cucumber in italian language: Like Trembling Birds Andrew DiNicola, 2024-08-07 Sam Rizzo, a football star and class president of DuPont High, and his elder sister, Francine, a tough girl who likes to kickbox, enter the world as children of a premonition. Their single mother believes that she will die giving birth to Sam, and that is precisely what happens. Without a mother or father to care for them, they end up as foster children being reared by their Aunt Clara, a failed nun and the sister of their deceased mother. Clara must abandon God's call to enter a convent because she cannot overcome the sins of the flesh, although she tells everyone that she had to drop out of the novitiate to care for her dead sister's children. Deep inside her, Clara harbors a regret and self-hatred so deep that it manifests in her determination to make something holy of Sam and Francine so that she can redeem her life and the life of her deceased sister. She is determined to send Sam to a monastery and send his sister to a convent. So she vows to do everything she can do to keep the boy and girl as pure virgins because she wants their call to a religious order to be free and clear of those sins of the flesh that sidetracked her. As such, *Like Trembling Birds* traces Sam's and Francine's spiritual journey as they make their way toward the religious life of their aunt's choosing. However, what their abusive aunt does not realize is that God has other plans for these two. And although they must endure harsh treatment from manipulative Aunt Clara, in the end, each of them finds love. Francine falls in love with a girl she meets at work, and Sam falls in love with a girl who tries to ruin him but who then finds her rescuer in Sam. This story presents us with love amid the pain of loss and sorrow and then joy. The spiritual journey of each sibling does end in joy, but it's a joy that defies understanding and that blossoms only by the mysterious work of God.

cucumber in italian language: Adapting Canonical Texts in Children's Literature Anja Müller, 2013-02-14 Adaptations of canonical texts have played an important role throughout the history of children's literature and have been seen as an active and vital contributing force in establishing a common ground for intercultural communication across generations and borders. This collection analyses different examples of adapting canonical texts in or for children's literature encompassing adaptations of English classics for children and young adult readers and intercultural adaptations of children's classics across Europe. The international contributors assess both historical and transcultural adaptation in relation to historically and regionally contingent concepts of childhood. By assessing how texts move across age-specific or national borders, they examine the traces of a common literary and cultural heritage in European children's literature.

cucumber in italian language: Australian English - The National Language Gerhard Leitner, 2013-02-06 Australia's English raises many questions among experts and the general public. What is it like? How has English changed by being transplanted to other parts of the world? Does the rise of AusE and other varieties endanger the role of English as a world language? Past studies have often been selective, focusing on the esoteric and non-typical, and ignoring the contact situation in which Australian English has developed. This book and its companion, *Australia's Many Voices. Ethnic Englishes, Indigenous and Migrant Languages. Policy and Education*, develop and apply a comprehensive and integrative approach that anchors English in the entire 'habitat' of Australia's languages that it both upset and transformed. Based on a wide range of data and on the assumption that all manifestations of Australian English must cohere as a system, this book retraces the social, psycholinguistic and linguistic history of the language. It locates the contact with indigenous and migrant languages and with American English in the appropriate sociohistorical context and shows how several layers of migration have shaped it. As it stratified, it was gradually accepted and developed into a fully-fledged national variety or epicentre of English that could be raised to the status of national language. Implications on educational policy and attempts to reach out into the Asia-Pacific region have followed logically from national status. The study is of interest for specialists of English and Australian Studies as well as a range of other disciplines. Its discursive, non-technical style and presentation makes it accessible to non-specialists with no background in linguistics.

cucumber in italian language: The Word Isaac Mozeson, 2000 This landmark dictionary proves that English words can be traced back to the universal, original language, Biblical Hebrew. Genesis II supports a 'Mother Tongue' thesis, and the Bible also claims that Adam named the animals. This may seem difficult to accept, but then why do the translations of the following animals' names: Skunk, Gopher, Giraffe and Horse actually have corresponding meanings in Biblical Hebrew, such as: Stinker, Digger, Neck and Plower? The book features overwhelming data suggesting that

the roots of all human words are universal, and that words have related synonyms and antonyms that must have been intelligently designed (perhaps by the designer of life himself!) The current hypothesis that language evolved from grunting ape-men may seem like the flat earth theory after reading this book. The 22,000 English-Hebrew links provide surprising evidence, and open new worlds of understanding, once we consider that all of these similar words could not be coincidences.

cucumber in italian language: Iconicity in Language Juan Carlos Moreno Cabrera, 2020-03-26 In linguistics, as in semiotics, iconicity is the conceived similarity between the form of a linguistic sign and its meaning. It also provides definitions and exemplifications of the principles governing linguistic iconicity and brief overviews of iconic words and expressions in 11 language families and in more than 50 spoken and signed languages all over the world. The book contains 678 entries and more than 8,500 examples drawn from 400 languages, and will appeal to scholars and students interested in general linguistics, the history of linguistics, language typology, phonology, morphology, syntax, semantics, and semiotics.

cucumber in italian language: Ethnic Englishes, Indigenous and Migrant Languages Gerhard Leitner, 2013-02-06 Australia is host to many languages - English, indigenous, migrant, and contact. Its multilingualism, the sociopolitical changes that have been impacting upon them, and its wide-ranging language policy efforts are well-known. What has been missing so far is a comprehensive, integrative study of the entire 'habitat' of languages - the contacts and interactions that have been taking place from the beginning of colonization to the present day with their linguistic outcomes. This book and its companion, *Australia's Many Voices. Australian English - The National Language*, develop and apply such an approach. The present book deals with non-mainstream varieties of English, indigenous, migrant, and contact languages. Based on census and other data to 2003, it addresses themes such as language demographics, language shift, and socio-psychological factors that bear upon it. Language change is discussed from the angle of the uprooting of indigenous languages from their original context, of transplantation, and of contact with English. Pidgins and creoles are located inside the Pacific context of the nineteenth century. This study provides an analysis of language and language-education policies to 2003 and connects this theme with the role of Australian English, the national language. It suggests that Australia's habitat is reaching a new stage of plurilingual tolerance. The book is of interest for specialists from a wide range of language and policy disciplines. Its discursive, non-technical style makes it accessible to non-specialists with no background in linguistics.

cucumber in italian language: Transculturating Auto/Biography Rosalia Baena, 2013-10-18

Rosalía Baena's theoretically challenging, analytical volume of essays, explores the diversity of shapes that transcultural life writing takes, demonstrating how it has become one of the most dynamic and productive literary forms of self-inscription and self-representation. Expanding much of the contemporary criticism on life writing, which tends to centre on content, the essays highlight that reading contemporary forms of life writing from a literary perspective is a rich field of critical intervention that has been overlooked because of recent cultural studies' concerns with material issues. To read life writing as primarily cultural texts undercuts much of its value as a complex dynamic of cultural production, where aesthetic concerns and the choice and manipulation of form serve as signifying aspects to experiences and subjectivities. This book was previously published as a special issue of *Prose Studies*.

cucumber in italian language: Slurs and Thick Terms Bianca Cepollaro, 2020-08-31 What is the relation between language, communication, and values? In *Slurs and Thick Terms: When Language Encodes Values*, Bianca Cepollaro explores the ways in which certain pieces of evaluative language not only reflect speakers' moral perspectives, but also contribute to promoting their evaluative stance. She focuses on slurs—the prototypical example of hate speech, including racial and homophobic epithets—and so-called thick terms, that is, those expressions, much discussed in metaethics, that mix description and evaluation such as lewd, chaste, generous, or selfish. This book argues that in employing such terms, speakers not only say something purely factual about people and things, but also presuppose certain values, as if they were common ground among the conversation participants. Cepollaro illustrates how this linguistic mechanism effectively explains the pervasive social and moral effects of evaluative language. Using a multidisciplinary approach, she tackles issues in philosophy of language, linguistics, ethics, and metaethics. Moreover, the theoretical investigation takes into consideration and discusses empirical data from psychology and experimental philosophy.
