in n out teacher appreciation: Charting the AI Transition in Education and Business Environments James Hutson, TJ Rains, 2024-11-18 This book delineates a comprehensive framework designed to ultimately assist organizations as they navigate the critical juncture—often termed the inflection point—in adopting generative Artificial Intelligence (AI). Addressing the exigent shift in organizational strategy mandated by Industry 4.0, and urging a transition from mere digital transformation to what is being progressively understood as generative transformation,” it fills a conspicuous lacuna in both academic and practical discourses by presenting a timely synthesis of research, empirical studies, and case analyses. The authors utilize an interdisciplinary methodology, bridging the epistemological divide between the technological intricacies of generative AI and its effective implementation within institutional frameworks. Reorienting the focus of organizational leaders from a simplistic replacement paradigm to one of technological-human augmentation, it works toward a prescriptive blueprint for enabling organizations to adopt generative AI without compromising their most valuable asset: human intellectual and emotional capital. Fostering interdisciplinary dialog among academics, industry professionals, and policymakers, it fills a critical

gap in current discourses and serves as a catalyst for future research and collaboration.

in n out teacher appreciation: A Critical Discourse Analysis of Family Literacy Practices Rebecca Rogers, 2003-06-20 In this groundbreaking, cross-disciplinary book, Rebecca Rogers explores the complexity of family literacy practices through an in-depth case study of one family, the attendant issues of power and identity, and contemporary social debates about the connections between literacy and society. The study focuses on June Treader and her daughter Vicky, urban African Americans labeled as low income and low literate. Using participant-observation, ethnographic interviewing, photography, document collection, and discourse analysis, Rogers describes and explains the complexities of identity, power, and discursive practices that June and Vicky engage with in their daily life as they proficiently, critically, and strategically negotiate

language and literacy in their home and community. She explores why, despite their proficiencies, neither June or Vicky sees themselves as literate, and how this and other contradictions prevent them from transforming their literate capital into social profit. This study contributes in multiple ways to extending both theoretically and empirically existing research on literacy, identity, and power:

- * Critical discourse analysis. The analytic technique of critical discourse analysis is brought into the area of family literacy. The detailed explanation, interpretation, and demonstration of critical discourse analysis will be extremely helpful for novices learning to use this technique. This is a timely book, for there are few ethnographic studies exploring the usefulness and limits of critical discourse analysis.
- * Combines critical discourse analysis and ethnography. This new synthesis, which is thoroughly illustrated, offers an explanatory framework for the stronghold of institutional discursive power. Using critical discourse analysis as a methodological tool in order to build critical language awareness in classrooms and schools, educators working toward a critical social democracy may be better armed to recognize sources of inequity.
- * Researcher reflexivity. Unlike most critical discourse analyses, throughout the book the researcher and analyst is clearly visible and complicated into the role of power and language. This practice allows clearer analysis of the ethical, moral, and theoretical implications in conducting ethnographic research concerned with issues of power.
- * A critical perspective on family literacy. Many discussions of family literacy do not acknowledge the raced, classed, and gendered nature of interacting with texts that constitutes a family's literacy practices. This book makes clear how the power relationships that are acquired as children and adults interact with literacy in the many domains of a family's literacy lives.

A Critical Discourse Analysis of Family Literacy Practices: Power In and Out of Print will interest researchers and practitioners in the fields of qualitative methodology, discourse analysis, critical discourse studies, literacy education, and adult literacy, and is highly relevant as a text for courses in these areas.

Chorafas, 2016-04-29 Education, employment policy, and pensions are inextricably linked and critical to any sort of business or economic revival, let alone success, and all three are addressed in *Education and Employment in the European Union*. In the first part of this meticulously researched and highly informative book, Dimitris Chorafas argues that European educational standards, from primary schools through to universities, leave much to be desired. The author then turns to employment. Already affected by problems with education, employment is fettered by structural issues, ranging from inflexible labour laws to heavy social costs. Here, the author suggests what might be done to get employment moving again in difficult economic times. Employment and pensions work in synergy. In the final part, Chorafas examines the implications of and future for pension provision, taking a polyvalent approach which embraces state pensions, company pensions and the workings of pension funds - as well as healthcare issues and the longevity risk. The evidenced analysis of the three interlinked policy areas in this book identifies the issues and the relationships between them. The findings and suggestions will be important to business practitioners, business educators, government authorities, policy makers, consultancies and others either within or wishing to learn lessons from the European Union.
