How can other projects benefit from the lessons learned on each project? What would the owners, designers, and constructors do differently knowing what they know now? big d construction logo: Left Brain, Right Stuff Phil Rosenzweig, 2014-02-06 Dozens of books

have been published recently on the errors and biases that affect our judgments and choices. Drawing on cognitive science, their lessons are excellent for many kinds of decisions - consumer choice and financial investments, for example - but stop short of addressing many of the most important decisions we face in management, where we can actively influence outcomes and where competitive forces mean we have to outperform rivals. As Phil Rosenzweig shows, drawing on examples from business, sports and politics, this sort of decision-making relies on mastering two very different abilities. First, the analytical problem-solving skills associated with the brain's left hemisphere; and second, what Tom Wolfe called 'the Right Stuff': the ability to take calculated risks. Bringing fresh and often surprising insights to topics including confidence and overconfidence, the uses and limits of decision models, leadership and authenticity, expert performance and deliberate practice, competitive bidding and new venture management, *Left Brain, Right Stuff*, the myth-busting follow-up to *The Halo Effect*, explains how to perform when making even the most difficult decisions.

big d construction logo: Marketing Green Building Services Jerry Yudelson, 2012-07-26 Marketing Green Building Services: Strategies for Success presents all the information key decision-makers need to respond to the fast-growing market for green buildings, design and construction services and products. Completely updated, revised and expanded from the author's previous works, this book is the one resource you need to succeed in the green building marketplace. The book also helps owners and developers understand the green building business case and to find out what other leading-edge firms and

projects have learned - how to market and sell green buildings and green developments in a highly competitive marketplace.

big d construction logo: A Brief Literary History of Disability Fuson Wang, 2022-07-21 A Brief Literary History of Disability is a convenient, lucid, and accessible entry point into the rapidly evolving conversation around disability in literary studies. The book follows a chronological structure and each chapter pairs a well-known literary text with a foundational disability theorist in order to develop a simultaneous understanding of literary history and disability theory. The book as a whole, and each chapter, addresses three key questions: Why do we even need a literary history of disability? What counts as the literature of disability? Should we even talk about a literary aesthetic of disability? This book is the ideal starting point for anyone wanting to add some disability studies to their literature teaching in any period, and for any students approaching the study of literature and disability. It is also an efficient reference point for scholars looking to include disability studies approaches in their research.

big d construction logo: Discourse Perspectives on Organizational Communication Jolanta Artiz, Robyn C. Walker, 2011-10-16 Discourse Perspectives in Organizational Communication brings together researchers from the social sciences and humanities to look at discourse and how it shapes organizations and their social actors. This collection illustrates the variety of organizational phenomena that might be studied and the range of epistemological and methodological approaches that might be used in discourse analysis techniques.

big d construction logo: The Discursive Construction of Hierarchy in Japanese Society Zi Wang, 2020-08-10 Seniority-based hierarchy (jougé kankei) is omnipresent in Japanese group dynamics. How one comports, depends on one's status and position vis-à-vis others. To-date, no study shows what constitutes this hierarchy, where and when individuals growing up in Japan first come into contact with it, as well as how they learn to function in it. This book fills in the lacunae. Considering jougé kankei as a social institution and adopting a discourse analytic approach, this volume examines the ways in which institutional jougé kankei as an enduring feature of Japanese social life are created and reproduced. The monograph analyses how seniority-based relations are enacted, legitimised, transmitted, and reified by social actors through language use and paralinguistic discursive practices, such as the use of space, objects, signs, and symbols. It also looks at how established rules could be challenged. The empirical data on which findings are based are gathered through 10 months of ethnographic fieldwork from 2015 to 2018 in Japanese schools, with certain types of data (school club etiquette books and uniforms) being presented and analysed for the first time. This volume also shows continuity and change of jougé kankei from school to work.
