teacher wish list amazon: Code Red Joseph R. Jones, Anna Dunlap Higgins-Harrell, Julie A. Little, 2024-06-06 In schools, a Code Red alert indicates a potential or immediate threat within a building or on a campus and is the signal for a full-scale lockdown of all classrooms. This book, Code Red: Conversations and Solutions for an Educational System in Crisis, presents a variety of voices from teachers, administrators, teacher preparation faculty, college supervisors, and pre-service teacher candidates. These voices are crying "Code Red" because they want a broken system repaired. For them, the system is bleeding, cancerous, and in turmoil, with the expectation that they work under arduous and often dangerous conditions; teachers are underpaid, devalued, exhausted, voiceless, and abused. They face an environment in which politics has replaced learning, students are failing and, in extreme circumstances, walking away from schools or even committing suicide. The political discourse is wresting control from teachers in certain states. Neurodivergent students are being pushed aside. The altruistic profession of teaching is being reduced to factory work, in

which teachers—especially those in their first five years of service—are leaving the profession at staggering rates. The profession itself is at risk of becoming obsolete. The contributors to Code Red believe that the American educational system has entered a moment of crisis. Their voices need to be heard, and their stories and lived experiences should be recognized. The adage is true: the answer to any problem resides with those who own the problem. We cannot create solutions without owning that these issues exist, and all of America owns the education of our children. Therefore, this book provides a dialogic space where everyone involved in the American educational system can reimagine the possibilities of our system and, through this process, begin creating positive and sustainable changes to bring our system out of crisis. In addition to providing a vivid picture of the current state of public schools, the book offers real solutions that can be used to produce healthier, more successful classrooms. It is an invaluable tool for instructors, pre-service teachers, and Colleges of Education administrators. Perfect for courses such as: Introductory Education; Undergraduate Social and Cultural Foundations of Education; Introductory Educational Leadership; Introductory Undergraduate Teacher Preparation; Graduate Foundations of Education; and Introductory MAT Graduate

teacher wish list amazon: Teaching Teachers James W. Fraser, Lauren Lefty, 2018-10-01 Teacher education in America has changed dramatically in the past thirty years—with major implications for how our kids are taught. As recently as 1990, if a person wanted to become a public school teacher in the United States, he or she needed to attend an accredited university education program. Less than three decades later, the variety of routes into teaching is staggering. In *Teaching Teachers*, education historians James W. Fraser and Lauren Lefty look at these alternative programs through the lens of the past. Fraser and Lefty explain how, beginning in 1986, an extraordinary range of new teaching programs emerged, most of which moved teacher education out of universities. In some school districts and charter schools, superintendents started their own teacher preparation programs—sometimes in conjunction with universities, sometimes not. Other teacher educators designed blended programs, creating collaboration between university teacher education programs and other parts of the university, linking with school districts and independent providers, and creating a range of novel options. Fraser and Lefty argue that three factors help explain this dramatic shift in how teachers are trained: an ethos that market forces were the solution to social problems; long-term dissatisfaction with the inadequacies of university-based teacher education; and the frustration of school superintendents with teachers themselves, who can seem both underprepared and too quick to challenge established policy. Surveying which programs are effective and which are not, this book also examines the impact of for-profit teacher training in the classroom. Casting light on the historical and social forces that led to the sea change in the ways American teachers are prepared, *Teaching Teachers* is a substantial and unbiased history of a controversial topic.

teacher wish list amazon: Searches Vauhini Vara, 2025-04-08 From the author of *The Immortal King Rao*, finalist for the Pulitzer Prize, a personal exploration of how technology companies have both fulfilled and exploited the human desire for understanding and connection. A MOST ANTICIPATED BOOK: *The New York Times*, *Esquire*, *Harper's Bazaar*, *Foreign Policy*, *Bustle*, *Alta*, *Ms. Magazine*, *Cultured*, *Denizen*, *Lit Hub*, *Book Riot*, and *Electric Literature* When it was released to the public in November 2022, ChatGPT awakened the world to a secretive project: teaching AI-powered machines to write. Its creators had a sweeping ambition—to build machines that could not only communicate, but could do all kinds of other activities, better than humans ever

could. But was this goal actually achievable? And if reached, would it lead to our liberation or our subjugation? Vauhini Vara, an award-winning tech journalist and editor, had long been grappling with these questions. In 2021, she asked a predecessor of ChatGPT to write about her sister's death, resulting in an essay that was both more moving and more disturbing than she could have imagined. It quickly went viral. The experience, revealing both the power and the danger of corporate-owned technologies, forced Vara to interrogate how these technologies have influenced her understanding of her self and the world around her, from discovering online chat rooms as a preteen, to using social media as the Wall Street Journal's first Facebook reporter, to asking ChatGPT for writing advice—while compelling her to add to the trove of human-created material exploited for corporations' financial gain. Interspersed throughout this investigation are her own Google searches, Amazon reviews, and the other raw material of internet life—including the viral AI experiment that started it all. Searches illuminates how technological capitalism is both shaping and exploiting human existence, while proposing that by harnessing the collective creativity that makes humans unique, we might imagine a freer, more empowered relationship with our machines and, ultimately, with one another.

teacher wish list amazon: *Theorising Personalised Education* Barbara Garrick, Donna Pendergast, David Geelan, 2016-10-11 This book examines the theoretical underpinning of the concept of personalised education and explores the question: What is personalised education in the contemporary higher education sector and how is it implemented? A broad, sophisticated definition of personalised learning has the potential to serve as a basis for more effective educational practices. The term 'personalised education' is, and continues to be, one with a variety of definitions. The authors' definition both incorporates earlier concepts of personalised education and critically reassesses them. The book then adds a further dimension: personalised instruction in electronically mediated environments, where the goal is to achieve learning towards mastery individually with the help of differentiated and individualised electronic learning platforms. This book assesses the various arguments concerning personalised education, examining each through the lens of educational theory and pedagogy and subsequently positing a number of qualitative characteristics of personalised education that have the potential to influence policy and practices in the higher education sector.
