teacher in hindi language: Teacher Quality and Education Policy in India Preeti Kumar, Alexander W. Wiseman, 2021-03-31 By drawing on quantitative data and qualitative analyses of five major national education policies implemented in India over the last 15 years, this comprehensive volume explores their impact on teacher quality and perceived effectiveness, explaining how this relates to variations in student performance. Responding to a national agenda to increase the quality of the Indian teacher workforce, *Teacher Quality and Education Policy in India* critically questions the application of human capital theory to Indian education policy. Chapters provide in-depth and strategically structured analyses of five national policies – including the recently approved National Education Policy (NEP) 2020 – to see how Indian policymakers use teacher quality as a driver and measurement of education and national economic development. Ultimately, the text offers evidence-based policy recommendations to improve teacher quality in India, suggesting that while all five policies have contributed significant frameworks and recommendations for teacher quality reform, they have failed to move beyond a symbolic function. Given its rigorous methodological approach, this book will be a valuable addition to the under-researched question of education policymaking in postcolonial contexts. It will be an indispensable resource not only for scholars working on policymaking in the Indian context, but also for those working at the intersection of education, teacher development, and policymaking in developing countries.

teacher in hindi language: A Learning Community of Reflective Teachers Neeraja Raghavan, 2024-02-06 Teachers possess a wealth of untapped wisdom and valuable experience. Be it educational policy, curriculum development or textbook selection, rare are the instances when teachers' views are solicited. Traditionally, teacher development has been driven by administrators of schools, and it often takes the form of a 'mentor' teaching the staff of a school. But what happens when teachers across different locations collaborate and learn together? This volume documents such an initiative, sparked off by the Covid-19 pandemic, which brought people together online. It showcases the power of teachers debating, discussing and learning from each other. Based on an Indian experience, this book addresses a range of issues that teachers and educators across the world face- encompassing pedagogy, classroom management, school culture and teacher development. A unique story of community building and teacher education, this book also contains key outcomes and insights, while taking us through their action research projects. It showcases a model of teacher development that can be adopted by interested readers anywhere in the world. Above all, it brings out the crying need for a teacher's voice to be heard - for far too long, teachers have been mere implementers of decisions taken by policymakers or managements of schools. By means of networking communities such as the one described in this book, the transformation of teachers going from whispers to resonance is greatly amplified. An important intervention in the domain of teacher development, this volume will be of great interest to students, researchers, educators, teacher educators and sociologists of education. It will also be useful for teacher trainees, academicians, policymakers, schoolteachers, curriculum developers, teacher training institutes and

universities offering teacher education programmes.
