susan mary test naked: Lady Astronauts, Lady Engineers, and Naked Ladies Karin Hilck, 2019-07-08 The book *Lady Astronauts, Lady Engineers, and Naked Ladies* is a gender history of the American space community and by extension a social history of American society in the twentieth century during the Cold War. In order to expand and differentiate the prevalent postwar narrative about gender relations and cultural structures in the United States, the book analyzes several different groups of women interacting in different social spaces within the space community. It therewith grants insight into the several layers of female participation and agency in the community and the gender and race based obstacles and hurdles the female (prospective) astronauts, scientists, engineers, artists, administrators, writers, hostesses, secretaries, and wives were faced with at NASA and in the space industry. In each chapter a different social space within the space community is analyzed. The spaces where the women lived and worked are researched from a media, individual, and institutional angle, ultimately revealing the differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials. While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon, women had to deal with gender based barriers which were integral to the structures of the space community; just as they were an intrinsic component of all societal structures in the United States in the 1960s. The female space workers, who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis, still managed to assert themselves. They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency. Thus, the space community, a place of technological innovation, was not necessarily also a place of social innovation, but a community with a government agency at its center that mainly mirrored the current (changing) social order, conventions, and policies in the 1960s as well as in the 1970s and 1980s. Nevertheless, the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research. Thus, this systematic analysis of the connection between gender, space, and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century.

In the mid-seventies, there was growing concern that early decisions not to study mathematics in high school might be limiting the occupational options available to women. As part of a larger program on career development, the

Career Awareness Division of the Education and Work Group, then one of the major organizational units of the National Institute of Education (NIE), initiated a special research grants program on women and mathematics. Research information that would sort out the competing explanations for women's lower rate of participation seemed a useful contribution to debates about possible remedial actions. Should there be, for example, widespread development and implementation of programs designed to reduce mathematics anxiety? This volume represents the culmination of a research program with many contributions.

susan mary test naked: A View from the Bottom Tan Hoang Nguyen, 2014-07-29 *A View from the Bottom* offers a major critical reassessment of male effeminacy and its racialization in visual culture. Examining portrayals of Asian and Asian American men in Hollywood cinema, European art film, gay pornography, and experimental documentary, Nguyen Tan Hoang explores the cultural meanings that accrue to sexual positions. He shows how cultural fantasies around the position of the sexual bottom overdetermine and refract the meanings of race, gender, sexuality, and nationality in American culture in ways that both enable and constrain Asian masculinity. Challenging the association of bottoming with passivity and abjection, Nguyen suggests ways of thinking about the bottom position that afford agency and pleasure. A more capacious conception of bottomhood—as a sexual position, a social alliance, an affective bond, and an aesthetic form—has the potential to destabilize sexual, gender, and racial norms, suggesting an ethical mode of relation organized not around dominance and mastery but around the risk of vulnerability and shame. Thus reconceived, bottomhood as a critical category creates new possibilities for arousal, receptiveness, and recognition, and offers a new framework for analyzing sexual representations in cinema as well as understanding their relation to oppositional political projects.

Häberlen, 2023-10-05 'A rich and readable account of left-wing activism in the West and opposition to Soviet-style communism in the East' Katja Hoyer, *The Spectator* 'A dream, perhaps, but one that still sounds worth fighting for, even beautiful' Stuart Jeffries, *The Observer* 'An ambitious and masterly account of utopian protest in Europe ... Fast-paced, with an eye for telling detail and written with a light touch' Robert Gildea In post-war Europe, protest was everywhere. On both sides of the Iron Curtain, from Paris to Prague, Milan to Wroclaw, ordinary people took to the streets, fighting for a better world. Their efforts came to a head most dramatically in 1968 and 1989, when mass movements swept Europe and rewrote its history. In the decades between, Joachim C. Häberlen argues, new movements emerged that transformed the nature of protesting. Activism moved beyond traditional demonstrations, from squatting to staging 'happenings' and camping out at nuclear power plants. People protested in the way they dressed, the music they listened to, the lovers they slept with, the clubs where they danced all night. New movements were born, notably anti-racism, women's liberation, gay liberation, and environmentalism. And protest turned inward, as activists experimented with new ways of living and feeling, from communes to group therapy, in their efforts to live a better life in the here and now. Some of these struggles succeeded, others failed. But successful or not, their history provides a glimpse into roads not taken, into futures that did not happen. The stories in Häberlen's book invite us to imagine different futures; to struggle, to fail, and to try again. In a time when we are told that there are no alternatives, they show us that there could be another way.

susan mary test naked: Touch Laura U. Marks, *In Touch*, Laura U. Marks develops a critical approach more tactile than visual, an intensely physical and sensuous engagement with works of media art that enriches our understanding and experience of these works and of art itself. These critical, theoretical, and personal essays serve as a guide to developments in nonmainstream media art during the past ten years -- sexual representation debates, documentary ethics, the shift from analog to digital media, a new social obsession with smell. Marks takes up well-known artists like experimental filmmaker Ken Jacobs and mysterious animators the Brothers Quay, and introduces groundbreaking, lesser-known film, video, and digital artists. From this emerges a materialist theory -- an embodied, erotic relationship to art and to the world. Marks's approach leads to an appreciation of the works' mortal bodies: film's volatile emulsion, video's fragile magnetic base, crash-prone Net art; it also offers a productive alternative to the popular understanding of digital media as virtual and immaterial. Weaving a continuous fabric from philosophy, fiction, science, dreams, and intimate experience, *Touch* opens a new world of art media to readers.
