in a violent nature interview: Dopesick Beth Macy, 2018-08-07 Journalist Beth Macy's definitive account of America's opioid epidemic masterfully interlaces stories of communities in crisis with dark histories of corporate greed and regulatory indifference (New York Times) -- from the boardroom to the courtroom and into the living rooms of Americans. In this extraordinary work, Beth Macy takes us into the epicenter of a national drama that has unfolded over two decades. From the labs and marketing departments of big pharma to local doctor's offices; wealthy suburbs to distressed small communities in Central Appalachia; from distant cities to once-idyllic farm towns; the spread of opioid addiction follows a tortuous trajectory that illustrates how this crisis has persisted for so long and become so firmly entrenched. Beginning with a single dealer who lands in a small Virginia town and sets about turning high school football stars into heroin overdose statistics, Macy sets out to answer a grieving mother's question-why her only son died-and comes away with a gripping, unputdownable story of greed and need. From the introduction of OxyContin in 1996, Macy investigates the powerful forces that led America's doctors and patients to embrace a medical culture where overtreatment with painkillers became the norm. In some of the same communities featured in her bestselling book *Factory Man*, the unemployed use painkillers both to numb the pain of joblessness and pay their bills, while privileged teens trade pills in cul-de-sacs, and even high school standouts fall prey to prostitution, jail, and death. Through unsparing, compelling, and unforgettably humane portraits of families and first responders determined to ameliorate this epidemic, each facet of the crisis comes into focus. In these politically fragmented times, Beth Macy shows that one thing uniting Americans across geographic, partisan, and class lines is opioid drug abuse. But even in the midst of twin crises in drug abuse and healthcare, Macy finds reason to hope and ample signs of the spirit and tenacity that are helping the countless ordinary people ensnared by addiction build a better future for themselves, their families, and their communities. An impressive feat of journalism, monumental in scope and urgent in its implications. -- Jennifer Latson, *The Boston Globe*

in a violent nature interview: Black Boys Clive Chijioko Nwonka, 2023-08-24 In *Black Boys: The Aesthetics of British Urban Film*, Nwonka offers the first dedicated analysis of Black British urban cinematic and televisual representation as a textual encounter with Blackness, masculinity and urban identity where the generic construction of images and narratives of Black urbanity is informed by the (un)knowable allure of Black urban Otherness. Foregrounding the textual Black urban identity as a historical formation, and drawing on a range of theoretical frameworks that allow for an examination of the emergence and continued social, cultural and industrial investment in the fictitious and non-fictitious images of Black urban identities and geographies, Nwonka convenes a dialogue between the disciplines of Film and Television Studies, Philosophy, Cultural Studies, Black Studies, Sociology and Criminology. Here, Nwonka ventures beyond what can be understood as the perennial and simplistic optic of racial stereotype in order to advance a more expansive reading of the Black British urban text as the outcome of a complex conjunctural interaction between social phenomena, cultural policy, political discourse and the continuously shifting politics of Black representation. Through the analysis of a number of texts and political and socio-cultural moments, Nwonka identifies Black urban textuality as conditioned by a bidirectionality rooted in historical and contemporary questions of race, racism and anti-Blackness but equally attentive to the social dynamics that render the screen as a site of Black recognition, authorship and authenticity. Analysed in the context of realism, social and political allegory, urban multiculturalism, Black corporeality and racial, gender and sexual politics, in integrating such considerations into the fabrics of a thematic reading of the Black urban text and through the writings of Stuart Hall, Paul Gilroy, Judith Butler and Derrida, *Black Boys* presents a critical rethinking of the contextual and aesthetic factors in the visual constructions of Black urban identity.

in a violent nature interview: *Democratization and Memories of Violence* Mneesha Gellman, 2016-08-05 Ethnic minority communities make claims for cultural rights from states in different ways depending on how governments include them in policies and practices of accommodation or assimilation. However, institutional explanations don't tell the whole story, as individuals and communities also protest, using emotionally compelling narratives about past wrongs to justify their claims for new rights protections. *Democratization and Memories of Violence: Ethnic minority rights movements in Mexico, Turkey, and El Salvador* examines how ethnic minority communities use memories of state and paramilitary violence to shame states into cooperating with minority cultural agendas such as the right to mother tongue education. Shaming and claiming is a social movement tactic that binds historic violence to contemporary citizenship. Combining theory with empirics, the book accounts for how democratization shapes citizen experiences of interest representation and how memorialization processes challenge state regimes of forgetting at local, state, and international levels. *Democratization and Memories of Violence* draws on six case studies in Mexico, Turkey, and El Salvador to show how memory-based narratives serve as emotionally salient leverage for marginalized communities to facilitate state consideration of minority rights agendas. This book will be of interest to postgraduates and researchers in comparative politics, development studies, sociology, international studies, peace and conflict studies and area studies.

in a violent nature interview: Men and Masculinities in Southeast Asia Michele Ford, Lenore Lyons, 2012-10-12 This book brings together extensive recent innovative research on the study of men and masculinities in Southeast Asia. Drawing on rich ethnographic fieldwork from Vietnam, Cambodia, Thailand, the Philippines, Singapore, Indonesia and Timor-Leste, the book examines both dominant and marginal constructions of heterosexual masculinity and the ways in which these are performed in different localized contexts in insular and mainland Southeast Asia. Through the presentation of detailed ethnographic studies on topics ranging from the professional practices of Filipino merchant seafarers to the sex lives of Thai migrant workers to the stand-over tactics of Indonesian gangsters, the authors in this collection challenge the idea of emerging globalizing forms of masculinities. Where existing studies of gender in Asia tend to concentrate on women, East Asia and gay men, this book fills a significant gap and demonstrates, overall, how gender, ethnicity, class, sexuality and nationality shape contemporary understandings of what it means to be a 'man' in contemporary Southeast Asia.

in a violent nature interview: Jewish Men and the Holocaust: Sexuality, Emotions, Masculinity Florian Zabransky, 2024-10-21 During the Holocaust, amid death and violence, Jewish men were not mere powerless victims. Linking gender studies with a history of sexuality and emotions will highlight intimate agency, power struggles, negotiations of relationships, social dynamics, and representations of masculinities. Considering the agency and vulnerability will further convey intimate choices, the representation of masculine ideals, intimate violence, and the expression of various emotions such as honour and love. As research on the Holocaust often links women with sexuality or portrays women as gendered beings, it is crucial to excavate the intimate, hidden lives of Jewish men and their specific intimate experiences as men. The analysis not only demonstrates how Jewish men remember and make sense of their experiences, but also how they chose to form the narrative and how they represented their ordeal in four chapters, namely ghettos, concentration camps, Jewish resistance in the countryside, and finally, DP camps in the aftermath of the Holocaust. The consideration of these four spaces allows a nuanced, innovative understanding of the intimate history of Jewish men during the Holocaust, i.e. how some men established male dominated structures and established intimate strategies to find solace and pleasure.
