

medicine bow peak loop

medicine bow peak loop is a renowned hiking trail located in the Medicine Bow National Forest of Wyoming. This trail is famous for its breathtaking views, diverse wildlife, and challenging terrain, making it a favorite among outdoor enthusiasts and experienced hikers. The Medicine Bow Peak Loop offers a unique opportunity to explore the natural beauty of the Rocky Mountains, encompassing alpine meadows, dense forests, and rugged peaks. This comprehensive guide will provide essential information about the trail's features, preparation tips, and what to expect along the journey. Whether planning a day hike or an overnight backpacking trip, understanding the specifics of the Medicine Bow Peak Loop is crucial for a safe and enjoyable experience. The following sections will cover the trail overview, route details, flora and fauna, safety considerations, and recommended gear to bring. Readers will gain valuable insight into planning and executing a successful adventure on this iconic loop trail.

- Trail Overview
- Route Description
- Flora and Fauna
- Safety and Preparation
- Recommended Gear

Trail Overview

The Medicine Bow Peak Loop is a moderately strenuous hiking trail that circumnavigates Medicine Bow Peak, the highest summit in the Medicine Bow Mountains at 12,013 feet (3,661 meters). This loop covers approximately 9 miles (14.5 kilometers) and typically takes between 5 to 7 hours to complete, depending on hiking pace and weather conditions. The trailhead is located near the Pole Mountain area, accessible via Forest Road 100, and is well-marked for ease of navigation. The elevation gain is significant, with hikers ascending approximately 2,400 feet during the course of the loop, making it suitable for those with a reasonable level of fitness and hiking experience.

Location and Accessibility

The Medicine Bow Peak Loop is situated in the southern part of the Medicine Bow National Forest, southeastern Wyoming. The trail is accessible year-round, but the best time to hike is from late June through early October when the snow has melted and the weather is more accommodating. Road access to the trailhead can be affected by snow during the winter months, so checking local conditions prior to the trip is advisable.

Trail Difficulty and Conditions

The loop is rated as moderate to strenuous due to the elevation changes and rocky terrain. Sections of the trail can be steep, especially near the summit, and hikers should be prepared for variable weather conditions including sudden temperature drops, wind, and occasional thunderstorms during summer afternoons. The trail is well-maintained but includes rocky and uneven surfaces that require good hiking boots and careful footing.

Route Description

The Medicine Bow Peak Loop provides an immersive experience through diverse landscapes, beginning from the trailhead near Pole Mountain and looping around Medicine Bow Peak in a clockwise or counterclockwise direction. The route offers panoramic views of the surrounding mountain ranges and valleys.

Starting Point and Initial Ascent

The hike begins at the Medicine Bow Peak trailhead, situated at approximately 9,500 feet elevation. The trail initially winds through dense forests of lodgepole pine and Engelmann spruce. This section provides a gradual ascent, allowing hikers to acclimate to the altitude while enjoying the serene forest environment.

Summit Approach

After exiting the treeline, the trail steepens significantly as it approaches the alpine zone. The terrain becomes rocky and exposed, with wildflowers dotting the landscape during summer months. Reaching the summit of Medicine Bow Peak rewards hikers with expansive 360-degree views of the Snowy Range and the surrounding wilderness.

Descent and Loop Completion

Descending from the summit, the trail continues along ridges and descends through alpine meadows filled with native grasses and flowers. The loop completes by re-entering forested areas and eventually returning to the trailhead. Along the return, hikers may encounter small streams and occasional wildlife sightings.

Flora and Fauna

The Medicine Bow Peak Loop traverses several ecological zones, providing opportunities to observe a wide variety of plant and animal species unique to the Rocky Mountain region.

Vegetation Zones

The trail passes through montane forests dominated by lodgepole pine and subalpine fir, then transitions to alpine tundra near the summit. Wildflowers such as Indian paintbrush, lupine, and alpine asters bloom in abundance during late summer.

Wildlife Sightings

Hikers may encounter mule deer, elk, moose, and various small mammals such as marmots and pikas. Birdwatchers can observe species like Clark's nutcracker, mountain bluebird, and sometimes the elusive golden eagle. It is important to maintain a respectful distance from wildlife to ensure safety for both animals and hikers.

Safety and Preparation

Proper preparation is essential when hiking the Medicine Bow Peak Loop due to its elevation, weather variability, and remote location. Understanding potential hazards and taking necessary precautions helps ensure a safe experience.

Weather Considerations

Weather in the Medicine Bow Mountains can change rapidly. Afternoon thunderstorms are common in summer and can bring lightning, heavy rain, and hail. It is advisable to start early in the day to avoid afternoon storms and to carry appropriate rain gear. During colder months, snow and icy conditions may persist.

Altitude and Physical Fitness

The elevation of the trailhead and the summit can affect hikers not acclimated to high altitudes. Symptoms of altitude sickness include headache, nausea, and dizziness. Gradual acclimatization, hydration, and pacing are important to reduce risks. The trail requires moderate to high physical fitness due to elevation gain and rocky sections.

Wildlife and Environmental Hazards

Bears and mountain lions inhabit the region; hikers should carry bear spray, make noise while hiking, and store food properly. Staying on the designated trail minimizes the risk of encounters with dangerous wildlife. Additionally, loose rocks and steep slopes require caution to avoid falls or injuries.

Recommended Gear

Equipping oneself with the right gear enhances safety, comfort, and enjoyment on the Medicine Bow Peak Loop.

- **Footwear:** Sturdy hiking boots with ankle support and good traction.
- **Clothing:** Layered clothing including moisture-wicking base layers, insulating mid-layers, and waterproof outer layers.
- **Navigation:** Topographic map, compass, and/or GPS device.
- **Hydration:** At least 2 liters of water; water purification method if refilling from streams.
- **Food:** High-energy snacks and meals for the duration of the hike.
- **Safety:** First aid kit, bear spray, whistle, and headlamp or flashlight.
- **Sun Protection:** Sunscreen, sunglasses, and a wide-brimmed hat.
- **Emergency Shelter:** Lightweight emergency bivy or space blanket, especially for overnight trips.

Frequently Asked Questions

What is the Medicine Bow Peak Loop trail known for?

The Medicine Bow Peak Loop trail is known for its stunning alpine scenery, diverse wildflowers, and panoramic views from the summit of Medicine Bow Peak, the highest point in the Snowy Range of Wyoming.

How long is the Medicine Bow Peak Loop and what is its

difficulty level?

The Medicine Bow Peak Loop is approximately 9.5 miles long and is considered a moderately strenuous hike due to elevation gain and rugged terrain.

When is the best time of year to hike the Medicine Bow Peak Loop?

The best time to hike the Medicine Bow Peak Loop is from late June through early September, when the trail is generally free of snow and wildflowers are in bloom.

Are there any permits or fees required to hike the Medicine Bow Peak Loop?

No special permits or fees are required to hike the Medicine Bow Peak Loop, but visitors should check with the local National Forest office for any updated regulations or seasonal restrictions.

What wildlife might I encounter on the Medicine Bow Peak Loop trail?

Hikers on the Medicine Bow Peak Loop may encounter wildlife such as mule deer, elk, marmots, pikas, and a variety of bird species native to the Snowy Range.

medicine bow peak loop: *Hiking Wyoming* Roxy and Ben Dawson, 2022-09-01 This completely updated and revised third edition of *Hiking Wyoming* features concise descriptions and detailed maps for 48 easy-to-follow trails throughout the state that allows hikers of all levels to enjoy adventurous views and experience the grandeur of Wyoming. Readers will explore hidden gems and popular hikes in the Laramie Range, Sherman Mountains, Big Horn Mountains, Wind River Range, the Washakie Wilderness, Bearooth Mountains, Grand Teton National Park, and epic trails in between. Discover trails suited to every ability that will thrill beginners and experts alike.

medicine bow peak loop: *Wyoming Road Trip by the Mile Marker* Brook Besser, 2010-03 NEW REVISED EDITION that simplifies the highway naming and adds a number of new features that make the book easier to understand and navigate. Contact info@nightblazebooks.com with any questions. Please read this entire description and the notes at the end... Yellowstone National Park is

the focal point of Wyoming; however, there is so much more if you know where to look. Hidden gems like badlands and petroglyphs can be found in the plains and valleys, and with 15 mountain ranges over 9,000 ft, Wyoming is hardly the boring prairie that many people envision. Even where the plains seem unspectacular there is a rich history along pioneer trails that served as the gateway to the west throughout the 19th century. This book identifies ALL of this, and is simply a book you should not be without. Most Wyoming travel guides are written to explore a specific subject or location, but it would take a stack of books to cover the state for all subjects. Think of these books as a mile wide and 100 miles deep. This remarkable guide, on the other hand, has most everything in the entire state laid out by the highway mile markers so you will always know what is ahead and exactly how to get there. This book covers National Parks and Monuments, State Parks, sightseeing, camping, picnicking, hiking, historical sites, archaeological sites, rest areas, RV dumps, and general points of interest. The book has over 1900 entries, so think of it as 100 miles wide and 10 miles deep -- enough information to get around, but not an overload of information to wade through. Without a book like this putting together a trip across the state requires a great commitment of time and effort. The author knows this, because he has done it many times. In order to provide massive amounts of information into a book of reasonable size and cost, first off the book, it is not a pocket guide but instead is full A4 paper size measuring 8.3 x 11.7 x 0.5 inches. If this was a pocket guide it would be well over a thousand pages. Secondly, the book is laid out in a clear and concise report style format. The descriptions are brief and to the point and not filled with colorful adjectives. Instead the book uses a simple 5-star Cool Rating to convey the author's opinion of the impressiveness of each attraction. In addition, the first two lines for each attraction provide the mileage, GPS coordinates, elevation, which entity owns the land, and a grid system that corresponds to the maps in the book, or can locate the attraction on any map. The detailed directions are also condensed to generally fit on a single line. Just to put a final point on the amount of information in this book, the index is extracted directly from the book itself, and therefore is so comprehensive that it contains over 2,300 entries. So, don't think of whether you should buy this book or that book, this book stands on its own or as the ultimate companion book to any other Wyoming travel book. It will pay for itself many times over in time and fuel savings. If you put it in perspective, the price of the book is around what it costs to operate a vehicle for about 30 miles; maybe 10 or 20 in a big RV -- pretty insignificant. Complete coverage of Yellowstone National Park, Grand Teton National Park, Devils Tower National Monument, Fossil Butte National Monument, Bighorn Canyon National Recreation Area, Fort Laramie National Historic Site, Medicine Lodge State Archaeological Site, Snowy Range, Bighorn Mountains, Wind River Mountains, Sinks Canyon State Park, Guernsey State Park, Glendo State Park, Keyhole State Park, Green River Lakes, Casper Mountain Park, Jackson Hole and much more. NOTES: Because grayscale photos never do justice to things of beauty, the book contains no photos. However, dozens of color photos can be seen on the book website wyomingroadtripbythemilemarker.com.
