Under each state's heading, this substantial volume contains alphabetized entries with information regarding each structure's history. The earliest forts established by the Danes, Dutch, English, French, Portuguese, Swedes and Mexicans and by the temporary appearance of the Russians are listed. The colonial American forts, many of which were previously established by the European powers, are covered in detail. Beginning with the American Revolution, each of the American military fortifications, militia forts, settlers' forts and blockhouses is listed and described. Helpful appendices list Civil War defenses (and military hospitals) of Washington, D.C.; Florida Seminole Indian war forts; Pony Express depots; Spanish missions and presidios; and twentieth-century U.S. forts, posts, bases, and stations. A chronology of conflicts that paralleled the growth of the United States is also provided, offering insight into the historical context of fort construction.

beech island historical society: *Carolina in Crisis* Daniel J. Tortora, 2015-05-25 In this engaging history, Daniel J. Tortora explores how the Anglo-Cherokee War reshaped the political and cultural landscape of the colonial South. Tortora chronicles the series of clashes that erupted from 1758 to 1761 between Cherokees, settlers, and British troops. The conflict, no insignificant sideshow to the French and Indian War, eventually led to the regeneration of a British-Cherokee alliance. Tortora reveals how the war destabilized the South Carolina colony and threatened the white coastal elite, arguing that the political and military success of the Cherokees led colonists to a greater fear of slave resistance and revolt and ultimately nurtured South Carolinians' rising interest in the

movement for independence. Drawing on newspaper accounts, military and diplomatic correspondence, and the speeches of Cherokee people, among other sources, this work reexamines the experiences of Cherokees, whites, and African Americans in the mid-eighteenth century. Centering his analysis on Native American history, Tortora reconsiders the rise of revolutionary sentiments in the South while also detailing the Anglo-Cherokee War from the Cherokee perspective.

beech island historical society: Guardians of the Valley Edward J. Cashin, 2023-02-06 The first comprehensive history of the Lower Chickasaws in the Savannah River Valley Edward J. Cashin, the preeminent historian of colonial Georgia history, offers an account of the Lower Chickasaws, who settled on the Savannah River near Augusta in the early eighteenth century and remained an integral part of the region until the American Revolution. Fierce allies to the English settlers, the Chickasaws served as trading partners, loyal protectors, and diplomatic representatives to other southeastern tribes. In the absence of their benevolence, the English settlements would not have developed as rapidly or securely in the Savannah River Valley. Aided by his unique access to the modern Chickasaw Nation, Cashin has woven together details on the eastern Chickasaws from diverse source materials to create this cohesive narrative set against the shifting backdrop of the southern frontier. The Chickasaws offered primary allegiance to South Carolina and Georgia at different times in their history but always served as a link in ongoing trade between Charleston and the Chickasaw homeland in what is now Mississippi. By recounting the political, social, and military interactions between the native peoples and settlers, Cashin introduces readers to a colorful cast of Chickasaw leaders, including Squirrel King, the Doctor, and Mingo Stoby, each an important component to a story that has until now gone untold.

beech island historical society: William Bartram and the American Revolution on the Southern Frontier Edward J. Cashin, 2007-02-04 In *Travels*, the celebrated 1791 account of the Old Southwest, William Bartram recorded the natural world he saw around him but, rather incredibly, omitted any reference to the epochal events of the American Revolution. Edward J. Cashin places Bartram in the context of his times and explains his conspicuous avoidance of people, places, and events embroiled in revolutionary fervor. Cashin suggests that while Bartram documented the natural world for plant collector John Fothergill, he wrote *Travels* for an entirely different audience. Convinced that Providence directed events for the betterment of mankind and that the Constitutional Convention would produce a political model for the rest of the world, Bartram offered *Travels* as a means of shaping the new country. Cashin illuminates the convictions that motivated Bartram-that if Americans lived in communion with nature, heeded the moral law, and treated the people of the interior with respect, then America would be blessed with greatness.
