premium economy swiss airlines: *21st Century Airlines* Nawal K. Taneja, 2017-09-08 In *21st Century Airlines: Connecting the Dots*, Nawal Taneja addresses the challenges and opportunities facing the airline industry as it tries to innovate and create products and services that are radically different by 'connecting the dots' at four key levels: recognizing the implications of global events, improving cross-functional collaboration within the organization, working more closely with the travel chain, and providing much higher engagements with connectors within the social networks. The book synthesizes insights gained from the experience of non-traditional businesses, such as Uber, that have no physical assets and that focus on scalability through platforms, as well as traditional businesses, such as Mercedes-Benz, that are transitioning from operators of physical assets to adapt to the on-demand and sharing economies. These insights show pragmatically that digitizing airline businesses would require digital mind-sets, digital technologies, digital strategies, and digital workplaces to explore new frontiers in value for both customers and airlines. Moreover, forward-thinking airlines need to consider working with bimodal organizational structures, in which one group optimizes current business models (network, fleet, and schedule planning, as well as revenue management) while a second group explores innovative ways to add digital features to physical products to provide a consistent experience throughout the journey. The book is written for all senior-level practitioners of airlines and related businesses worldwide, as well as senior-level government policymakers.

premium economy swiss airlines: Fasten Your Seatbelt: The Passenger is Flying the Plane Nawal K. Taneja, 2018-01-09 Fasten Your Seatbelt: The Passenger is Flying the Plane is the fourth in a series written at the encouragement of practitioners in the global airline industry. Core customers are beginning to seize control of the direction of the industry from airline management. Customers are doing so due to deep dissatisfaction with what is being offered by traditional carriers across all areas, including network, product, price, customer service and the distribution system. New airlines have clearly focused business designs with the discipline to reject non-valued products or services. In the US, new airlines score higher in customer satisfaction, offering lower fares and making larger operating profits. This book is about customer behaviour and how to address it. It provides detailed but easy-to-read practical discussion of the changes required on the part of airline management not only to think boldly, but also to execute courageously and relentlessly, ground-breaking strategies to fly ahead of their customers. As with previous books written by Nawal Taneja, the primary audience continues to be senior level practitioners within the global airline industry - in both traditional carrier and low complexity carrier segments. The approach is impartial, candid and pragmatic, based on what is happening in the actual market place rather than theoretical business models.

premium economy swiss airlines: Airlines in a Post-Pandemic World Nawal K. Taneja, 2021-06-08 The COVID-19 pandemic represents an extraordinary inflection point that caught airlines worldwide unprepared, causing CEOs to recalibrate their business models. This book explains why this unprecedented pandemic is different from the past disruptions experienced by the airline industry during the past 50 years, and what airlines and related businesses now can do to adapt to the dramatically changed marketplace. This book presents two future scenarios: continuous improvements and elastic supply. These are considered in three specific contexts for the rebuilding of the airline business. These contexts, in the order of urgency with respect to change from the status quo, are the following. The first context is for airlines to become better prepared to deal with frequent and deeper disruptions that could be localized or globalized relating to such areas as

climate change, geopolitics, and cybersecurity. The second context is to collaborate and integrate within the much broader travel ecosystem, possibly using platforms to innovate on new value systems. The third context, which has always been the case and drives the first two, is for airlines to offer real solutions to people's travel needs, solutions developed with imagination and turbocharged innovation, even as we contemplate new technology airplanes and mobility as a service solutions. This book is recommended reading for all senior-level practitioners of airlines and related businesses, as well as aviation policy makers worldwide.

premium economy swiss airlines: The Report: Kuwait Oxford Business Group, 2015-09-28 Kuwait is one of the biggest players in the global energy market, with its proven oil reserves currently the sixth largest in the world. Although revenues from hydrocarbons account for more than 60% of GDP and 95% of exports, the country's low production costs and sizeable fiscal reserves mean it is well positioned to cope with lower oil prices in the short term. This is clear from the government's ongoing commitment to delivering projects outlined in the national development strategy, Kuwait Vision 2035. In the financial services sector, Kuwait continues to perform well, as a series of regulations put in place by the Central Bank of Kuwait in recent years have served to shore up the sector's recovery from the global economic downturn.
