Maintain Professional Boundaries

Limit hair braiding to appropriate times and settings, such as during recess or designated breaks. Avoid any actions that could be perceived as invasive or uncomfortable for students.

Use Clean and Safe Tools

Ensure that any hair accessories or tools used are clean and safe to prevent scalp irritation or infections. Hygiene is critical when handling students' hair.

Respect Individual Hair Types and Preferences

Recognize the diversity of hair textures and styles, and avoid imposing specific looks. Allow students to express their personal style preferences.

teacher braids students hair: *Teaching While Black* Pamela Lewis, 2016-03-16 Teaching should never be color-blind. In a world where many believe the best approach toward eradicating racism is to feign ignorance of our palpable physical differences, a few have led the movement toward convincing fellow educators not only to consider race but to use it as the very basis of their teaching. This is what education activist and writer Pamela Lewis has set upon to do in her compelling book, *Teaching While Black: A New Voice on Race and Education in New York City*. As the title suggests, embracing blackness in the classroom can be threatening to many and thus challenging to carry out in the present school system. Unapologetic and gritty, *Teaching While Black* offers an insightful, honest portrayal of Lewis's turbulent eleven-year relationship within the New York City public school system and her fight to survive in a profession that has undervalued her worth and her understanding of how children of color learn best. Tracing her educational journey with its roots in the North Bronx, Lewis paints a vivid, intimate picture of her battle to be heard in a system struggling to unlock the minds of the children it serves, while stifling the voices of teachers of color who hold the key. The reader gains full access to a perspective that has been virtually ignored since the No Child Left Behind Act, through which questions surrounding increased resignation rates by teachers of color and failing test scores can be answered. *Teaching While Black* is both a deeply personal narrative of a black woman's real-life experiences and a clarion call for culturally responsive teaching. Lewis fearlessly addresses the reality of toxic school culture head-on and gives readers an inside look at the inert bureaucracy, heavy-handed administrators, and ineffective approach to pedagogy that prevent inner-city kids from learning. At the heart of Lewis's moving narrative is her passion. Each chapter delves deeper into the author's conscious uncoupling from the current trends in public education that diminish proven remedies for academic underachievement, as observed from her own experiences as a teacher of students of color. *Teaching While Black* summons everyone to re-examine what good teaching looks like. Through a powerful vision, together with practical ideas and strategies for teachers navigating very difficult waters, Lewis delivers hope for the future of teaching and learning in inner-city schools.

I can't work with them. I can't get through to them. Just as you may have thought these things about your students, they, too, may have similar thoughts about you: She doesn't care about my education. He is not capable of understanding me. I can't work with her. I can't get through to him. teacher braids students hair: *Can I Teach That?* Suzanne Linder, Elizabeth Majerus, 2016-07-11 *Can I Teach That? Negotiating Taboo Language and Controversial Topics in the Language Arts Classroom* is a collection of stories, strategies, advice, and documents collected for teachers who are using or plan to use materials or implement policies they know may be controversial. It is for any teacher dedicated to engaging their students in the complex, challenging, and rewarding activities of reading and writing, for any teacher committed to speaking honestly with students. For any teacher, period. Because when we decide to work with young people, when we commit to sharing books and ideas that engage their hearts and minds, when we strive to get adolescents to think critically and write honestly, we open ourselves up to suspicion and critique from someone, somewhere, no matter how above reproach we feel our materials and strategies are. Few language arts teachers will experience a full-blown challenge to the content of their curriculum, but many may self-censor or suffer through awkward and challenging conversations with colleagues, administrators, parents, and other members of their community. This book is for those times when teachers are called on to defend and legitimize their use of controversial material in their classroom--material that they know reflects students' reality, even as it makes adults uncomfortable and fearful about their inability to protect children from that very reality.

teacher braids students hair: *Black Teachers of English(es) in Japan* Gregory Paul Glasgow, 2024-12-10 This book examines the pedagogical and professional experiences of a transnational group of teachers from the African continent and diaspora who made the decision to live and teach English in Japan. Through a layered analytical framework, it explores how these teachers struggle to negotiate their raciolinguistic identities in contexts that may prove to be professionally supportive in some cases but marginalizing in others. The author contends that

although multiculturalism and diversity within ELT in Japan may currently seem to be more prevalent, the agency that Black teachers exercise in promoting their own cultures and language varieties may be constrained depending on the characteristics of the institutions in which they teach. The issues raised in this volume will be relevant to educators, administrators, curriculum and materials developers, and researchers committed to promoting equity, racial harmony and intercultural understanding in language education.

teacher braids students hair: Teaching in the Terrordome Heather Kirn Lanier, 2012-10-01 Only 50 percent of kids growing up in poverty will earn a high school diploma. Just one in ten will graduate college. Compelled by these troubling statistics, Heather Kirn Lanier joined Teach For America (TFA), a program that thrusts eager but inexperienced college graduates into America's most impoverished areas to teach, asking them to do whatever is necessary to catch their disadvantaged kids up to the rest of the nation. With little more than a five-week teacher boot camp and the knowledge that David Simon referred to her future school as "The Terrordome," the altruistic and naïve Lanier devoted herself to attaining the program's goals but met obstacles on all fronts. The building itself was in such poor condition that tiles fell from the ceiling at random. Kids from the halls barged into classes all day, disrupting even the most carefully planned educational activities. In the middle of one lesson, a wandering student lit her classroom door on fire. Some colleagues, instantly suspicious of TFA's intentions, withheld their help and supplies. ("They think you're trying to 'save' the children," one teacher said.) And though high school students can be by definition resistant, in west Baltimore they threw eggs, slashed tires, and threatened teachers' lives. Within weeks, Lanier realized that the task she was charged with—achieving quantifiable gains in

her students' learning—would require something close to a miracle. Superbly written and timely, *Teaching in the Terrordome* casts an unflinching gaze on one of America's "dropout factory" high schools. Though Teach For America often touts its most successful teacher stories, Lanier's powerful memoir illuminates a more common experience of "Teaching For America" with thoughtful complexity, a poet's eye, and an engaging voice. As hard as Lanier worked to become a competent teacher, she found that in "The Terrordome", idealism wasn't enough. To persevere, she had to rely on grit, humility, a little comedy, and a willingness to look failure in the face. As she adjusted to a chaotic school administration, crumbling facilities, burned-out colleagues, and students who perceived their school for the failure it was, she gained perspective on the true state of the crisis TFA sets out to solve. Ultimately, she discovered that contrary to her intentions, survival in the so-called Charm City was a high expectation.

teacher braids students hair: *Savoring Alternative Food* Jessica Hayes-Conroy, 2014-09-19 Advocates of the alternative food movement often insist that food is our common ground – that through the very basic human need to eat, we all become entwined in a network of mutual solidarity. In this challenging book, the author explores the contradictions and shortcomings of alternative food activism by examining specific endeavours of the movement through various lenses of social difference – including class, race, gender, and age. While the solidarity adage has inspired many, it is shown that this has also had the unfortunate effect of promoting sameness over difference, eschewing inequities in an effort to focus on being together at the table. The author explores questions of who belongs at the table of alternative food, and who gets to decide what is eaten there; and what is at stake when alternative food practices become the model for what is right to eat? Case studies are presented based on fieldwork in two distinct loci of alternative food organizing: school gardens and slow food movements in Berkeley, California and rural Nova Scotia. The stories take social difference as a starting point, but they also focus specifically on the complexities of sensory experience – how material bodies take up social difference, both confirming and disrupting it, in the visceral processes of eating. Overall the book demonstrates the importance of moving beyond a promotion of universal shoulds of eating, and towards a practice of food activism that is more sensitive to issues of social and material difference.
