beautiful face in italian language: *The Agency of Female Typology in Italian Renaissance Paintings* Edward J. Olszewski, 2023-06-30 This study employs cognitive theory as a heuristic framework to interrogate the agency of female types in select Italian Renaissance paintings, with emphasis on Venus, Medusa, the Amazon, Boccaccio's Lady Fiammetta/Cleopatra, Susanna, the Magdalene, and the Madonna. The study disrupts assumptions about the identity of sitters and readings of paintings as it challenges paradigms of female representation. It interrogates why certain paintings were crafted, by whom and for whom. Works are placed in the context of meta-painting, with stress on the cognitive decisions negotiated between patron and artist. The ludic aspects of several paintings are examined with a fine grain semiotic approach to expand their iconographies. Psychoanalytic readings are unpacked, based on the flawed mythological metaphors

and incomplete clinical studies of Sigmund Freud's theorizing. The rubric of female agency is deliberately selected to unify popular but enigmatic master paintings of disparate subjects.
