political science ohio university: The Politics of Protest Nadia E. Brown, Ray Block Jr., Christopher Stout, 2020-12-18 This collection provides a deep engagement with the political implication of Black Lives Matter. This book covers a broad range of topics using a variety of methods and epistemological approaches. In the twenty-first century, the killings of Black Americans have sparked a movement to end the brutality against Black bodies. In 2013, #BlackLivesMatter would become a movement-building project led by Alicia Garza, Patrisse Cullors, and Opal Tometi. This movement began after the acquittal of George Zimmerman, who murdered 17-year-old Trayvon Martin. The movement has continued to fight for racial justice and has experienced a resurgence following the 2020 slayings of Ahmaud Arbery, George Floyd, Breonna Taylor, Sean Reed, Tony McDade, and David McAtee among others. The continued protests raise questions about how we can end this vicious cycle and lead Blacks to a state of normalcy in the United States. In other words, how can we make any advances made by Black Lives Matter stick? The chapters in this book were originally published in the journal *Politics, Groups, and Identities*.

political science ohio university: Jürgen Habermas and the European Economic Crisis Gaspare M. Genna, Thomas O. Haakenson, Ian W. Wilson, 2016-05-20 The European Union entered into an economic crisis in late 2009 that was sparked by bank bailouts and led to large, unsustainable, sovereign debt. The crisis was European in scale, but hit some countries in the Eurozone harder than others. Despite the plethora of writings devoted to the economic crisis in Europe, present understandings of how the political decisions would influence the integration project continue to remain vague. What does it actually mean to be European? Is Europe still a collection of peoples that rallied together during good times and then retreat to nationalism when challenges appear? Or has Europe adopted a common identity that would foster solidarity during hard times? This book provides its reader with a fresh perspective on the importance identity has on the functioning of the European Union as exemplified in Jürgen Habermas' seminal text, 'The Crisis of the European Union: A Response'. Rather than exploring the causes of the crisis, the contributors examine the current state of European identity to determine the likelihood of implementing Habermas' suggestions. The contributor's interdisciplinary approach is organized into four parts and examines the following key areas of concern: Habermas' arguments, placing them into their historical context. To which degree do Europeans share the ideals Habermas describes as crucial to his program of reform. Influence of Habermas' cosmopolitanism through religious and literary lenses. Impact of Habermas' notions in the arenas of education, national economies, austerity, and human rights. Jürgen Habermas and the European Economic Crisis will be read by scholars in the fields of Political Theory and Philosophy, European Politics and Cultural Studies.

political science ohio university: Extractive Economies and Conflicts in the Global South Kenneth Omeje, 2017-11-28 The majority of developing countries in the Global South are evidently rich in natural resources, but paradoxically blighted by excruciating poverty and conflicts. This paradox of deprivation and war in the midst of plenteous resources has been the subject of great debate in international political economy in contemporary history. This book contributes to the debate by examining the underlying structures, actors and contexts of rentier politics and how they often produce and aggravate conflicts in the various extractive economies and regions of the Global South. The book critically explores the theories of rentier economies and natural resource conflicts, as well as the practical ramifications of rentier politics in the Global South with all their resonance for political economy and security in the Global North.
