teacher incentive fund grant: Multidisciplinary Perspectives on Teacher Evaluation Morgaen Donaldson, 2020-11-26 In the wake of national interest in teacher evaluation, this book examines what we have learned about how and whether teacher evaluation holds teachers accountable and improves their practice. Drawing on literature in psychology, economics, and sociology, this multi-disciplinary and multi-perspectival book explores teacher evaluation's intended goals of development and accountability, as well as its unintended consequences, especially as they relate to equity. Blending theory from diverse disciplines with decades of research, this book provides new insights into how teacher evaluation has played out in schools across the United States and offers recommendations for research, policy, and practice in the years to come. Insights include how to embed teacher evaluation in a larger culture of continuous learning; rethinking assumptions on

accountability and development aims; and highlighting the importance of equity in the design, implementation, and outcomes of teacher evaluation. Every chapter concludes with practical recommendations informed by theory and research to guide policymakers, researchers, and district and school leaders as they seek to understand, design, and implement better teacher evaluation systems.

teacher incentive fund grant: *Ways to Evaluate the Success of Your Teacher Incentive Fund Project in Meeting TIF Goals* Anthony Milanowski, Matthew Finster, 2016 This brief outlines some simple methods that Teacher Incentive Fund grants could add to their local evaluations to find out how well they are promoting attainment of the four overall TIF goals. The methods described in this brief can help grantees determine if they are moving toward improving effectiveness, student achievement, and equity. Grantees can use simple comparisons over time and, in some cases, comparisons to external standards such as statewide or district-wide trends to see whether measures of the key TIF goals are at least moving in the right direction. Grantees can also use their TIF evaluations to collect information about whether the number of effective teachers teaching poor, minority, and disadvantaged students in hard-to-staff subjects has increased. Last, surveys, interviews, and focus groups done as part of TIF program evaluations provide an opportunity to assess the support of educators for sustaining performance-based compensation and other human capital management activities the TIF grant has supported. This information is also likely to be important when making a case for sustaining important elements of TIF and for deciding which elements should be priorities for sustainability efforts. Showing stakeholders how the TIF grant is achieving important goals not only adds to the knowledge base about performance-based compensation, but it also helps grantees build a case for sustaining important components of the TIF program.

teacher incentive fund grant: *Metrics, Standards and Alignment in Teacher Policy* Jessica Holloway, 2021-01-07 This book looks at the narrowing effects of contemporary modes of teacher and teaching policy and governance. It draws on political theory to provide new ways of

conceptualising the effects of teacher and teaching policies and practices. It adds a new dimension to the robust body of literature related to teacher policy by looking at three interrelated domains: (1) teacher preparation and development, (2) teacher evaluation and (3) teacher leadership. Drawing from case studies from the USA, UK and Australia, it illustrates how a coalescence around metrics, standards and compliance is producing increasingly restricted notions of teachers and teaching. It shows how the rationalities and techniques associated with accountability and standardisation are limiting the possibilities for multiple conceptualisations of teaching and teachers to exist or emerge. Using pluralism as the main framework, it challenges the dangers associated with rigid compliance and alignment and argues that pluralism can help secure schools as socially and culturally responsive to the needs of the community.
