Although the Indians had experienced the learning of English as a foreign language due to their colonial past, the need to learn other European/Romance/Germanic languages has intensified with the growing linkage of India with the developed and developing countries in the post-Cold War era. foreign language in spanish: Spanish as a second and third language Jonas Grünke, Andrea Pešková, Christoph Gabriel, 2024-05-15 Spoken as a foreign language by around 24 million people worldwide, Spanish can be the second language (L2) of monolingually raised learners who acquire it in school. Ever more often it is also the third or a further language (L3) of learners who have previously studied another foreign language (for example Spanish after English in Germany) or who acquired more than one language during early childhood, as is the case with heritage speakers. This book explores the intersections between linguistics and language pedagogy related to the acquisition of L2 and L3 Spanish in various contexts worldwide. Fostering the interdisciplinary dialogue, it combines contributions by linguists and specialists in didactics, which not only examine the interface between basic linguistic and applied research but also develop proposals and materials for concrete teaching situations.

foreign language in spanish: Critical Reflection and the Foreign Language Classroom Terry Osborn, 2021-05-01 Twenty years ago, this book introduced pre-service and in-service foreign language teachers to the basic concepts of critical educational study as applied to foreign language education in the United States. Since its initial publication, teachers now commonly known as world language educators are better prepared to understand issues of power in relation to, for example, language variety, language status, and language education. Indeed, much recent attention has been focused on critical approaches to language education including teaching for social justice. The author addresses issues such as the supposed failure of foreign language education, the educational filter role played by language classes, the concept of foreignness as seen in national standards, language curricula and textbooks, and the implications of these issues in terms of power relationships and cultural mediation both in and out of the classroom. The reader is encouraged to analyze the forms of cultural struggle that can be found within the world language classrooms of the United States including the likely impact those struggles have on members of the dominant and subordinate cultures. Two decades later, critical reflection continues to require these skills.

foreign language in spanish: The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements Fatih Bayram, Maki Kubota, Sergio Miguel Pereira Soares, 2024-03-27 Over the past three decades studies investigating heritage speaker (HS) linguistic competencies have shown, time and again that, despite being L1 or 2L1 native speakers of their home language(s), HS outcomes display variation across a wide spectrum of differences as compared to each other, other types of bilinguals as well as their monolingual peers. Studies have traditionally used—mostly behavioral—methodologies rooted in adjacent established fields (e.g., L1 acquisition, adult L2 acquisition) offering, in addition to documenting and describing HS performance, important insights for linguistic theory and challenges related to (home/minority) language maintenance, contact, policy and more. A birds-eye view makes it clear that the methodologies one uses to tap into HSs' linguistic knowledge areas, if not more, are important than the phenomena under investigation, especially in light of how their unique experiences with their heritage and other languages are present across a continuum.
