Drawing on its sizeable timber and mineral reserves, Gabon aims to develop new industries and boost domestic value added with the ultimate goal of achieving emerging market status by 2025. In the meantime, however, weaker oil prices will likely cause complications for the next two to three years, as the authorities grapple with lower budgets and greater debt challenges.

bhg financial interest rates: History and Financial Crisis Christopher Kobrak, Mira Wilkins, 2014-06-11 One striking weaknesses of our financial architecture, which helped bring on and perhaps deepen the Panic of 2008, is an inadequate appreciation of the past. Information about how the system functioned and the reliability of organizations and institutional controls were drawn from a relatively narrow group of recent examples. History and Financial Crisis: Lessons from the 20th Century is an attempt to broaden the range of historical sources used by policy makers to understand and treat financial crises. Many recent discussions of the 2008 panic and the economic turmoil have found the situation to either be unprecedented or greatly similar to that of 1931. However, the book's wide range of contributors suggest that the economic crisis of 2008 cannot be categorised in this way. This book was originally published as a special issue of Business History.

bhg financial interest rates: The Report: Gabon 2013 Oxford Business Group, 2013-10-07 In recent years, the country has sought to accelerate economic diversification, emphasising growth in its industrial, agricultural and service sectors. The second-biggest economy of the Economic and Monetary Community of Central Africa, which the country is chairing in 2013, Gabon has a population of 1.6m, according to the most recent data available from the World Bank. The country benefits from a wide base of natural resources, including large mineral deposits and timber, as well as arable land - all of which have helped feed its export revenues and boost headline indicators. However, it is the oil and gas sector that has been the dominant sector, with the country's onshore and offshore blocks making it the fifth-largest producer on the continent. Production has been maturing recently, prompting the search to shift to deep-offshore blocks, but also encouraging greater diversification through the government's Gabon Emergent strategy, which looks to channel capital and activity into key sectors such as tourism and manufacturing.
