in the know answer key: Lessons from Problem-based Learning H. J. M. van Berkel, 2010 Problem-based learning (PBL) has excited interest among educators around the world for several decades. Among the most notable applications of PBL is the approach taken at the Faculty of Health, Medicine and Life sciences (FHML) at Maastricht University, the Netherlands. Starting in 1974 as a medical school, the faculty embarked on the innovative pathway of problem-based learning, trying to establish a medical training program which applied recent insights of education which would be better adapted to the needs of the modem physician. The medical school, currently part of the FHML, can be considered as an 'established' school, where original innovations and educational changes have become part of a routine. The first book to bring this wealth of information together, Lessons from Problem-based Learning documents those findings and shares the experiences of those involved, to encourage further debate and refinement of problem-based learning in specific applications elsewhere and in general educational discussion and thought. Each chapter provides a description of why and what has been done in the Maastricht program, followed by reflection on the benefits and issues that have arisen for these developments. The final section of the book examines the application of PBL in the future, and how it is likely to develop further.

The 25-year-old San Francisco native, whose real name is Ari Leff, first found fame in 2015, but he's been writing music for years. Lauv was interested in music from a young age and started learning the guitar at 11. Shortly after, he decided to try his hand at composing his own music. He wrote constantly about relationships and breakups, baring his soul in deeply personal songs. The irony, of course, is that up till then he himself had never been in a relationship! The young American went on to study music technology at NYU, figuring he'd do his best work behind the scenes. While writing and producing songs for other artists, he came across an interview with the musician Paul Simon. In

it, Simon said that his approach to writing songs was a process of uncovering his deepest feelings. From then on, Lauv decided he would use music to explore his personal identity. He adopted the name Lauv, from the Latvian word for "lion," as a nod to both his mother's background and his zodiac sign, Leo. Lauv‧Ari Leff○○ Lauv Lauv Lauv In 2015, Lauv released his first song "The Other" online. To his surprise, it went viral. Since then, he has signed a record deal, released his debut album, How I'm Feeling, had success on the Billboard charts, and gone on a world tour. It has been a wild ride, but Lauv isn't stopping yet. He has teamed up with both Troye Sivan on "i'm so tired" and K-pop sensation BTS on "Who." Lauv is committed to staying true to himself, which means being honest about his struggles with depression and anxiety. He often writes about his emotional state in his songs, but it has also prevented him from writing music at times. That's why it was important to Lauv to open up about it both in his music and by working with charities to remove the stigma about mental health issues. He hopes that by telling the truth, people will see that this condition isn't unusual, and other sufferers will feel less alone. With catchy songs that you can identify with, it's easy to see why Lauv has become such a star.
