of expressions of individuality by teachers and pupils. Needs for individuality may be mistaken for deviance, and deviance is at least in part produced by, or exacerbated by, school organisation. The author maintains that schooling is therefore largely maladjusted to the needs of individuals.

because of a teacher: *Proceedings of the International Conference on Sustainable Innovation on Humanities, Education, and Social Sciences (ICOSI-HESS 2022)* Dyah Mutiarin, Achmad Nurmandi, Arie Kusuma Paksi, Zain Rafique, 2023-02-10 This is an open access book. This proceeding consists of research presented in ICOSI UMY, on 20-21 July 2022 at Universitas Muhammadiyah Yogyakarta. The conference covers the topic of governance, international relations, law, education, humanities, and social sciences. The COVID-19 pandemic first time that occurred in 2019, has brought many changes that constrain all countries to adapt quickly. The crisis has shown vulnerabilities and gaps in several primary systems, including healthcare, social protection, education, value chains, production networks, financial markets, and the ecosystem. One of the efforts that each country can take to rise from the COVID-19 pandemic is through strengthening multilateralism, international solidarity, and global partnerships. Hence, this conference raises the central theme "Strengthening Global Partnership for Resilience." This theme covers sub-themes that allow prospective scholars to submit their papers for 'Virtual Conferences' presentation under the following scopes: Social Sciences, Humanities, Educations, and Religious Studies. Presented papers will also get a chance to be published in our remarkable partner publishers. Through the International Symposium on Social, Humanities, Education, and Religious Studies (ISSHERS) and Asian Conference on Comparative Laws (Asian-COL), we hope that participants will express their

innovative and creative ideas to provide benefits and contribute knowledge to strengthen global partnerships among countries. Finally, all 75 papers published in this proceedings are expected not only as research output but can be developed further into prototypes or evidence for policy making.

because of a teacher: *Scripting the Moves* Joanne W. Golann, 2021-06-08 An inside look at a no-excuses charter school that reveals this educational model's strengths and weaknesses, and how its approach shapes students. Silent, single-file lines. Detention for putting a head on a desk. Rules for how to dress, how to applaud, how to complete homework. Walk into some of the most acclaimed urban schools today and you will find similar recipes of behavior, designed to support student achievement. But what do these "scripts" accomplish? Immersing readers inside a "no-excuses" charter school, *Scripting the Moves* offers a telling window into an expanding model of urban education reform. Through interviews with students, teachers, administrators, and parents, and analysis of documents and data, Joanne Golann reveals that such schools actually dictate too rigid a level of social control for both teachers and their predominantly low-income Black and Latino students. Despite good intentions, scripts constrain the development of important interactional skills and reproduce some of the very inequities they mean to disrupt. Golann presents a fascinating, sometimes painful, account of how no-excuses schools use scripts to regulate students and teachers. She shows why scripts were adopted, what purposes they serve, and where they fall short. What emerges is a complicated story of the benefits of scripts, but also their limitations, in cultivating the tools students need to navigate college and other complex social institutions—tools such as flexibility, initiative, and ease with adults. Contrasting scripts with tools, Golann raises essential questions about what constitutes cultural capital—and how this capital might be effectively taught. Illuminating and accessible, *Scripting the Moves* delves into the troubling realities behind current education reform and reenvisioning what it takes to prepare students for long-term success.

because of a teacher: Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning Niess, Margaret L., Gillow-Wiles, Henry, 2021-06-25 The COVID-19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety. As schools emptied, remote learning rapidly expanded through online services and video chatrooms. Unfortunately, this disrupted many students and teachers who were not accustomed to remote classrooms. This challenge has forced K-12 teachers to think differently about teaching. Unexpectedly and with little time to prepare, they have been confronted with redesigning their curriculum and instruction from face-to-face to online virtual classrooms to protect students from the COVID-19 virus while ensuring that these new online initiatives remain sustainable and useful in the post-pandemic world. As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction, their instruction both in online and face-to-face will impact what and how students learn in the 21st century. The *Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning* examines the best practices and pedagogical reasoning for designing online strategies that work for K-12 virtual learning. The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world. The following chapters present instructional strategies for multiple grade levels and content areas: best practices that work, clearly describing why they work, and the teachers' pedagogical reasoning that supports online implementations. The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face-to-face and virtual environments as an essential design component. Covering such topics as K-12 classrooms, pedagogical reasoning, and virtual learning, this text is perfect for professors, teachers, students, educational designers and developers, instructional technology faculty, distance learning faculty, and researchers interested in the subject.
