Hott, Pamela Williamson, 2024-10-02 Effective teaching starts with quality instruction that most students respond well to. teacher wish list amazon ideas: *Theorising Personalised Education* Barbara Garrick, Donna Pendergast, David Geelan, 2016-10-11 This book examines the theoretical underpinning of the concept of personalised education and explores the question: What is personalised education in the contemporary higher education sector and how is it implemented? A broad, sophisticated definition of personalised learning has the potential to serve as a basis for more effective educational practices. The term 'personalised education' is, and continues to be, one with a variety of definitions. The authors' definition both incorporates earlier concepts of personalised education and critically reassesses them. The book then adds a further dimension: personalised instruction in electronically mediated environments, where the goal is to achieve learning towards mastery individually with the help of differentiated and individualised electronic learning platforms. This book assesses the

various arguments concerning personalised education, examining each through the lens of educational theory and pedagogy and subsequently positing a number of qualitative characteristics of personalised education that have the potential to influence policy and practices in the higher education sector.

teacher wish list amazon ideas: *Independent Thinking on Nature-Based Learning* Alexia Barrable, 2022-09-30 Foreword by Ian Gilbert. At a time of unprecedented challenges in relation not only to the climate crisis but also to children's and adolescents' mental health, connecting to nature offers an accessible and desirable way forward for today's learners - especially those living in urban surroundings. Bringing together evidence from psychology, environmental science and education, Alexia aims to support teachers as they provide meaningful experiences rooted in learning about and through nature. The book can be used in two ways: to inspire individual sessions in nature, or to support teachers in building a cohesive outdoor-learning curriculum throughout the school. Featuring practical advice, case studies and discussion of original theory, the book aims to inspire, motivate and stimulate educators to engage with alternative approaches to teaching in the outdoors and with nature in mind - and in such a way that promotes students' learning and fosters a long-lasting relationship with nature. *Independent Thinking on Nature-Based Learning* shares case studies and examples of good practice from a variety of settings - ranging from kindergarten to secondary. Detailing the physical and psychological benefits of being outdoors, the book suggests ways to help build young people's connection with nature and support their autonomy in natural spaces. Alexia offers ideas on how to weave nature and the outdoors into the very fabric of the curriculum - for example, in relation to art, literature and technology. Suitable for teachers and outdoor-learning leaders in early years through to secondary schools. *Independent Thinking on Nature-Based Learning* is one of a number of books in the *Independent Thinking On* series from the award-winning Independent Thinking Press.

teacher wish list amazon ideas: *Mindful School Libraries* Wendy Stephens, 2021-02-01 Complement efforts in the classroom to work on social-emotional learning and understand the affective needs of young people in library settings. Given the national climate of anxiety and fear, climbing diagnoses of neurological difference, and overall sensitivity, fewer young people come to school able to self-soothe. Building on the work of Nel Noddings, Lynne Evarts, and Meghan Harper, this book focuses on the deliberation, quiet, and reflection sometimes described collectively as mindfulness. From breathing exercises to meditation, mindfulness exercises can be a coping mechanism for at-risk students, and librarians can create an environment, away from the classroom, in which students can explore their abilities to regulate and control their social and emotional responses, skills that underpin information retrieval and analysis. The role of school libraries in promoting mindfulness in the twenty-first century could parallel the quest for intellectual stimulation and self-improvement that informed the public libraries movement in the late nineteenth century. Providing practical suggestions for working in concert with classroom teachers, school counseling staff, and community partners, this guide will inform librarians' practice by increasing awareness of how to create a nurturing space for students in the school library.
