The setting includes multiple rooms with interconnected puzzles that build on one another, reinforcing the importance of thorough exploration.

Core Gameplay Mechanics

Players interact with the environment primarily through point-and-click actions. Items can be collected and combined in the inventory to solve puzzles. Some puzzles require players to decode symbols, operate mechanical devices, or manipulate objects within the mill. The game encourages experimentation and attention to detail, with many puzzles relying on clues found in the environment or previous interactions.

Initial Exploration and Key Item Collection
