premium economy qantas 787: Global Air Transport Management and Reshaping Business Models for the New Era Kankaew, Kannapat, 2022-05-27 The air transport industry is highly vulnerable to environmental changes as was seen when the recent COVID-19 pandemic caused most airline operations to cease. However, for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition. This is detrimental to air carriers since air transport products and services are the same. Moreover, it impacts other industries such as tourism, hotels, and restaurants, which contribute to the derailment of economic and social activities. Thus, it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish. *Global Air Transport Management and Reshaping Business Models for the New Era* provides a comprehensive collection of knowledge on the new era of business management on air transport. It provides strategies, technologies, and tools used in the reshaping of the air transport business model. Covering topics such as customer experience, robotic process automation, and airline alliances, this major reference work is an essential resource for airline managers, supply chain specialists, air transport managers, students and faculty of higher education, libraries, researchers, economists, government officials, and academicians.

premium economy qantas 787: The Airline Revolution Gordon Mills, 2016-07-15 When starting new airlines in response to government deregulation, entrepreneurs in the U.S. and Europe reduced some traditional service qualities (to reduce costs), concentrated on non-stop services between city pairs not already so connected, improved on-time performance, and offered low fares to win leisure travelers from the incumbents and to encourage more travel. In recent developments, some of the new airlines have offered optional extras (at higher fares) to attract business travelers and entered major routes alongside the legacy carriers. Within both the U.S. and Europe, deregulation removed most geographical barriers to expansion by short-haul airlines. Later, limited deregulation spread to other world regions, where many short-haul routes connect city pairs in different countries, and where governments have retained traditional two-country mechanisms restricting who may fly. To gain access to domestic routes in other countries, some new airlines are setting up affiliate companies in neighboring countries, with each company legally controlled in the country of domicile. With air travel growing strongly, especially in Asia, a common result is intense, but potentially short-lived, competition on major routes. The recent developments give clear signposts to likely mid-term outcomes, and make this an opportune time to report on the new-airline scene. *The Airline Revolution* will provide valuable economic analysis of this climate to students, airline professionals advancing to senior positions, public servants and others who provide advice to governments.

premium economy qantas 787: The Chairman's Lounge Joe Aston, 2024-10-28 Shortlisted for the 2025 ABIA Awards, General Nonfiction Book of the Year and The Matt Richell Award for New Writer of the Year From the must-read journalist on how power, money and influence work in this country, the full story of how one of the nation's favourite brands brought itself to ground. Before Covid, both Qantas and its CEO Alan Joyce were flying high, the darlings of customers, staff and investors. After Covid hit, only money mattered - in particular, the company's share price and extraordinary executive bonuses. Illegally redundant workers, unethical flight credits, abysmal customer service, antique aircraft: these became Qantas' new brand. How did things go so badly wrong? Why were customers at the end of the queue? And how did an increasingly autocratic Joyce constantly get his own way, with the Qantas board and with both Liberal and Labor governments, which handed over billions in subsidies and protected lucrative flight routes from foreign competition? For the first time, The Chairman's Lounge tells the full story of how one company banked the nation's loyalty and then cashed in on it. In his celebrated column Rear Window for the Australian Financial Review, Joe Aston's reporting of the ethical failings of Qantas spurred the early retirement of its CEO and the resignation of its chairman. With fresh interviews and revelations, written in Aston's trademark swashbuckling style, The Chairman's Lounge is the definitive account of how Qantas was brought to ground and who did it. It is a parable of our times. 'A masterclass in investigative journalism ... A scathing, unflinching takedown of greed, delusion and a shameless abuse of power, both jaw-dropping and brilliantly incisive' Adele Ferguson

premium economy qantas 787: Buying the Big Jets Paul Clark, 2017-07-14 Selecting the right aircraft for an airline operation is a vastly complex process, involving a multitude of skills and considerable knowledge of the business. Buying the Big Jets has been published since 2001 to provide expert guidance to all those involved in aircraft selection strategies. This third edition brings the picture fully up to date, representing the latest developments in aircraft products and best practice in airline fleet planning techniques. It features a new section that addresses the passenger experience and, for the first time, includes regional jet manufacturers who are now extending their product families into the 100-plus seating category. Overall, the third edition looks at a broader selection of analytical approaches than previously and considers how fleet planning for cost-leader airlines differs from that of network carriers. Buying the Big Jets is an industry-specific example of strategic planning and is therefore a vital text for students engaged in graduate or post-graduate studies either in aeronautics or business administration. The book is essential reading for airline planners with fleet planning responsibility, consultancy groups, analysts studying aircraft performance and economics, airline operational personnel, students of air transport, leasing companies, aircraft value appraisers, and all who manage commercial aircraft acquisition programmes and provide strategic advice to decision-makers. It is also a valuable tool for the banking community where insights into aircraft acquisition decisions are vital.
