Catching a Russian Spy is the story of the FBI's investigation of Aldrich Ames, CIA agent who turned Russian spy, and the agent who helped bring him to justice. Aldrich H. Rick Ames was a 31-year veteran of the CIA. He was also a Russian spy. By the time Ames was arrested in 1994, he had betrayed the identities of dozens and caused the deaths of ten agents. The notorious KGB (and later the Russian intelligence service, SVR) paid him millions of dollars. Agent Leslie G. Les Wiser, Jr. ran the FBI's Nightmover investigation tasked with uncovering a mole in the CIA. The team worked night and day to collect evidence—sneaking into Ames' home, hiding a homing beacon in his Jaguar, and installing a video camera above his desk. But the spy kept one step ahead, even after agents followed him to Bogota, Colombia. In a crazy twist, the FBI would score its biggest clue from inside Ames' garbage can. At the time of his arrest on February 21, 1994, he had compromised more highly-classified CIA assets than any other agent in history. Go behind the scenes of some of the FBI's most interesting cases in award-winning journalist Bryan Denson's FBI Files series, featuring the investigations of the Unabomber, al-Qaeda member Mohamed Mohamud, and Michael Young's diamond theft ring. biggest manhunt in us history: Prison Writings Leonard Peltier, 2016-04-12 The Native American activist recounts his evolution into a political organizer, his trial and conviction for murder, and his spiritual journey in prison. In September of 2022, twenty-five years after Leonard Peltier received a life sentence for the murder of two FBI agents, the Democratic National Committee unanimously passed a resolution urging President Joe Biden to release him. Peltier has affirmed his innocence ever since his sentencing in 1977—his case was made fully and famously in Peter Matthiessen's bestselling *In the Spirit of Crazy Horse*—and many remain convinced he was wrongly convicted. A wise and unsettling book, *Prison Writings* is both memoir and manifesto, chronicling Peltier's life in Leavenworth Prison in Kansas. Invoking the Sun Dance, in which pain leads one to a transcendent reality, Peltier explores his suffering and the insights it has borne him. He also locates his experience within the history of the American Indian peoples and their struggles to overcome the federal government's injustices. Edited by Harvey Arden, with an introduction by

Chief Arvol Looking Horse, and a preface by former Attorney General Ramsey Clark. Praise for Prison Writings "It would be inadequate to describe Leonard Peltier's Prison Writings as a classic of prison literature, although it is that. It is also a cry for help, an accusation against monstrous injustice, a beautiful expression of a man's soul, demanding release." —Howard Zinn, author of A People's History of the United States "For too long, both Leonard's supporters and detractors have seen him as a metaphor, as a public figure worthy of political rallies and bumper stickers, but very rarely as a private man who only wants to go home. I pray this book will bring Leonard home." —Sherman Alexie, author of Indian Killer

biggest manhunt in us history: Atoms, Bytes and Genes Martin W. Bauer, 2015-02-11
Atom, byte and gene are metonymies for techno-scientific developments of the 20th century: nuclear power, computing and genetic engineering. Resistance continues to challenge these developments in public opinion. This book traces historical debates over atoms, bytes and genes which raised controversy with consequences, and argues that public opinion is a factor of the development of modern techno-science. The level and scope of public controversy is an index of resistance, examined here with a pain analogy which shows that just as pain impacts movement, resistance impacts techno-scientific mobilization: it signals that something is wrong, and this requires attention, elaboration and a response to the challenge. This analysis shows how different fields of enquiry deal with the resistance of social-psychological mentalities in the face of industrial, scientific and political activities inspired by projected futures.

biggest manhunt in us history: The North Star Julian Sher, 2024-05-21 FINALIST FOR THE MAVIS GALLANT PRIZE FOR NON-FICTION • LONGLISTED FOR THE J. W. DAFOE BOOK PRIZE A riveting account of the years, months and days leading up to the assassination of President Abraham Lincoln, and the unexpected ways Canadians were involved in every aspect of the American Civil War. Canadians have long taken pride in being on the "good side" of the American Civil War, serving as a haven for 30,000 escaped slaves on the Underground Railroad. But dwelling in history's shadow is the much darker role Canada played in supporting the slave South and in fomenting the many plots against Lincoln. The North Star weaves together the different strands of several Canadians and a handful of Confederate agents in Canada as they all made their separate, fateful journeys into history. The book shines a spotlight on the stories of such intrepid figures as Anderson Abbott, Canada's first Black doctor, who joined the Union Army; Emma Edmonds, the New Brunswick woman who disguised herself as a man to enlist as a Union nurse; and Edward P. Doherty, the Quebec man who led the hunt to track down Lincoln's assassin, John Wilkes Booth. At the same time, the Canadian political and business elite were aiding the slave states. Toronto aristocrat George Taylor Denison III bankrolled Confederate operations and opened his mansion to their agents. The Catholic Church helped one of Booth's accused accomplices hide out for months in the Quebec countryside. A leading financier in Montreal let Confederates launder money through his bank. Sher creates vivid portraits of places we thought we knew. Montreal was a sort of nineteenth-century Casablanca of the North: a hub for assassins, money-men, mercenaries and soldiers on the run. Toronto was a headquarters for Confederate plotters and gun-runners. The two largest hotels in the country became nests of Confederate spies. Meticulously researched and richly illustrated, The North Star is a sweeping tale that makes long-ago events leap off the page with a relevance to the present day.

biggest manhunt in us history: *Blowback* Margaret Roberts, 2025-07-22 An investigative journalist reopens the unsolved mystery of John Doe 2, the Oklahoma City bombing suspect who evaded a global FBI manhunt. What if everything we know about one of America's darkest days is wrong? Tragedy unfolded on April 19, 1995, when a massive bomb exploded in America's Heartland, killing 168 people, including 15 children in their daycare center. History says the Oklahoma City bombing was lone wolf terrorism. But haunting fresh evidence points instead to a neo-Nazi plot in which the FBI played a hidden role, allowing suspects to walk free, denying justice to the victims, and hiding the truth from all of us. The FBI launched the biggest manhunt in its history for two suspected bombers and quickly arrested Timothy McVeigh, a twenty-six-year-old Gulf War Army veteran. Yet they never captured the other suspect, known only as John Doe 2, who rode next to McVeigh in the bomb truck. Soon the FBI canceled the search, saying eyewitnesses who saw John Doe 2 were mistaken. None of this rings true to award-winning journalist Margaret Roberts. As former news director of America's Most Wanted, she worked high-profile manhunts alongside the FBI. How could twenty witnesses be wrong? More troubling clues lead Roberts to reopen the mystery of John Doe 2 before the 30th anniversary of America's deadliest domestic terror attack. *Blowback* chronicles her shocking discoveries, including journalism's only face-to-face prison interviews with McVeigh co-conspirator Terry Nichols. Roberts puts the puzzle together after a whistleblower steps forward, though one burning mystery remains: The FBI has kept surveillance video of McVeigh's accomplice locked away all these years. Is John Doe 2 the FBI's guilty secret?

biggest manhunt in us history: The 21st Century Black History Lee Arnold Green Sr., 2022-05-23 Black History in the 21st Century: From the Atlantic Slave Trade in America to Its Impact on African Americans Today is mainly about the injustices suffered by African Americans in America, especially the impact of the Atlantic slave trade in America on the negro race today, to

include people of color. The impact of the Atlantic slave trade in the twenty-first century is high-tech lynching in America, that is, without the noose around the neck of the African American. High-tech lynching is defined in this book as the following: There are two phases of high-tech lynching. The first phase is characterized by violence, death, and/or destruction by white racists, race haters, or white supremacists, practicing bad spirit principal part racist hatred of racism against African Americans on the streets, to include people of color. The practice of racism is the use of racial or racist epithets characterized by the sentiment of racial segregation, white cultural and political domination that characterizes discriminatory language and/or physical practice of racism that involves violence, death, and/or destruction against black Americans in America. These are racist incidents on the streets. That is the first phase of high-tech lynching in the twenty-first century in America. And then an African American takes his or her racist case to court for courtroom proceedings. This is the second phase of high-tech lynching in America in the twenty-first century, wherein the courtroom, the DA, or district attorney, become hairsplitters of the letter of the law and nitpick at the spirit of the law as to the alleged violation or crime to justify the action or bad behavior of racist white policemen or white supremacists, characterized by their bad spirit principal part racist hatred of racism. Therefore, high-tech lynching involves the judges of the courts in America that go along with their district attorney's travesty of justice or mockery of the justice system. To include the legislators who make the laws in America and oftentimes their designated juries based on their homogeneity of bad spirit principal part racist hatred. Therefore, high-tech lynching is the effect of America's Atlantic slave trade on African Americans today in this the twenty-first century, post-Jim Crow as a system of predatory laws and tyranny of racism practiced against African Americans.

biggest manhunt in us history: The Adventures of Leo Tom Gilco, 2022-08-03 Dear readers, This story is very personal to me. It starts with the tales of young Leo Bryant, which by the way is the name of my great-grandson, and includes many characters in his early years. Most of the facts in this story are related to my father, who was born on August 20, 1927, just as Leo was, whose father's name was the name of my father and myself. Having read extensively on the subject of the United Mine Workers of America, of which I am a current member, having worked in the coal mines for fourteen years on various assignments, and being forced out by injuries, of which there are many in the coal mining industry, I believe I am qualified as a man who knows the facts of the mine wars. Many of the historical facts in this story are true, for example, the Blair Mountain Massacre in which quite a few miners were killed or injured by the coal company thugs, including Sheriff Don Chafin whose sole responsibility was to keep the union out of Logan County, West Virginia. I hope you read and enjoy this story as much as I enjoyed writing it. Thanks. Tom Leo Gilco Jr.
