cvcs pharmacy technician training program: **Shakedown** Steven Malanga, 2010-10-16 As their infatuation with President Obama fades, millions of Americans anxiously ask, Is this the change we were waiting for? The current administration represents change, for sure, Steven Malanga argues - a momentous transformation of the fundamental structure of American politics. A self-interested coalition of public-sector unions and government-financed community activists (like the young Barack Obama) has become our era's characteristic political machine. In *Shakedown*, Mr. Malanga shows how this machine's single-minded goal is always bigger government and more public spending. The bill, he says, is now coming due for the relentless rise of this new political powerhouse. He chronicles how public-sector unions and the corrupt political hacks beholden to them have all but bankrupted once-rich states like California and New Jersey. He details the campaigns to undermine the successful and popular 1990s welfare reform and to revitalize the failed, wasteful War on Poverty programs that funnel taxpayer money to the advocacy groups that are integral cogs in the new political machine. And he provides a comprehensive summary of how these same advocacy groups spent decades helping undermine mortgage standards in the name of helping the poor - in the process enriching themselves and enabling the housing meltdown. As

Americans anxiously ponder the future direction of their government and their economy, Shakedown explores the questions of who got us in this mess and why we need change - constructive change - more than ever.

cvs pharmacy technician training program: Dispensing Medical Countermeasures for Public Health Emergencies Institute of Medicine, Board on Health Sciences Policy, Forum on Medical and Public Health Preparedness for Catastrophic Events, 2008-10-03 On March 3-4, 2008, the Institute of Medicine (IOM) Forum on Medical and Public Health Preparedness for Catastrophic Events hosted a workshop titled Medical Countermeasures Dispensing. The overall objective was to discuss a range of solutions to rapidly provide medical countermeasures to protect large numbers of people prior to or during a public health emergency, such as a bioterrorist attack or infectious disease outbreak. The United States is currently unprepared to confront the range of threats it is facing, such as an intentional anthrax release, severe acute respiratory syndrome (SARS), or pandemic influenza, and it must plan aggressively to counteract the threat of these and other future public health emergencies. Countermeasure dispensing must harness all types of imaginative partnerships between public and private institutions, working together in ways tailored to meet individual community needs. This workshop summary highlights the presentations and subsequent discussion that occurred at the workshop.

cvs pharmacy technician training program: Human Work in the Age of Smart Machines

Jamie Merisotis, 2020-10-06 A public policy leader addresses how artificial intelligence is transforming the future of labor—and what we can do to protect the role of workers. As computer technology advances with dizzying speed, human workers face an ever-increasing threat of obsolescence. In Human Work In the Age of Smart Machines, Jamie Merisotis argues that we can—and must—rise to this challenge by preparing to work alongside smart machines doing that which only humans can: thinking critically, reasoning ethically, interacting interpersonally, and serving others with empathy. The president and CEO of Lumina Foundation, Merisotis offers a roadmap for the large-scale, radical changes we must make in order to find abundant and meaningful work for ourselves in the 21st century. His vision centers on developing our unique capabilities as humans through learning opportunities that deliver fair results and offer a broad range of credentials. By challenging long-held assumptions and expanding our concept of work, Merisotis argues that we can harness the population's potential, encourage a deeper sense of community, and erase a centuries-long system of inequality.
