The book elegantly answers this urgent question by unpacking multiple dimensions of media ownership through rare and authoritative perspectives, including both historical and contemporary digital developments. It traces the evolving forms of ownership of media and communications in specific African contexts, showing how they interact with broader changes in and outside the continent. The book also shows how Big Techs, such as Meta (formerly known as Facebook), are involved in a scramble for Africa's digital ecosystem and how their advance brings both opportunities and concerns about ownership and control.
