prime minister julia gillard speech: Transnational Feminist Rhetorics and Gendered Leadership in Global Politics Rebecca S. Richards, 2014-10-28 Transnational Feminist Rhetorics and Gendered Leadership in Global Politics examines the rhetoric surrounding women who hold or have held the highest office of a nation-state. Heads of state, such as Golda Meir, Margaret Thatcher, Benazir Bhutto, Ellen Johnson Sirleaf, and Michelle Bachelet, have navigated their ascent

to executive government in vastly different ways while contending with gendered expectations of leadership, especially since most of them are the first woman to occupy their country's highest governmental position. This book analyzes how these women rhetorically perform their positions of power—discursively, visually, and physically—in a traditionally male leadership role. Specifically, this project examines how certain rhetorical acts open up and close down the potential to confront the gendered expectations surrounding political leadership. When people analyze, campaign for, or critique a “female prime minister” or a “woman president,” they are not just talking about one woman but also referencing a collective neoliberal logic that interrupts and reaffirms the belief that the nation-state is an eternal, inevitable structure. Diverse political figures, such as Angela Merkel, Julia Gillard, and Indira Gandhi, are continually put in conversation with one another, through popular media representations, academic scholarship, and political analyses. This book examines the effect of such comparisons and connections, ultimately arguing that many of these gestures reduce or over-simplify women's contributions to world politics. In order to show this effect, this book manifests the transnational connections found in autobiographies, organizations, political commentaries, biographical films, and other sources that focus on women who have been heads of state.

Or that Sylvie Kinigi of Burundi was the first woman to serve as a prime minister in Africa? It is high time these extraordinary women who helped shape our world became household names, and this book brings them at last to the fore. prime minister julia gillard speech: Activist Life Christine Milne, 2017-11-08 An Activist Life is the story of an apparently ordinary woman - a high-school English teacher from northwest Tasmania - who became a fiery environmental warrior, pitted against some of the most powerful business and political forces in the country. In it, Christine Milne tells her story through the objects that have symbolic meaning in both her personal and political life, from the butter pats in her kitchen that represent her journey from farm girl at Wesley Vale to environmental and human rights activist at the national and global level, to the Pride t-shirt she wore walking in Mardi Gras next to her son, after years of fighting for the legal reform of gay rights in Tasmania. She describes how politics actually works: the deals, the promises kept and broken, the horse-trading and treachery involved in some of the most controversial and difficult issues of our time, including the attempts to forge a workable and effective climate change policy for Australia, and Australia's treatment of refugees and asylum seekers. This is a fascinating insider's account of what it means to be a woman in politics: the sacrifices of family life and relationships, the relentless misogyny and sexism that must be endured, the gritty conviction that you must never, ever give up the pursuit of the greater good. It is the story of Australian politics and the fight to save the world, and essential reading for anyone who cares about either.

prime minister julia gillard speech: Julia 2010 Marian Simms, John Wanna, 2012-02-01 This book provides a comprehensive coverage of one of Australia's most historic elections, which produced a hung parliament and a carefully crafted minority government that remains a heartbeat away from collapse, as well as Australia's first elected woman Prime Minister and the Australian Greens' first lower house Member of Parliament. The volume considers the key contextual and possibly determining factors, such as: the role of leadership and ideology in the campaign; the importance of state and regional factors (was there evidence of the two or three speed economy at work?); and the role of policy areas and issues, including the environment, immigration, religion,

gender and industrial relations. Contributors utilise a wide range of sources and approaches to provide comprehensive insights into the campaign. This volume notably includes the perspectives of the major political groupings, the ALP, the Coalition and the Greens; and the data from the Australian Election Survey. Finally we conclude with a detailed analysis of those 17 days that it took to construct a minority party government.

prime minister julia gillard speech: Australia and India: Mapping the Journey Meg Gurry, 2015-02-18 Only rarely has India, home to one-sixth of the world's people, forced itself onto the maps constructed by Australian diplomats and politicians. In this book, Meg Gurry explores why this is so. *Australia and India: Mapping the Journey 1944-2014* traces the evolution of Australia's role from outpost of a decolonising British empire and junior member of an American military alliance, to engagement with the Asia-Pacific (without India), and onto partnership in a newly mapped Indo-Pacific region (with India). The story ends with the excitement and optimism engendered by the reciprocated prime ministerial state visits of Tony Abbott and Narendra Modi in 2014, which point, some argue, to a transformative moment for the bilateral relationship. Along the way, this study explores the obstacles—personal, political, geopolitical—to deeper relations. Based on years of research, the book provides a detailed study of the roles of key players in Australian diplomacy since the first High Commission was opened in New Delhi in 1944. Meg Gurry argues that the Australia-India connection—as well as having its own distinctive bilateral trajectory—can best be explained by locating it within the wider context of Australia's understanding of its regional identity, and by studying the changing maps that reflect the journey. prime minister julia gillard speech: Mentored to Perfection Simone Dennis, Alison Behie, 2022-05-23 *Mentored to Perfection: The Masculine Terms of Success in Academia* examines how mentoring programs between women tend to replicate the hierarchical relations of patriarchy that they are meant to dismantle. Simone Dennis and Alison Behie argue that, while paradigmatic mentoring programs look like networking support services for neophytes, these mentorships nevertheless replicate the very institutional structures they seek to uproot. The generosity that senior women show to junior women as they share their tips and offer their support ironically obscures participants' involvement in debt relations and the biases of replicating a particular type of success. This book considers the possibilities for disrupting our tendency to reproduce ourselves in the masculine terms of success.

prime minister julia gillard speech: Misogyny across Global Media Maria B. Marron, 2021-03-01 *Misogyny across Global Media* argues that, although women's experiences under misogyny are by no means universal, patriarchal social and institutional systems facilitate gender-based hostility across the globe. Contributors demonstrate how systemic misogyny and power inequities are at the root of women's suffering at the hands of misogyny, with consequences ranging from sexual harassment to rape and even murder. This book provides an interdisciplinary overview of systemic misogyny worldwide, analyzing specific cases such as the controversial Child Marriage Act in Bangladesh, sexual harassment in India's Bollywood culture, rape culture among military forces in Jammu and Kashmir, the murder of female students in Kenya, and femicide in Turkey. This collection discusses how misogyny creates a clash of cultures between men and women, the powerful and the oppressed, and the conservative and the liberal, and uncovers the evils that are perpetrated against women worldwide as a result of systemic misogyny. Scholars of gender studies, media studies, and cultural studies will find this book particularly useful.

prime minister julia gillard speech: Women Interrupting, Disrupting, and Revolutionizing Educational Policy and Practice Whitney Sherman Newcomb, Katherine Cumings Mansfield, 2014-06-01 The idea for this book was born from discussions at several recent academic events including the Women Leading Education (WLE) International Conference in Volos, Greece (2012) and the University Council for Educational Administration (UCEA) Conference in Pittsburgh, Pennsylvania (2011) as well as from informal dialogue amongst ourselves and various colleagues,

both new and veteran to the field of educational leadership and, in particular, dedicated to the study of women in leadership. At both the WLE Conference and the UCEA Conference, we heard frustration from veteran women in the field that the study of women in leadership is stagnant and has not moved forward in several years; with scholars new to the field continuing to write and publish work about barriers to aspiring and practicing women leaders (the same types of reports that began the formal inquiry into women's lives as leaders back in the 1980s) without being able to push forward with new information or ideas for change. In essence, the concerns and questions that were posed from some veteran women were: Why are we continuing to report the same things that we reported 30 years ago?; Why are we still talking about barriers to women in leadership?; and Why haven't we moved past gender binaries in regard to leadership ideas and practice? Considering these questions, some women new to the field countered with their own set of responses and questions that included: Is it not significant to report that some women are still experiencing the same types of barriers in leadership that were highlighted 30 years ago?; Is it accurate to report that all women's voices have now been heard/represented?; and How can we report something different if it hasn't happened? The discussions that have ensued between veteran women and those new to the field inspired us to develop a book that situates women in leadership exactly where we are today (and reports the status of girls who are positioned to continue the good fight that began many years ago) and that both highlights the changes that have occurred and reports any stagnancy that continues to threaten women's positionality in educational leadership literature, practice, and policy. It forefronts the voices of women educational scholars who have (and are) interrupting, disrupting, and revolutionizing educational policy and practice. Our book reports women's leadership activities and knowledge in both the k-12 and university settings and concludes with chapters ripe with ideas for pushing for change through policy, advocacy, and activism. The final chapter presents themes that emerged from the individual chapters and sets forth an agenda to move forward with the study of women in leadership.

prime minister julia gillard speech: The Women's Movement in Protest, Institutions and the Internet Sarah Maddison, Marian Sawyer, 2013-08-15 The death of feminism is regularly proclaimed in the West. Yet at the same time feminism has never had such an extensive presence, whether in international norms and institutions, or online in blogs and social networking campaigns. This book argues that the women's movement is not over; but rather social movement theory has led us to look in the wrong places. This book offers both methodological and theoretical innovations in the study of social movements, and analyses how the trajectories of protest activity and institution-building fit together. The rich empirical study, together with focused research on discursive activism, blogging, popular culture and advocacy networks, provides an extraordinary resource, showing how the women's movements can survive the highs and lows and adapt in unexpected ways. Expert contributors explore the ways in which the movement is continuing to work its way through institutions, and persists within submerged networks, cultural production and in everyday living, sustaining itself in non-receptive political environments and maintaining a discursive feminist space for generations to come. Set in a transnational perspective, this book traces the legacies of the Australian women's movement to the present day in protest, non-government organisations, government organisations, popular culture, the Internet and the Slut Walk. The Women's Movement in Protest, Institutions and the Internet will be of interest to international students and scholars of gender politics, gender studies, social movement studies and comparative politics.

prime minister julia gillard speech: *Dwellbeing* Claire Bradbury, 2021-10-21 In recent times, we have all questioned whether we feel truly nurtured by where we live. With 68 per cent of the world's population predicted to live in cities by 2050, *Dwellbeing* is a call to stand firm on the seven pillars we cherish and so desperately need from our city homes: wilderness, nourishment, movement, connection, dwelling, imagination and love. Claire Bradbury is the ultimate urban nomad: born in the South African bush, she has spent her life working and living in cities across the globe. As an environmentalist, sustainability expert and wellbeing advocate, she explores how we can change the story of our city homes to be about dwelling, rootedness and joy, rather than a relentless rat race. She has spoken to everyone from city dwellers, street artists and planners to chefs, DJs and architects around the world to unearth the everyday actions that have the power to enhance our lives. *Dwellbeing* celebrates the leaders, creators and urban heroes who are rewriting the script on urban living, helping us to make the shift from 'smart' to 'lovable' cities. This beautiful book shows that, when it comes to reimagining our urban futures, everyone has a voice.

prime minister julia gillard speech: *Abbott's Gambit* Carol Johnson, John Wanna, Hsu-Ann Lee, 2015-01-21 This book provides a truly comprehensive analysis of the 2013 federal election in Australia, which brought the conservative Abbott government to power, consigned the fractious Labor Party to the Opposition benches and ended the 'hung parliament' experiment of 2010-13 in which the Greens and three independents lent their support to form a minority Labor government. It charts the dynamics of this significant election and the twists and turns of the campaign itself against a backdrop of a very tumultuous period in Australian politics. Like the earlier federal election of 2010, the election of 2013 was an exercise in bipolar adversarial politics and was bitterly fought by the main protagonists. It was also characterised (again) by leadership changes on Labor's side as well as the entry of new political parties anxious to deny the major parties a clear mandate. Moreover, the 2013 election continued the trend whereby an increasing proportion of the electorate has chosen not to vote for one of the main two political parties. While the 2013 election delivered a clear victory to the Coalition in the Lower House, it simultaneously produced a much more mixed outcome in the Senate, where the Greens managed to record their largest ever representation and a new party, the Palmer United Party, initially secured three Senate positions at its first attempt (together with the election of Clive Palmer to a Queensland seat in the House of Representatives). With minor and micro parties also winning Senate seats amounting to a total of 18 Senators on the cross-benches, the Abbott government's ability to govern and pass legislation was placed in some doubt. The 2013 election result suggested that far from ending the preceding tumultuous period of Australian politics, it merely served to prolong this era indefinitely. The 2013 campaign was one of the longest on record, arguably commencing when the besieged Prime Minister Julia Gillard announced the date for the election in late January 2013 - then over seven months away. This unconventional tactic overshadowed the election from that date onwards - providing a definite timeline for Labor infighting, influencing the largely negative tactics of the Opposition, and encouraging new parties to proliferate to contest the election. This volume traces these formative influences on the campaign dynamics and explains the electoral outcome that occurred (including the 2014 re-election for the Western Australian Senate seats ordered by the High Court). *Abbott's Gambit* includes insightful contributions from academic experts, campaign directors and electoral watchers, political advisers and professional psephologists. Contributors utilise a wide range of sources and approaches, including the Australian Election Survey, to provide a detailed analysis of this important federal election.
