free personal care aide training online: Longevity Hubs Joseph F. Coughlin, Luke Yoquinto, 2024-11-19 How innovation hotspots for the world's aging population may prove to be of vital economic and strategic importance in the years ahead. Populations around the world are aging, and older adults' economic influence—already considerable—stands to grow markedly in the decades ahead. Finding ways to make these lives better is a win-win-win: for older consumers; for aging economies; and for companies and the regions where they reside. This much-needed volume edited by Joseph Coughlin and Luke Yoquinto, Longevity Hubs, brings together contributors—entrepreneurs, researchers, designers, public servants, and others—who are addressing the multifaceted concerns of aging societies. Together, they explore the possibility that specific regions will soon distinguish themselves as longevity hubs: a home to disproportionate economic and innovative activity for older populations. If a region were to emerge as such a disproportionate hotspot, that area and its home nation might better weather some of the challenges posed by population aging, while at the same time providing a cash injection into the local economy thanks to aging markets domestic and foreign. Longevity Hubs explores strategies adopted by different areas' government and industry leaders to promote such activity; who different regions' target markets are; and how local, older adults may affect (and be affected by) innovation in their area. Longevity Hubs opens on Greater Boston, with the collected articles comprising the "Longevity Hub" special project that ran in the Boston Globe in 2021 and 2022. Then the book zooms out to take in a more global stage, in the form of nine chapters written by representatives of cities and regions staking a claim as powerhouses of aging innovation. These include Louisville, in the US; Newcastle, in the UK; Dubai; Milan; São Paulo; Tel Aviv; regions in Japan and Thailand; and Aging2.0, a distributed network.

free personal care aide training online: A Caregiver's Guide to Dementia Janet Yagoda Shagam, 2021-10-12 *New Edition with Updated dementia, dementia care, and resource information.* According to the Alzheimer's Association, there are more than six million people living in the United States have Alzheimer's disease or some other form of dementia. Not reported in these statistics are the sixteen million family caregivers who, in total, contribute nineteen billion hours of unpaid care each year. This book addresses the needs and challenges faced by adult children and other family members who are scrambling to make sense of what is happening to themselves and the loved ones in their care. The author, an experienced medical and science writer known for her ability to clearly explain complex and emotionally sensitive topics, is also a former family caregiver herself. Using both personal narrative and well-researched, expert-verified content, she guides readers through the often-confusing and challenging world of dementia care. She carefully escorts

caregivers through the basics of dementia as a brain disorder, its accompanying behaviors, the procedures used to diagnose and stage the disease, and the legal aspects of providing care for an adult who is no longer competent. She also covers topics not usually included in other books on dementia: family dynamics, caregiver burnout, elder abuse, incontinence, finances and paying for care, the challenges same-sex families face, and coping with the eventuality of death and estate management. Each chapter begins with a real-life vignette taken from the author's personal experience and concludes with Frequently Asked Questions and Worksheets sections. The FAQs tackle specific issues and situations that often make caregiving such a challenge. The worksheets are a tool to help readers organize, evaluate, and self-reflect. A glossary of terms, an appendix, and references for further reading give readers a command of the vocabulary clinicians use and access to valuable resources.

free personal care aide training online: *Retirement Bites* Kerry Hannon, Janna Herron, 2025-09-30 From two personal finance experts, a "hopeful and even fun roadmap" (Ken Dychtwald, author of *The Power Years*) to plan for your retirement, tailored to the specific financial circumstances of Gen X The oldest members of Gen X are less than a decade from retirement age, but many of the sixty-four million Americans born between 1965 and 1980 are not sufficiently prepared. While it could be easy to label Gen Xers as slackers, there are several underlying economic issues making it harder for this cohort to save for retirement. Company-funded pensions vanished just as Gen X started working, 401(k)s were less widespread for much of their early earning years, and Gen X's earnings have been disrupted by multiple financial crises during their work lifetimes. *Retirement Bites* is a retirement playbook that specifically targets this overlooked generation. Personal finance experts Kerry Hannon and Janna Herron lay out a blueprint for Gen Xers to take control of their financial future: from understanding investment options, to boosting financial security, to creating a retirement income stream, and more. The goal is to embrace not just saving for retirement but saving for life.
