impossible quiz question 32: Evolution, Creationism, and the Battle to Control

America's Classrooms Michael Berkman, Eric Plutzer, 2010-09-20 Who should decide what children are taught in school? This question lies at the heart of the evolution-creation wars that have become a regular feature of the US political landscape. Ever since the 1925 Scopes 'monkey trial' many have argued that the people should decide by majority rule and through political institutions; others variously point to the federal courts, educational experts, or scientists as the ideal arbiter. Berkman and Plutzer illuminate who really controls the nation's classrooms. Based on their innovative survey of 926 high school biology teachers they show that the real power lies with individual educators who make critical decisions in their own classrooms. Broad teacher discretion sometimes leads to excellent instruction in evolution. But the authors also find evidence of strong creationist tendencies in America's public high schools. More generally, they find evidence of a systematic undermining of science and the scientific method in many classrooms.

impossible quiz question 32: *A Game of Inches* Peter Morris, 2006-03-23 As befits a game traditionally passed from one generation to the next, baseball has always had a special reverence for origins. Claims of being first with any element of the game are disputed with fervor and passion. When the octogenarian Fred Goldsmith died in 1939, a headline proclaimed, 'Goldsmith Dies Insisting He Invented Curve Ball'; Fred Goldsmith understood the secret of immortality. Yet while countless thousands of words have been spilled on the subject of baseball "firsts," there has been no definitive source for the settlement of disputes. Peter Morris's endlessly fascinating *A Game of Inches* has now arrived to fill the void. Impeccably researched and engagingly written, this treasure trove will surprise, delight, and educate even the most knowledgeable fan by dispelling cherished myths and revealing the source of many of baseball's features that we now take for granted. Award-winning author Peter Morris explains the context that led each new item to emerge when it did, and chronicles the often surprising responses to these innovations. Of few books can it genuinely be said that once you start reading, it's hard to put it down-but *A Game of Inches* is one of them. It belongs in the pantheon of great baseball books, and will give any reader a deeper appreciation of why baseball matters so much to Americans. (A companion volume, *A Game of Inches: The Game Behind the Scenes*, was published in the fall of 2006.)

impossible quiz question 32: Sociology in Our Times Jane Murray, 2015-05-11 Bob Dylan wrote "The Times They Are a-Changin'" in 1964, and those words remain relevant even now in this new millennium. *Sociology in Our Times*, Seventh Canadian Edition, brings to light the relevance of sociology to students' lives in this rapidly changing world. The text highlights the profound importance of understanding how and why people act the way they do, how societies grapple with issues and major problems, and why many of us are reassured by social institutions - including family, religion, education, government, and the media - even at times when we might like to see certain changes occur in these institutions. Like previous editions of this widely read text, this seventh Canadian edition is a cutting-edge book in two ways: (1) by including a diversity of classical and contemporary theory, interesting and relevant research, and lived experiences that accurately mirror the diversity in society itself, and (2) by showing students that sociology involves important questions and issues that they confront both personally and indirectly through the media and other sources. This text captures the interest of a wide variety of Canadian students by taking into account their concerns and perspectives. As the title suggests, topics were selected to be most pertinent to "Our Times," including the widening income gap between the rich and poor, new and emerging definitions of family life, changing constructions of sexuality, and ongoing concerns related to our

environment. In doing so, we hope that students will learn to critically examine their social world, and to further contemplate the social world they hope to live in moving forward. Sociology in Our Times captures the excitement of this new era and aims to help students understand how sociological theory and research can be applied to both everyday life and the pressing social issues we face in this rapidly changing world.

impossible quiz question 32: Assimilation/generation/resurrection Ben A. Heller, 1997 Cuban author Jose Lezama Lima (1910-76) produced some of the most enigmatic and important poetry in the Spanish language. He did this during a turbulent moment in Cuban history - a period of social unrest, radical change in political systems, and attempts at cultural self-definition. While some have argued that his poetry evades these circumstances, Assimilation/Generation/Resurrection adopts a contextual approach and reveals the extent of Lezama's engagement with the defining political and cultural issues of his day. It also lays bare the underlying connection of this poetry to a weave of intertexts - Lezama's productive interaction with several traditions. Intimidating in its philosophical scope and linguistic complexity, Lezama's poetry has received far less critical attention than his prose. The present study rectifies this critical imbalance, foregrounding the poetry while discussing three issues that link disparate areas of Lezama's literary production. These issues - cultural assimilation, generation, and resurrection - are central elements in Lezama's poetics, yet are also pertinent to wide-ranging debates on Latin American cultural identity. This study reads key poems from each of his published books of poetry, using an interpretive approach forged from diverse yet cohering sources, including Lezama's own theories on reading and writing. After a brief methodological excursus and a first contextualization of Lezama's poetics vis-a-vis a number of other Cuban writers, this study considers Lezama's early assimilation of a number of initiatory texts as well as his indirect but crucial response to the social concerns of the 1930s.

Assimilation/Generation/Resurrection makes clear that Lezama's poetry owes its existence to an engagement with cultural artifacts and social circumstances more generally. Yet it is far more than a response. It constantly attempts to go beyond, generating the new at the intersection of the old and the as-yet uncreated. The result of this practice is a poetry that claims the power both to translate over distance and to resurrect by virtue of the image.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
