cps academic center test 2023: Remote Learning and Distance Education William H. Pruden III, 2024-11-14 Remote learning and distance education burst into the national consciousness with the onset of the COVID-19 pandemic - yet it remains poorly understood in many ways. Explore a range of debates around this timely topic, including: can remote learning models of educational instruction produce the same (or better?) academic results than in-school learning? What are the socialization impacts of remote learning? What do education experts think is the next frontier in remote learning? This book explores those questions and many more. Remote Learning and Distance Education provides the historical background and context for understanding the origins and evolution of distance education - an evolution which was accelerated dramatically, and in unpredictable ways, when the COVID-19 pandemic transformed millions of actual classrooms into virtual ones. Readers will better understand the problems, controversies and solutions surrounding distance education, from access and equity issues to maintaining academic integrity. Profiles of key figures and organizations, such as Khan Academy, give readers an introduction to important players in this potentially revolutionary approach to teaching and learning.

cps academic center test 2023: Power, Culture, and Family-School Relations Jen Stacy, 2025-01-30 Power, Culture, and Family-School Relations: Towards Culturally Sustaining Practices explores the extent to which common practices in school-based family outreach advance equity or sustain the status quo in power and cultural relations. Using a rich ethnographic account of a school-based family literacy program in Nebraska, the book unfolds the daily cultural practices of the program so that readers may visualize and contemplate how and if the program serves newcomer and refugee families within the unique context of the New Latine Diaspora. The author draws upon critical theory to showcase how neoliberal and deficit ideologies are at play throughout the different aspects of the program, the influence these ideologies have on the participants, and the tactics used by the caregivers to resist and change the programmatic structures and curriculum to meet their needs. As such, the book invites educators, administrators, and scholars into the nebulous and difficult conversation about how schools, paradoxical entities that often colonize but prospectively liberate, must not just rethink how they work with parents and caregivers but rather dismantle traditional cultural practices that seek to assimilate minoritized families. Showcasing the power of ethnography as a tool which can be used to support educators and scholars to understand cultural elements of family outreach programs on a semiotic level, and how transforming these semiotic building blocks can lead to equitable relationships, it will appeal to scholars and researchers with interests in adult education, social foundations of education, critical ethnography, multilingual Adult Basic Education, and family outreach.

cps academic center test 2023: Unproductive School Choice Debates John Merrifield, Nathan Gray, 2023-05-22 The book explains why we desperately need an "Open Education Industry." It clearly defines the term, and the confusion about what can/should be done to improve schooling outcomes, and why over 30 years of efforts to improve schooling outcomes has left all 51 US school systems far short of what is needed to engage all schoolchildren in high value instruction. Because of past education failures, especially poor basic literacy in economic systems, many influential academics and activists have asserted the presence of adequate market forces where key elements of high-performing markets are absent, and have become pre-occupied with discussion of, and

development of, devastating inappropriate generalizations about findings from studies of narrowly-targeted, restriction-laden expansions of access to alternatives to traditional public schools. The book compares those to transformational school choice expansions, and describes key steps towards the inertia that threatens the future of America as a prosperous and free republic.

cps academic center test 2023: How a City Learned to Improve Its Schools Anthony S. Bryk, Sharon Greenberg, Albert Bertani, Penny Sebring, Steven E. Tozer, Timothy Knowles, 2023-04-18 A comprehensive analysis of the astonishing changes that elevated the Chicago public school system from one of the worst in the nation to one of the most improved. *How a City Learned to Improve Its Schools* tells the story of the extraordinary thirty-year school reform effort that changed the landscape of public education in Chicago. Acclaimed educational researcher Anthony S. Bryk joins five coauthors directly involved in Chicago's education reform efforts, Sharon Greenberg, Albert Bertani, Penny Sebring, Steven E. Tozer, and Timothy Knowles, to illuminate the many factors that led to this transformation of the Chicago Public Schools. Beginning in 1987, Bryk and colleagues lay out the civic context for reform, outlining the systemic challenges such as segregation, institutional racism, and income and resource disparities that reformers grappled with as well as the social conflicts they faced. Next, they describe how fundamental changes occurred at every level of schooling: enhancing classroom instruction; organizing more engaged and effective local school communities; strengthening the preparation, recruitment, and support of teachers and school leaders; and sustaining an ambitious evidence-based campaign to keep the public informed on the progress of key reform initiatives and the challenges still ahead. The power of this capacity building is validated by unprecedented increases in benchmarks such as graduation rates and college matriculation. This riveting account introduces key actors within the schools, city government, and business community, and the partnerships they forged. It also reveals the surprising yet essential role of Chicago's innovative information infrastructure in aligning disparate initiatives. In making clear how elements such as advocacy, civic capacity, improvement research, and strong democracy contributed to large-scale progress in the system's 600-plus schools, the book highlights the greater lessons that the Chicago story offers for system improvement overall.

cps academic center test 2023: Making It Ellen T. Meiser, 2024-10-11 The restaurant industry is one of the few places in America where workers from lower-class backgrounds can rise to positions of power and prestige. Yet with over four million cooks and food-preparation workers employed in America's restaurants, not everyone makes it to the high-status position of chef. What factors determine who rises the ranks in this fiercely competitive pressure-cooker environment? Making It explores how the career path of restaurant workers depends on their accumulation of kitchen capital, a cultural asset based not only on their ability to cook but also on how well they can fit into the workplace culture and negotiate its hierarchical structures. After spending 120 hours working in a restaurant kitchen and interviewing fifty chefs and cooks from fine-dining establishments and greasy-spoon diners across the country, sociologist Ellen Meiser discovers many strategies for accumulating kitchen capital. For some, it involves education and the performance of expertise; others climb the ranks by controlling their own emotions or exerting control over coworkers. Making It offers a close and personal look at how knowledge, power, and interpersonal skills come together to determine who succeeds and who fails in the high-pressure world of the restaurant kitchen.
