In the meantime, however, weaker oil prices will likely cause complications for the next two to three years, as the authorities grapple with lower budgets and greater debt challenges.

bhg financial business loans: All Honorable Men James Stewart Martin, 2016-05-17 A scathing attack on Wall Street's illegal ties to Nazi Germany before WWII—and the postwar whitewashing of Nazi business leaders by the US government Prior to World War II, German industry was controlled by an elite group who had used their money and influence to help bring the Nazi Party to power. After the Allies had successfully occupied Germany and removed the Third Reich, the process of reconstructing the devastated nation's economy began under supervision of the US government. James Stewart Martin, who had assisted the Allied forces in targeting key areas of German industry for aerial bombardment, returned to Germany as the director of the Division for Investigation of Cartels and External Assets in American Military Government, a position he held until 1947. Martin was to break up the industrial machine these cartels controlled and investigate their ties to Wall Street. What he discovered was shocking. Many American corporations had done business with German corporations who helped fund the Nazi Party, despite knowing what their money was supporting. Effectively, Wall Street's greed had led them to aid Hitler and hinder the Allied effort. Martin's efforts at decartelization were unsuccessful though, largely due to hindrance from his superior officer, an investment banker in peacetime. In conclusion, he said, We had not been stopped in Germany by German business. We had been stopped in Germany by American business. This exposé on economic warfare, Wall Street, and America's military industrial complex includes a new introduction by Christopher Simpson, author of *Blowback: America's Recruitment of Nazis and Its Destructive Impact on Our Domestic and Foreign Policy*, and a new foreword from investigative journalist Hank Albarelli.

bhg financial business loans: The Report: Gabon 2014 Oxford Business Group, 2014-09-30 With just 1.63m people, Gabon is the second-smallest member of the six-country Central African Economic and Monetary Community in terms of population, after Equatorial Guinea. However, the country's well-developed hydrocarbons sector has made Gabon the second-largest economy in the sub-region. The economy of Gabon has largely developed on the back of the country's substantial oil

and gas resources; however, declining production levels are leading the government to pursue a strategy of economic diversification. While efforts to encourage new investment and offshore oil exploration may yet yield results, the development of other industries, including forestry and mining, is being encouraged. Meanwhile, like many African countries, Gabon is working to ensure that a larger percentage of natural resource wealth is channelled into the national economy.
