effect. This volume contains a combination of approximately 100 expertly researched essays on words, phrases and idioms made famous by Hollywood along with the stories behind 30 or so of the most iconic—and ultimately often used—quotes from films. There are also sidebars that focus on other ways the entertainment world has changed language. For instance, stories behind stars whose names have been used for drinks (hello, Shirley Temple) or roses (there are ones named after Elizabeth Taylor and Judy Garland, among others). And, a sidebar on William Shakespeare's unique contribution to the English language.

matt dillon dating history: *America Toons In* David Perlmutter, 2014-03-13 Animation has been part of television since the start of the medium but it has rarely received unbiased recognition from media scholars. More often, it has been ridiculed for supposedly poor technical quality, accused of trafficking in violence aimed at children, and neglected for indulging in vulgar behavior. These accusations are often made categorically, out of prejudice or ignorance, with little attempt to understand the importance of each program on its own terms. This book takes a serious look at the whole genre of television animation, from the early themes and practices through the evolution of the art to the present day. Examining the productions of individual studios and producers, the author establishes a means of understanding their work in new ways, at the same time discussing the ways in which the genre has often been unfairly marginalized by critics, and how, especially in recent years, producers have both challenged and embraced this marginality as a vital part of their work. By taking seriously something often thought to be frivolous, the book provides a framework for understanding the persistent presence of television animation in the American media--and how surprisingly influential it has been.

matt dillon dating history: *Media-Mediated Relationships* Frank Hoffmann, B Lee Cooper, Linda K Fuller, 2023-07-28 Creating a nexus between techno-science and more fundamental disciplines, a phenomenon is emerging in our personal lives: we are beginning to preempt traditional sources for relationship formation; we are becoming more insular and more cautious in starting relationships. The media play an enormous role in our activities, encouraging us to self-advertise in newspapers and magazines, to participate vicariously through pornographic and borderline books, talk radio, and tabloid television, to use our telephones and computers for the ultimate in "safe sex," to engage in video dating, and to explore many other aspects in the field of technoeroticism. As straight and gay people alike live in a time of reluctant commitments, a period of playtime, and the Age of AIDS, the time has come to chronicle the role of mass communication in our search for interpersonal connections. *Media-Mediated Relationships* investigates the historical, economic, psychological, and sociocultural ramifications of the print and broadcast media, motion pictures, music, and new communications technologies (computers, video, interactive media, virtual reality, phone sex) in terms of both our individual and societal concerns. An extension of "cultivation analysis" by means of systems theory, it reports on a baseline survey of over 200 people regarding relationship mediation--demonstrating yet one more example of the symbiosis among and between various media sources. A descriptive case study, *Media-Mediated Relationships* provides a

barometer for better understanding the many “singles” and others searching for meaning and relationships in the sociocultural milieu of the 1990s and beyond.

Outside, Tehran is crumbling: yuppies flee in bumper-to-bumper traffic as skaters and pretty boys rise up to claim the city as theirs.
