bill nye do it yourself science

bill nye do it yourself science has become a popular approach for engaging learners of all ages in scientific exploration and discovery. Bill Nye, known as "The Science Guy," has inspired countless individuals to experiment, question, and understand the world around them through hands-on activities. This article explores the concept of do it yourself science as championed by Bill Nye, highlighting how accessible and educational scientific experiments can be when conducted at home or in informal settings. It covers the benefits of DIY science, practical experiments, safety considerations, and resources for further learning. Whether for students, educators, or curious minds, this comprehensive guide offers valuable insights into fostering scientific curiosity outside traditional classrooms.

- Understanding Bill Nye’s Approach to Do It Yourself Science
- Benefits of Engaging in DIY Science Experiments
- Popular Bill Nye-Inspired DIY Science Experiments
- Essential Materials and Safety Guidelines for DIY Science
- Resources and Tools to Support Bill Nye Do It Yourself Science

Understanding Bill Nye’s Approach to Do It Yourself Science

Bill Nye’s approach to do it yourself science emphasizes hands-on learning, curiosity, and making science accessible to everyone. His educational philosophy revolves around the idea that science is not just for professionals but for anyone interested in exploring natural phenomena. Through his television programs, books, and online content, Bill Nye encourages people to conduct simple experiments using common household items. This method breaks down complex scientific concepts into understandable and entertaining activities. It fosters a mindset where experimentation is seen as a natural way to learn and discover, reflecting the core principles of inquiry-based education.

Educational Philosophy Behind DIY Science

Bill Nye advocates for experiential learning, where individuals learn by doing rather than passively receiving information. This philosophy supports the development of critical thinking and problem-solving skills. By engaging directly with scientific experiments, learners can observe cause and effect, formulate hypotheses, and draw conclusions. This approach aligns with constructivist theories in education, which emphasize active participation and reflection in the learning process.

Accessibility and Inclusivity

One of the key strengths of Bill Nye do it yourself science is its accessibility. Experiments often require inexpensive, everyday materials, allowing people from diverse backgrounds to participate. This inclusivity helps bridge gaps in science education and inspires curiosity regardless of age, location, or resources. Bill Nye's content often targets young audiences but remains relevant for learners of all ages interested in foundational scientific principles.

Benefits of Engaging in DIY Science Experiments

Participating in DIY science experiments modeled after Bill Nye's work offers numerous educational and developmental benefits. These activities promote a deeper understanding of scientific concepts by allowing learners to observe, manipulate, and question phenomena firsthand. Furthermore, DIY science encourages creativity and innovation as individuals design and modify experiments. It also nurtures patience and perseverance, essential traits for scientific inquiry. Engaging in these experiments can improve cognitive abilities such as analytical thinking and improve STEM-related skills, contributing to academic and career success.

Enhancing Scientific Literacy

DIY science experiments foster scientific literacy by exposing learners to the scientific method and terminology in a practical context. This hands-on exposure helps demystify science, making it approachable and relevant to everyday life. As a result, participants gain confidence in understanding and discussing scientific topics, strengthening their ability to make informed decisions.

Encouraging Family and Community Involvement

Bill Nye do it yourself science often serves as a platform for family bonding and community engagement. Many experiments are designed to be performed collaboratively, enabling parents, educators, and peers to participate alongside learners. This social aspect enhances motivation and reinforces learning through shared experiences.

Popular Bill Nye-Inspired DIY Science Experiments

Bill Nye has demonstrated a wide range of experiments that can be easily replicated at home or in informal settings. These experiments cover various scientific fields, including physics, chemistry, biology, and environmental science. Below are some popular examples that illustrate the diversity and educational value of Bill Nye do it yourself science.

Balloon Rocket Experiment

This experiment demonstrates principles of physics such as Newton's third law of motion. By attaching a balloon to a string and releasing the air, learners observe how action and reaction forces propel the balloon forward. This simple setup provides a tangible example of fundamental forces and

motion.

Homemade Lava Lamp

The homemade lava lamp experiment combines oil, water, food coloring, and effervescent tablets to illustrate concepts of density, solubility, and chemical reactions. The visual effect engages learners while explaining how substances interact and change state.

Solar Oven

Constructing a solar oven using cardboard, aluminum foil, and plastic wrap introduces principles of solar energy, insulation, and heat transfer. Learners can experiment with cooking simple foods, connecting scientific theory with practical applications in renewable energy.

Plant Growth Observation

Tracking plant growth under different conditions encourages understanding of biology, photosynthesis, and environmental factors. This long-term experiment promotes observation skills and the scientific method through hypothesis testing and data recording.

List of Essential Experiments to Start With

- Balloon Rocket
- Lava Lamp
- Solar Oven
- Plant Growth Monitoring
- Simple Circuit with Batteries and Bulbs
- Water Filtration Model

Essential Materials and Safety Guidelines for DIY Science

Successful and safe execution of Bill Nye do it yourself science experiments requires awareness of necessary materials and adherence to safety protocols. Most experiments can be performed with common household items, but preparation and caution are crucial to avoid accidents. Understanding the properties of materials used and proper handling techniques ensures a positive learning

experience.

Common Materials Used in DIY Science

Bill Nye experiments typically utilize easily accessible items such as balloons, straws, baking soda, vinegar, food coloring, plastic bottles, aluminum foil, and basic electronics components. These materials are cost-effective and versatile, allowing a wide range of scientific concepts to be explored.

Safety Precautions

While DIY science experiments are designed to be safe, basic safety guidelines must be followed:

- Conduct experiments in well-ventilated areas.
- Wear protective gear such as safety goggles and gloves when handling chemicals.
- Supervise children closely to prevent ingestion or misuse of materials.
- Keep flammable materials away from heat sources.
- Follow instructions carefully to avoid unintended reactions.
- Dispose of materials properly after use.

Resources and Tools to Support Bill Nye Do It Yourself Science

Various resources and tools complement Bill Nye do it yourself science initiatives, providing structured guidance and inspiration for learners and educators. These include books, online videos, kits, and educational platforms that align with Bill Nye’s approach of accessible, engaging science education.

Educational Books and Kits

Bill Nye has authored books that compile many DIY science experiments with step-by-step instructions and scientific explanations. Additionally, science kits inspired by his programs offer curated materials for specific themes, such as chemistry or physics, facilitating organized exploration without extensive preparation.

Online Platforms and Video Content

Online platforms hosting Bill Nye’s video content provide visual demonstrations and explanations that

enhance understanding. Many videos feature experiment walkthroughs, safety tips, and scientific background, making them valuable companions to hands-on activities.

Community and Educational Support

Science clubs, after-school programs, and educational organizations often incorporate Bill Nye do it yourself science into their curricula. These groups provide collaborative environments for learners to share results, ask questions, and deepen their scientific knowledge with guided support.

Frequently Asked Questions

Who is Bill Nye and what is he known for in the DIY science community?

Bill Nye is a science educator, engineer, and television presenter best known for his show 'Bill Nye the Science Guy.' He is recognized for making science accessible and fun, often encouraging DIY science experiments at home.

What are some popular DIY science experiments promoted by Bill Nye?

Bill Nye promotes experiments such as making a homemade volcano, creating a baking soda and vinegar rocket, building simple circuits, and exploring chemical reactions using household items.

Where can I find Bill Nye's DIY science experiment tutorials?

You can find Bill Nye's DIY science experiment tutorials on his official YouTube channel, the Bill Nye website, and in his books which often include step-by-step guides for various experiments.

How can Bill Nye’s approach to DIY science help kids learn effectively?

Bill Nye’s approach combines humor, clear explanations, and hands-on activities which engage kids actively, making science concepts easier to understand and encouraging curiosity and critical thinking.

Are Bill Nye’s DIY science activities safe for children to perform at home?

Yes, most of Bill Nye’s DIY science activities are designed to be safe for children when performed under adult supervision, using common household materials and following provided safety guidelines.

What age group is Bill Nye’s DIY science content best suited for?

Bill Nye’s DIY science content is generally best suited for children aged 6 to 12, but many experiments can be enjoyed by younger kids with help and by older kids interested in basic science concepts.

Does Bill Nye offer any DIY science kits or products?

Bill Nye has partnered with various companies to offer DIY science kits that include materials and instructions for experiments, making it easier for families to engage in hands-on science activities at home.

How does Bill Nye incorporate environmental science into his DIY projects?

Bill Nye often includes experiments related to environmental science, such as water filtration, renewable energy demonstrations, and exploring ecosystems to teach kids about sustainability and conservation.

Can DIY science experiments by Bill Nye be used in classroom settings?

Yes, many educators use Bill Nye’s DIY science experiments as part of their curriculum to provide interactive and practical learning experiences that reinforce scientific concepts in the classroom.

What are some benefits of doing Bill Nye’s DIY science experiments at home?

Benefits include fostering curiosity, improving problem-solving skills, enhancing understanding of scientific principles, encouraging family bonding through shared activities, and making learning fun and memorable.

Additional Resources

1. *Bill Nye’s Great Big Book of Tiny Science*
This book offers a collection of fun and fascinating experiments that explore the science behind everyday phenomena. Bill Nye presents easy-to-follow instructions for hands-on activities that kids can do at home with common household items. Each experiment is designed to spark curiosity and encourage young readers to discover the wonders of the natural world.

2. *Bill Nye the Science Guy’s Big Blast of Science*
Packed with exciting projects and experiments, this book invites children to explore physics, chemistry, and biology through do-it-yourself science. Bill Nye explains scientific concepts in a lively and accessible way, making learning fun and engaging. The book emphasizes safety and creativity, encouraging kids to experiment and learn by doing.

3. *Bill Nye's Science Experiments You Can Do at Home*
A practical guide for young scientists, this book provides step-by-step instructions for a variety of simple experiments. From making slime to building basic circuits, Bill Nye helps children understand scientific principles through hands-on activities. The clear explanations and colorful illustrations make science approachable and entertaining.

4. *Bill Nye's Cool Science Projects About Weather*
Focused on meteorology, this book offers experiments that explain weather patterns, cloud formation, and atmospheric phenomena. Bill Nye guides readers through projects like creating a tornado in a bottle or making a rain gauge. It's an excellent resource for kids interested in understanding the science behind the weather.

5. *Bill Nye's Building Blocks of Science*
This book explores fundamental scientific concepts through interactive experiments and demonstrations. Bill Nye covers topics such as energy, matter, and forces, providing a solid foundation for young learners. The projects are designed to be fun and educational, inspiring curiosity about the physical world.

6. *Bill Nye's Environmental Science Adventures*
Encouraging environmental awareness, this book features activities that teach kids about ecosystems, conservation, and sustainability. Bill Nye presents experiments that demonstrate the impact of human actions on the planet. It's a motivating read for children who want to make a positive difference through science.

7. *Bill Nye's Chemistry Lab for Kids*
This hands-on guide introduces young readers to basic chemistry concepts with safe and simple experiments. Bill Nye explains how to mix chemicals, observe reactions, and understand the properties of matter. The book fosters a love for chemistry by making it accessible and fun.

8. *Bill Nye's Physics Fun: Experiments and Activities*
Focusing on the principles of physics, this book offers a range of interactive projects that illustrate concepts like motion, gravity, and energy. Bill Nye's explanations make complex ideas understandable for kids. The activities encourage experimentation and critical thinking.

9. *Bill Nye's DIY Science Lab*
This comprehensive book provides a variety of science experiments across multiple disciplines, perfect for aspiring young scientists. Bill Nye offers guidance on setting up a home science lab and conducting experiments safely. The book inspires creativity and scientific inquiry through practical, hands-on learning.

Bill Nye Do It Yourself Science

bill nye do it yourself science: Bill Nye's Great Big World of Science Bill Nye, Gregory Mone, 2020-10-27 With photos, experiments, and more, this “appealing and highly informative” science book from the beloved TV host is “a winner” (School Library Journal). Science educator, TV host, and New York Times–bestselling author Bill Nye is on a mission to help young people understand and appreciate the science that makes our world work. Featuring a range of subjects—physics, chemistry, geology, biology, astronomy, global warming, and more—this profusely illustrated book covers the basic principles of each science, key discoveries, recent revolutionary advances, and the problems that science still needs to solve for our Earth. Nye and coauthor Gregory Mone present the most difficult theories and facts in an easy-to-comprehend, humorous way. They interviewed numerous specialists from around the world, in each of the fields discussed, whose insights are included throughout. Also included are experiments kids can do themselves to bring science to life! “Wordplay and wry wit put extra fun into a trove of fundamental knowledge.” —Kirkus Reviews (starred review) Includes photographs, illustrations, diagrams, glossary, bibliography, and index

bill nye do it yourself science: The Kidult Handbook Nicole Booz, 2018-05-15 Adulting is hard! But “kidulting”— engaging in nostalgic childhood activities to relieve stress, like playing with your old favorite toys, participating in games and activities from your youth, and even snacking on the foods you enjoyed as a kid— isn’t. Let this book be your guide to indulging your inner child. “Kidulting” is a thing, and it’s growing! Especially popular among millennials, the term “kidulting” refers to engaging in activities from your childhood, sometimes with a grown-up twist. Psychology Today points out that playing like a kid helps you look at the world with fresh eyes—or “beginner’s mind”—which allows you to slow down and focus. The Kidult Handbook is a fun and informative guide to healthy escapism through play. Much like adult coloring books, kidulting is a way of focusing your mind on something fun and creative to relieve stress. But this book goes way beyond just coloring—it includes 160 ideas for fun, from timeless classics like building blanket and pillow forts, to generation-specific ideas, from millennials to boomers. Interspersed throughout are fun facts and trivia about games through the ages. Most activities are unplugged and screen-free, and range from solitary pursuits to ones you can share with a friend or two. Feeling young again has never been so easy!

bill nye do it yourself science: *Encyclopedia of Science and Technology Communication* Susanna Hornig Priest, 2010-07-14 In the academic world, the term science communication refers both to a set of professions (such as science journalism and public information work) and to an interdisciplinary scholarly research specialization. Much of this research is aimed at improving our understanding of the best ways to communicate complex information, especially to people who are not scientists. Science communication specialists are concerned with giving people useful information about health, environment, and technology – as well as science itself. In order to do this, we also need to improve our understanding of how people think, form opinions, and process information. Additionally, professional practitioners in science communication are engaged in strategic and ethical decisions every day, such as: How should reporters cover the issue of climate change? Should the views of scientists who do not believe that climate change has been caused by human activity be included alongside the views of those who do, in order to give a balanced story, or does this mislead the public into thinking that both of these positions are equally accepted within the scientific community? The Encyclopedia of Science and Technology Communication provides information on the entire range of interrelated issues in this interdisciplinary field in one place, along with clear suggestions on where to begin the search for more. Geared towards undergraduate and graduate students in journalism, communication, mass communication, and media studies, as well as towards working journalists, public information officers, and public relations specialists, this encyclopedia introduces this vast, fascinating field while challenging the reader to question assumptions inherent in communication across disciplinary boundaries. Key Themes Associations and Organizations Audiences, Opinions, and Effects Challenges, Issues, and Controversies Changing Awareness, Opinion, And Behavior Critical Influences and Events Global and International Aspects

bill nye do it yourself science: Reframing Science Teaching and Learning David Stroupe, 2017-02-03 Responding to recent reform efforts, such as the Next Generation Science Standards, which call for students to learn science practices, this book proposes a conceptual reframing of the roles of teachers and students in formal and informal science learning settings. Inviting the field to examine the state of science practice, it provides concrete examples of how students, supported by the actions of educators, take on new roles, shifting from passive recipients of information to active participants in conceptual, social, epistemic, and material features of science work. Each chapter provides an examination of how and why science practice evolves in learning communities in which students and teachers negotiate disciplinary work; an analysis of how specific pedagogical and social actions taken by someone with authority (a teacher or other educator) provides opportunities for students to shape science practices; a set of concrete recommendations for working with young students in formal and informal learning settings; and a set of suggestions and questions to catalyze future research about and the evolving relationships between educators, students, and science practices in the field of science education. Showing how and why the conceptual ideas presented are important, and providing specific, actionable suggestions for teachers and other educators for their daily work, this book includes both elementary and secondary learning sites.

bill nye do it yourself science: Making Sense of Sensemaking TJ McKenna, 2025 Dive into the transformative world of science education with this groundbreaking guide. Learn how to navigate the journey from traditional teaching to a dynamic, student-centered approach that emphasizes understanding over rote learning. Grounded in the latest educational research and aligned with the Next Generation Science Standards (NGSS), this book provides practical strategies for creating K–12 classrooms where students actively engage in scientific practices, explore real-world problems, and build knowledge through inquiry and collaboration. Readers will learn how to design lessons that foreground sensemaking through the integration of disciplinary core ideas, crosscutting concepts, and science and engineering practices to make learning relevant and exciting. Teachers, educational leaders, and professional development providers will find valuable insights for supporting teachers in this shift, ensuring that science education becomes more equitable and effective for all learners. Making Sense of Sensemaking provides the tools and inspiration to elevate science education and cultivate scientifically literate citizens ready to tackle the challenges of the future. Book Features: Describes what sensemaking is, why it is important, and how to design learning experiences that foreground sensemaking.Provides tangible examples of sensemaking experiences that can easily be incorporated into work in K–12 classrooms, university methods courses (preservice), and professional learning sessions (inservice).Shows how to develop teacher capacity for sensemaking and ways to build sensemaking into a lifelong journey of learning.Provides models, pedagogical strategies, and tangible examples that can be immediately implemented.Offers guidance and rubrics for assessing STEM learning experiences in K–12 classrooms.

bill nye do it yourself science: The Comprehensive Guide to Science and Faith William A. Dembski, Casey Luskin, Joseph M. Holden, 2021-10-05 Science and Faith Can—and Do—Support Each Other Science and Christianity are often presented as opposites, when in fact the order of the universe and the complexity of life powerfully testify to intelligent design. With this comprehensive resource that includes the latest research, you'll witness how the findings of scientists provide compelling reasons to acknowledge the mind and presence of a creator. Featuring more than 45 entries by top-caliber experts, you'll better understand… how scientific concepts like intelligent

design are supported by evidencethe scientific findings that support the history and accounts found in the Biblethe biases that lead to scientific information being presented as a challenge—rather than a complement—to Christianity Whether you're looking for answers to your own questions or seeking to explain the case for intelligent design to others, The Comprehensive Guide to Science and Faith is an invaluable apologetic tool that will help you explore and analyze the relevant facts, research, and theories in light of biblical truth.

bill nye do it yourself science: A & L Do Summer Jan Blazanin, 2011-05-10 I'd like to say something clever, but my tongue is paralyzed. This guy is tall and built and—okay, maybe he's not exactly handsome. Wait, that's not true. He is exactly handsome. From ten feet away I can see the electric blue of his eyes. All of that put together makes him the Superman of redheads. After a year in rural Cottonwood Creek, Iowa, city girl Laurel is still adjusting to a place where parties take place in barns, guys ride around in pickup trucks, and a killer senior prank involves getting pigs into the principal's office. Fortunately, she has her best friend Aspen, an Iowa native, to show her around. The real problem is that neither the country girl nor the city slicker have boyfriends—or any prospects for getting them. Clearly, they need to raise their profile—and they have a summer to do so.

bill nye do it yourself science: Make It Rain! Areva Martin, 2018-03-20 What if you could get in front of millions of prospects with the avid endorsement of famous influencers -- without spending a dime? It's happening right in front of you every day. Guest experts on TV, radio, podcasts, blogs, and live streaming are getting local and national exposure for their business and brand that they could never have afforded to reach with ads. For a decade, Areva Martin has used the media to build a huge platform that expanded the influence and power of her brand exponentially. Media appearances on Dr. Phil, Anderson Cooper 360, The Doctors, CNN, MSNBC, FOX, and more have virtually eliminated the need of a marketing budget for her thriving law firm and non-profit organization, while securing her place as one of America's most sought after thought leaders. In Make It Rain! Areva breaks the silence to reveal what insiders know about the power of media appearances to revolutionize a business and brand and get your core message out to the people who need it most. You'll learn how to: Match your brand to the right audience and media venues Craft pitches producers can't resist Jump on breaking news shows Pivot and speak in soundbites like the pros Amplify every interview with social media Turn appearances into platform and become a rainmaker Never before have there been more ways to build a presence that matters. Whether you are the executive of a corporation, the author of an upcoming book, the owner of a rapidly growing small business, or the public face of a local nonprofit or association, if you have a business to build or people you want to help, nothing beats using the media to create the visibility, influence, and power you need. Are you ready to Make It Rain!?

bill nye do it yourself science: A More Beautiful Question Warren Berger, 2014-03-04 To get the best answer-in business, in life-you have to ask the best possible question. Innovation expert Warren Berger shows that ability is both an art and a science. It may be the most underappreciated tool at our disposal, one we learn to use well in infancy-and then abandon as we grow older. Critical to learning, innovation, success, even to happiness-yet often discouraged in our schools and workplaces-it can unlock new business opportunities and reinvent industries, spark creative insights at many levels, and provide a transformative new outlook on life. It is the ability to question-and to do so deeply, imaginatively, and "beautifully." In this fascinating exploration of the surprising power of questioning, innovation expert Warren Berger reveals that powerhouse businesses like Google, Nike, and Netflix, as well as hot Silicon Valley startups like Pandora and Airbnb, are fueled by the ability to ask fundamental, game-changing questions. But Berger also shares human stories of people using questioning to solve everyday problems-from "How can I adapt my career in a time of constant change?" to "How can I step back from the daily rush and figure out what really makes me happy?" By showing how to approach questioning with an open, curious mind and a willingness to work through a series of "Why," "What if," and "How" queries, Berger offers an inspiring framework of how we can all arrive at better solutions, fresh possibilities, and greater success in business and

life.

bill nye do it yourself science: You Are What You Do Daniel Im, 2020-02-04 In You Are What You Do, Daniel Im examines seven everyday lies that Christians believe in the twenty-first century and the gospel truths that reshape everything.

bill nye do it yourself science: Misguided Matthew Facciani, 2025-07-08 Why are people inclined to believe misinformation? This wide-ranging and comprehensive book shines a light on how false beliefs take root and spread, exploring the cognitive, emotional, and social factors that make us all susceptible to misinformation. Challenging approaches that focus solely on education and media literacy, Matthew Facciani emphasizes the important role identities and social ties have in the complex interplay of forces that lead people to believe things that are not true. Susceptibility to misinformation is largely shaped by social dynamics. The pressure to affirm one's personal and group identities can leave individuals vulnerable to false beliefs. Facciani examines both offline and online connections, highlighting how social media, news media, and personal networks can promote and amplify false claims. To bring social-scientific findings to life, he shares the stories of people who fell for misinformation, with contemporary examples including the COVID-19 pandemic and antivaccine movement. Facciani examines the effectiveness of various approaches to combating misinformation, underscoring the importance of understanding the psychological and sociological mechanisms behind its spread. He provides actionable recommendations for reducing the influence of misinformation at all levels, from having productive conversations with friends and family to rebuilding trust in institutions. Distilling the latest research accessibly and featuring compelling case studies, Misguided equips readers with practical strategies to counteract false beliefs.

bill nye do it yourself science: Instructor , 1999

bill nye do it yourself science: Remarks by Bill Nye (Edgar W. Nye)... Bill Nye, 1891 A collection of humorous remarks by famed humorist, Bill Nye.

bill nye do it yourself science: Boys' Life , 1995-12 Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

bill nye do it yourself science: Everything All at Once Bill Nye, 2018-11-20 In the New York Times bestseller Everything All at Once, Bill Nye shows you how thinking like a nerd is the key to changing yourself and the world around you. Everyone has an inner nerd just waiting to be awakened by the right passion. In Everything All at Once, Bill Nye will help you find yours. With his call to arms, he wants you to examine every detail of the most difficult problems that look unsolvable—that is, until you find the solution. Bill shows you how to develop critical thinking skills and create change, using his "everything all at once" approach that leaves no stone unturned. Whether addressing climate change, the future of our society as a whole, or personal success, or stripping away the mystery of fire walking, there are certain strategies that get results: looking at the world with relentless curiosity, being driven by a desire for a better future, and being willing to take the actions needed to make change happen. He shares how he came to create this approach—starting with his Boy Scout training (it turns out that a practical understanding of science and engineering is immensely helpful in a capsizing canoe) and moving through the lessons he learned as a full-time engineer at Boeing, a stand-up comedian, CEO of The Planetary Society, and, of course, as Bill Nye The Science Guy. This is the story of how Bill Nye became Bill Nye and how he became a champion of change and an advocate of science. It's how he became The Science Guy. Bill teaches us that we have the power to make real change. Join him in... dare we say it... changing the world.

bill nye do it yourself science: Broader Impacts of Science on Society Bruce J. MacFadden, 2019-10-03 Invaluable guidance on how scientists can communicate the societal benefits of their work to the public and funding agencies. This will help scientists submit proposals to the US National Science Foundation and other funding agencies with a 'Broader Impacts' section, as well as helping to develop successful wider outreach activities.
