forensic science summer camps: Queer as Camp Kenneth B. Kidd, Derritt Mason, 2019-05-21 Named the #1 Bestselling Non-Fiction Title by the Calgary Herald To camp means to occupy a place and/or time provisionally or under special circumstances. To camp can also mean to queer. And for many children and young adults, summer camp is a formative experience mixed with homosocial structure and homoerotic longing. In *Queer as Camp*, editors Kenneth B. Kidd and Derritt Mason curate a collection of essays and critical memoirs exploring the intersections of "queer" and "camp," focusing especially on camp as an alternative and potentially nonnormative place and/or time. Exploring questions of identity, desire, and social formation, *Queer as Camp* delves into the diverse and queer-enabling dimensions of particular camp/sites, from traditional iterations of camp to camp-like ventures, literary and filmic texts about camp across a range of genres (fantasy, horror, realistic fiction, graphic novels), as well as the notorious appropriation of Indigenous life and the

consequences of “playing Indian.” These accessible, engaging essays examine, variously, camp as a queer place and/or the experiences of queers at camp, including Vermont’s Indian Brook, a single-sex girls’ camp that has struggled with the inclusion of nonbinary and transgender campers and staff; the role of Jewish summer camp as a complicated site of sexuality, social bonding, and citizen-making as well as a potentially if not routinely queer-affirming place. They also attend to cinematic and literary representations of camp, such as the Eisner award-winning comic series *Lumberjanes*, which revitalizes and revises the century-old Girl Scout story; Disney’s *Paul Bunyan*, a short film that plays up male homosociality and cross-species bonding while inviting queer identification in the process; *Sleepaway Camp*, a horror film that exposes and deconstructs anxieties about the gendered body; and Wes Anderson’s critically acclaimed *Moonrise Kingdom*, which evokes dreams of escape, transformation, and other ways of being in the world. Highly interdisciplinary in scope, *Queer as Camp* reflects on camp and Camp with candor, insight, and often humor.

forensic science summer camps: Camp Nurse Tilda Shalof, 2010-05-04 The bestselling, critically acclaimed author of *A Nurse's Story* and *The Making of a Nurse* is back to describe her experiences as a summer camp nurse. After years of working in intensive care units caring for critically ill people, nurse Tilda Shalof now turns her attention to healthy patients—the kids at summer camp. In this reminiscence of six summers at a variety of camps, Shalof opens a window into the world that is a utopia for the vast majority of children, the proverbial “happy campers,” but sometimes also a place of intense misery for a few. Throughout the summers, as kids troop through the infirmary with a variety of ordinary—as well as some quite extraordinary—complaints, Shalof describes how she assesses, diagnoses, and treats them all, from pesky lice infestations and scratchy bug bites, to broken arms and severe accidents. But Shalof finds that more often than not, she is treating the psychological maladies. She befriends kids from families going through bitter divorces, girls with eating disorders, a camper who attempts suicide in a desperate plea to be sent home, a teenager grieving the recent death of his father. Whatever the problem or concern, it is to the camp nurse that kids—and counsellors—go for help. These anecdotes are told in a light-hearted tone, full of good humour and lots of laughs. Shalof's stories are wildly entertaining and will satisfy the twinges of nostalgia every parent feels when sending their kids away to camp.
