swot analysis example of a student: *Dynamic Assessment of Students' Academic Writing* Prithvi N. Shrestha, 2020-09-11 This book explores the application of an innovative assessment approach known as Dynamic Assessment (DA) to academic writing assessment, as developed within the Vygotskian sociocultural theory of learning. DA blends instruction with assessment by targeting and further developing students' Zone of Proximal Development (ZPD). The book presents the application of DA to assessing academic writing by developing a set of DA procedures for academic writing teachers. It further demonstrates the application of Hallidayan Systemic Functional Linguistics (SFL), combined with DA, to track undergraduate business management students' academic writing and conceptual development in distance education. This work extends previous DA studies in three key ways: i) it explicitly focuses on the construction of a macrogenre (whole text) as opposed to investigations of decontextualized language fragments, ii) it offers the first in-depth application of the powerful SFL tool to analyse students' academic writing to track their academic writing trajectory in DA research, and iii) it identifies a range of mediational strategies and consequently expands Poehner's (2005) framework of mediation typologies. *Dynamic Assessment of Students' Academic Writing* will be of great value to academic writing researchers and teachers, language assessment researchers and postgraduate students interested in academic writing, alternative assessment and formative feedback in higher education.

swot analysis example of a student: Motivating Online Students Through Effective Instructional Design Stottlemeyer, Diane, 2024-09-25 Motivation is a critical component in learning and achievement, as well as a driving force that pushes individuals to pursue and achieve their goals. In an educational context, motivation can be understood as the desire and action toward goal-oriented behavior, which can be either an intrinsic or extrinsic goal or both. Proper motivation causes a student to act in a positive manner, whether it be completing course work, exercising to get fit, or working towards career goals. Understanding and connecting this motivation can significantly enhance a learner's engagement and success in learning. *Motivating Online Students Through Effective Instructional Design* examines where educators can leverage an understanding of student motivation to inform the design of instruction. By considering students' needs, interests, and goals, instructional designers can create learning experiences that are engaging, relevant, and meaningful. In turn, this can enhance motivation and lead to improved learning outcomes. So, both motivation and instructional design play crucial roles in the educational process. Understanding these concepts and how they interact can help educators, academics, and policymakers create compelling and engaging learning experiences.

swot analysis example of a student: Strategic Management in Public Services Organizations Ewan Ferlie, Edoardo Ongaro, 2015-02-20 Strategic Management in Public Services

Organizations sets out to connect the two traditionally disparate academic literatures of public management and strategic management. The authors argue that some models of strategic management are now of enhanced relevance for contemporary public services organizations, especially when considering successive New Public Management reforms. This observation has important consequences for the requisite work practices, skills and knowledge bases of current public managers, as they are increasingly being asked to act as strategic as well as operational managers. Strategic Management in Public Services Organizations takes a strongly comparative and international perspective in addressing the fundamental issue of strategic management within diverse public administrative traditions. The impact of strategic management on the performance of public agencies is examined and it is argued that the appropriate use of strategic management models depends on the politico-administrative and cultural contexts of the public services organization in question, concluding that there is no single best way to strategically lead public organisations. This is an advanced textbook aimed at the postgraduate level, particularly students on MPAs and MBAs with a public sector option or MScs in Public Policy and Public Management.

swot analysis example of a student: Confronting Academic Mobbing in Higher Education: Personal Accounts and Administrative Action Crawford, Caroline M., 2019-09-27 Academic mobbing, a bullying behavior that targets a specific faculty member, is growing in higher education. It is a dangerous phenomenon that often attacks competent researchers and scholars who are ethical, outspoken in support of others, and normally reflect professional achievement that is coveted, resented, and perceived as intimidating by lesser faculty and administrators. Therefore, it is important to understand how academic mobbing begins, expands amongst faculty and administrators, is actually supported by faculty and administrators by either proactive efforts or actively ignoring, and results in a weakening of the higher education institution due to the reputation being detrimentally, and many times irreparably, impacted. Confronting Academic Mobbing in Higher Education: Personal Accounts and Administrative Action is an essential research publication that provides comprehensive research on the development of academic mobbing as a prevalent form of bullying within higher education and seeks to explore solutions and provide support for professionals currently dealing with this phenomenon. Highlighting a range of topics such as ethics, faculty outcomes, and narcissism, this book is ideal for higher education faculty, deans, department chairs, provosts, chancellors, university presidents, rectors, administrators, academicians, researchers, human resources faculty, policymakers, and academic leaders.
