teacher happy birthday quotes: *Discussion-Based Online Teaching To Enhance Student Learning* Tisha Bender, 2023-07-03 The new edition of what is now considered a classic on online learning has been expanded by about a third to reflect new opportunities offered by social media, new insights and ideas derived from the author's teaching in the eight years since she wrote the first edition, as well as from extensive research in the latest literature. In particular, Tisha Bender investigates whether the existing paradigm of teaching and learning has been changed, not so much because of the advent of the Internet, but because of the potential divide between the expectations and practices of students who are "digital natives" of the digital revolution, and those of their teachers who are mostly "digital immigrants". She addresses the question: do we need to change the way we teach in order to reach and engage digital natives fruitfully and enjoyably in their education. This accessible and comprehensive book offers an engaging and practical approach to online teaching that is rooted in the author's experience and enthusiasm for creating a virtual environment that engages students and fosters their deep learning. This is a book for all educators and administrators in higher education, in any discipline, engaged in, or contemplating offering, online classes that involve discussion or collaborative learning. teacher happy birthday quotes: The Psychological Well-being of East Asian Youth

Chin-Chun Yi, 2012-10-12 The rapid social change in the East Asia has brought great research attention on the family, education and political impacts. The growth trajectory of the next generation is exposed to an entirely different context owing to the dual effects of traditional and modern values as well as practices. This book provides an overall picture of the developmental trajectory of Taiwanese youth as a typical example in the region. The time frame is set from early adolescence (13years old) to young adulthood (22year old). Individual psychological well-being in its broad definition will be used as the outcome indicator to reflect significant developmental processes during this important transitional life course. Benefitted from the rare panel datasets conducted from 2000-2009, this book has two major focuses: one is to explore the interplay among family, school and community with regard to their influence on the individual growth patterns; the other is to highlight the potential constraint and/or strength of the prevailing social norms and values shared among East Asian societies. To be specific, different chapters will describe and analyze the life chances and growth patterns among youth with different social capitals (including family SES, educational achievement, rural-urban residence, etc.). Their short-term versus long-term outcome, as indicated by various psychological well-being variables (e.g., depressive symptoms, deviant or problem behaviors, happiness, educational performance), will allow us to delineate the particular structural context that individual East Asian youth encounters and to offer constructive suggestions on family interaction, educational strategy as well as health related policies based on the scientific evidence. This book incorporates comparative reports from other East Asian societies, and from youth panel studies of Australia and the U.S.. The experience of their counter-part in the advanced societies will contribute to readers' understanding of the particular social situation that East Asian youth is embedded in the growth process. In addition, comparative perspective will enable the reader to contemplate on the potential future development of the affluent generation in the region. Since changing social structure occurred in the last few decades in the East Asia has suffered inadequate investigation in the realm of family, education and community, this book provides timely information to fill up the gap. Analyses of the valuable dataset from early adolescents to young adults will attract those who are interested in family researches, in youth studies, in panel data analyses, as well as in the social development in Taiwan and in East Asia.
