culinary marketing arlington heights: Extractives, Manufacturing, and Services David O. Whitten, 1997-04-22 The second volume in the Handbook of American Business History series, this book offers concise histories of extractive, manufacturing, and service industries as well as extensive bibliographic essays pointing to the leading sources on each industry and bibliographic checklists. Supplementing other bibliographic materials in business history, this volume provides researchers with a much needed path through the vast array of material available in the library and on the Internet. Indicating which resources to check and which to bypass, the book is a guide to a sometimes overwhelming amount of information. Each of the book's chapters provides a concise industry history, beginning with the industry's rise to importance in the U.S. and continuing to the present. The bibliographic essays provide a narrative outline of the leading sources published or made available in archives, libraries, or museum collections since 1971, when Lovett's American Economic and Business History Information Sources was published. Each discussion concludes with a bibliographic checklist of the titles mentioned in the essay as well as other titles. In a rapidly expanding information society, researchers, teachers, and students may be easily overwhelmed by the exhaustive material available in print and electronically. What is useful and what can be ignored is a strategic question, and few know where to begin. This book provides a guide.

culinary marketing arlington heights: Exhibits and Displays Carol Ng-He, Patti Gibbons,

2021-04-13 Exhibits and displays are booming and in demand at all types of libraries. From simple displays of books to full-scale museum-quality exhibitions, library exhibits can highlight collections that surprise visitors, tell stories, and engage audiences in innovative ways. Often, exhibits feature more than books—showcasing art, photographs, archival materials, multimedia elements, as well as hands-on activities. Stepping outside traditional walls, digital exhibits reach audiences beyond the circulation desk and pave another way for libraries to share information, promote resources, and even lead change in the community. Despite the growing interest, most library and information science (LIS) programs do not include exhibit development courses. It is not uncommon for librarians learn exhibit production on the job or through resources in the museum sector. Wearing many hats, librarians absorb exhibit work as part of community outreach initiatives, or take on exhibit duties as a general professional interest in the emerging field. Exhibits & Displays is a practical how-to guide that helps librarians unleash their library's potential to engage and wow visitors. The guide explains how to kick-start and grow an exhibit program through expert advice, insights from professional literature, and winning case studies that cover exhibition development from conceptual planning through de-installation packing and evaluation. Exhibits & Display: A Practical Guide for Librarians covers: · Pre-planning · Curation and content development · Project management · Graphic design and writing for readability · Preservation and collection care · Legal considerations and loan registration · Installation/de-installation and maintenance tips · Hands-on interactives and digital exhibits · Educational programming · Marketing · Audience evaluation · Supplemental examples and case studies Librarians in academic, public, school, and special libraries will benefit from Exhibits & Displays: A Practical Guide for Librarians. The book is also an excellent textbook for LIS courses covering exhibition development and outreach.
