betsy magness leadership institute: The New Leadership Literacies Bob Johansen, 2017-09-05 Over the next decade, today's connected world will be explosively more connected. Anything that can be distributed will be distributed: workforces, organizations, supply webs, and more. The tired practices of centralized organizations will become brittle in a future where authority is radically decentralized. Rigid hierarchies will give way to liquid structures. Most leaders—and most organizations—aren't ready for this future. Are you? It's too late to catch up, but it's a great time to leapfrog. Noted futurist Bob Johansen goes beyond skills and competencies to propose five new leadership literacies—combinations of disciplines, practices, and worldviews—that will be needed to thrive in a VUCA world of increasing volatility, uncertainty, complexity, and ambiguity. This book shows how to (1) forecast likely futures so you can "look back" and make sure you're prepared now for the changes to come, (2) use low-risk gaming spaces to work through your concerns about the future and hone your leadership skills, (3) lead shape-shifting organizations where you can't just tell people what to do, (4) be a dynamic presence even when you're not there in person, and (5) keep your personal energy high and transmit that energy throughout your organization. This visionary book provides a vivid description of the ideal talent profile for future leaders. It is written for current, rising star, and aspiring leaders; talent scouts searching for leaders; and executive coaches seeking a fresh view of how leaders will need to prepare. To get ready for this future, we will all need new leadership literacies.

betsy magness leadership institute: **Mass Communications Research Resources** Christopher Sterling, James K. Bracken, Susan M. Hill, 2016-05-06 This reference book is designed as a road map for researchers who need to find specific information about American mass communication as expeditiously as possible. Taking a topical approach, it integrates publications

and organizations into subject-focused chapters for easy user reference. The editors define mass communication to include print journalism and electronic media and the processes by which they communicate messages to their audiences. Included are newspaper, magazine, radio, television, cable, and newer electronic media industries. Within that definition, this volume offers an indexed inventory of more than 1,400 resources on most aspects of American mass communication history, technology, economics, content, audience research, policy, and regulation. The material featured represents the carefully considered judgment of three experts -- two of them librarians -- plus four contributors from different industry venues. The primary focus is on the domestic American print and electronic media industries. Although there is no claim to a complete census of all materials on print journalism and electronic media -- what is available is now too vast for any single guide -- the most important and useful items are here. The emphasis is on material published since 1980, though useful older resources are included as well. Each chapter is designed to stand alone, providing the most important and useful resources of a primary nature -- organizations and documents as well as secondary books and reports. In addition, online resources and internet citations are included where possible.
