teacher with student picture: Teacher-student Relationship and Its Impact on Student Unrest Subhas Chandra Ghose, 1989 Throw light upon the causes that contribute to the restlessness among students. Students are not to be blamed for their being restive and violent. They are the products of the situations in which they are being raised. They are what they are shaped to be. Since the ancient times an authoritarian tendency has characterised the attitudes of teachers among others in authority in educational institutions towards the students. Students have not had the necessary attention and affection. The most important of the causes stands out to be the absence of cordial teacher-student relationship plus the conducive educational and institutional environment. Recommendations It is interesting to note that a good teacher, even if he is not a good man, is more respected than a bad teacher who may be a good man. It is obvious, therefore, that professional excellency and commitment on the part of the teachers will go a long way to curb student unrest in our educational institutions. Dr. S.N. Ratha, Professor and Head, Post Graduate Department of Anthropology and Sociology, Sambalpur University, Orissa. ``The author has done his work critically and well. He has chosen a new parameter-Teacher-student Relationship'-in his study and is well taken. From authors like McCormack to Altbach, very few authors have explored this dimension of the problem except very tangentially. Mr. Ghose's is a full-length study on this dimension with all its ramifications. I congratulate the author for his painstaking and critical expose....." Bela Dutt Gupta, Professor of Sociology, Calcutta University, West Bengal. ``I recommend ..... for its originality and boldness. I think the results of this study be known to all teachers and educationists." Dr. N.C. Choudhary, Professor of Sociology and Social Anthropology, University of North Bengal. Review ``The findings are logically arrived at and cogently presented in a readable simple style. No doubt this book will be useful to all those who have interest in the areas of sociology, education, political sociology in general and to those who are interested in the problems affecting the youth in particular". teacher with student picture: Visual Data , 2009-01-01 The visual inputs we receive can be collectively called visual data. Precisely how one defines visual data is a key question to ask. That is one of the questions we asked each author who wrote a chapter for this book. If one comes to a decision with respect to what visual data are, then the next question becomes, "What are visual data like?" Then, "What do they mean?" As with any data, we can collect it and compile it, but if we don't have some way to bring meaning to it, it has little value to us. The answers may not be as straightforward as one might assume at the outset. The extent to which visual data permeates what we do as educators is such that it may be difficult to identify every discipline in which it emerges. In this book, we have tried to provide a forum for authors from a cross section of common disciplines: visual arts, English, literacy, mathematics, science, social science, and even higher education administration.

teacher with student picture: Teaching Students How to Use Self-Management Margaret E. King Sears, 2019-03-22 Self-management is a robust technique whereby students of all ages and ability levels learn how to control their learning and social behaviors. When students effectively self-manage, teachers spend more time on instruction and less time reminding students how to behave, which benefits teachers and students. Additionally, students learn independence when they self-manage. This guide presents a 10-step instructional sequence for teaching students three types of self-management: self-monitoring, self-evaluation, and self-reinforcement. Each type can be taught to a whole class, small groups, or individual students (grades K-12). Any type can be used with both learning and social behaviors. Through this simple 10-step process, students learn what self-management is, why to use it, how to apply it, and when to use it. Instruction includes role-playing, modeling, and demonstrating mastery during guided practice and in the actual setting. Instruction takes about one hour, spread across multiple sessions. After instruction, follow-up is necessary to reinforce students' use of self-management and confirm that accurate self-management occurs.

teacher with student picture: Teacher-Student Power Relations in Primary Schools in Hong Kong Mei-Yee Wong, 2014-12-11 This book examines, from a sociological perspective, teacher-student power relations in classroom learning and teaching. The case study consists of four Hong Kong primary schools—and sixteen classrooms therein—that were selected as research sites to explore the concept of teacher-student power relations. Observations, individual interviews, and document analysis were the main data collection methods employed. Wong provides the historical context for the issue of teacher-student power relationship by reviewing the traditional Chinese cultures and values, in particular the values of respect for authority and for teachers, and demonstrates the intermingling of Chinese and Western cultures in contemporary Hong Kong Chinese society. She reviews the major educational initiatives carried out in Hong Kong since the 1970s, showing how Western educational policies promoting student-centric teaching modes have encouraged changes in classroom culture. With reference to the observed seventy-three lessons, the study identified three patterns of teacher-student power relations—Teacher Domination, Relatively Balanced Opportunity for Power Sharing, and Student Self-Empowerment—each involving different degrees of power being exercised by teacher and students. The coexistence of these three power patterns and the two corresponding power situations (student empowerment and disempowerment) can be explained as the result of multileveled, intertwined interactions among six factors related to social culture, education policy, school and classroom contexts, and to the individual players concerned. The book thus contributes to the understanding of teacher-student power relations in the context of Hong Kong by proposing a theoretical framework that reflects local socio-cultural, educational, and school contexts.
