The next four sections each cover ten years of syndication, listing the shows (with full background--who produced them and why, who liked them and why, etc.) alphabetically by title under the following genres: Adventure/Mystery, Children's, Comedy, Drama, Game/Quiz, Informational, Music/Variety, Religious, Sports, Talk/Interview, Travel/Documentary, Westerns, and Women's.

craig t nelson education: *American Plays and Musicals on Screen* Thomas S. Hischak, 2014-04-24 As the popularity of film grew and audiences demanded longer stories, Hollywood began borrowing plots as well as actors and directors from Broadway—some of these play-to-films were triumphs and others were inexplicable duds. This reference work is an annotated guide to American stage productions remade for film and television, with works ranging from late 19th-century American plays and musicals, through silent and sound films, to made-for-video productions by PBS, A&E, HBO, and others. Each alphabetically listed entry provides complete credits for the play or musical: date, theatre, playwright, cast (with characters) and crew, length of run, along with choreographer, song titles, and authors of the score where available. The screen versions follow, listing alternate titles, date, studio, screenwriter, cast (with characters), director, and producer. Each entry concludes with detailed commentary on the productions; it describes what changes occurred between the formats, determines the strengths and weaknesses of each, judges the success of the transition, and describes how the end product was received. A bibliography and name and title indexes complete this cross-referenced work.

craig t nelson education: *The SAGE Encyclopedia of Contemporary Early Childhood Education* Donna Couchenour, J. Kent Chrisman, 2016-03-15 The general public often views early childhood education as either simply babysitting or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. *The SAGE Encyclopedia of Contemporary Early Childhood Education* presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations and key facts from the field of contemporary early

childhood education. Through approximately 425 entries, this work includes all areas of child development – physical, cognitive, language, social, emotional, aesthetic – as well as comprehensive review of best educational practices with young children, effective preparation for early childhood professionals and policy making practices, and addresses such questions as: · How is the field of early childhood education defined? · What are the roots of this field of study? · How is the history of early childhood education similar to yet different from the study of public education? · What are the major influences on understandings of best practices in early childhood education?
