teacher wish list items: A Better Approach to Mobile Devices Susan Brooks-Young, 2015-11-19 Until now, the conversation around mobile devices in schools has been divided into two camps: those favoring 1:1 plans, in which each student is assigned a school-provided laptop or tablet, and supporters of Bring Your Own Device (BYOD) initiatives that shift the responsibility for providing and maintaining classroom mobile technology to students and their parents. In reality, argues classroom technology expert Susan Brooks-Young, it's a hybrid model of 1:1 and BYOD that best meets the needs of students, teachers, and schools. A Better Approach to Mobile Devices offers school and district leaders concise, practical advice on how to set up a hybrid mobile technology program or shift an existing 1:1 or BYOD program to the more flexible, cost-effective, equitable, and learning-focused hybrid approach. Drawing on current research and her own extensive experience, Brooks-Young makes the case for hybrid initiatives and then explores the five keys to successful implementation: connection to the curriculum, infrastructure and support, training and professional development, budget, and policies and procedures. The book closes with a checklist of action steps associated with each of the keys, giving administrators and their planning teams a clear path forward.

teacher wish list items: *Student Voice, Teacher Action Research and Classroom Improvement* Lisa M. Bell, Jill M. Aldridge, 2014-11-04 The issue of teacher quality is increasingly seen as being central to education policy development and this emphasis highlights the role teacher professional development plays in improving teacher effectiveness and the quality of learning in the classroom. This book describes a large-scale research program which investigated the feasibility of using student perceptual measures as the basis for teacher development and classroom improvement. The book describes how teachers' use of the student feedback, as part of an action-research process, was used to guide improvements to their respective classrooms which in turn provided them with increased opportunities for teacher development and growth. In addition to this, it reports the efforts of one school which purposefully linked the involvement of their teachers to their school improvement initiatives. This book would be of interest to a range of audiences including researchers, teachers and school leaders. Its attractions include its far-reaching implications for educational systems concerning the ways in which student feedback can be used to facilitate teacher development and growth. The book also reports the use of a multi-method research design in which quantitative and qualitative methods were successfully employed simultaneously within two concurrent and interrelated investigations.

teacher wish list items: *Do Teachers Wish to Be Agents of Change?* Allen Menlo, LeVerne Collet, 2015-04-27 This study surveyed principals and teachers in ten countries to compare principal and teacher attitudes toward the involvement of teachers in several change and development responsibilities. The participating countries were: Australia, Canada, China, Hungary, Israel, Japan, Netherlands, Singapore, South Africa, and United States. Each country administered mirror versions of a questionnaire to samples of at least 50 principals and at least 100 teachers. The questionnaires listed twenty items describing change responsibilities in which teachers might become involved. For each item, both principals and teachers assigned two teacher involvement ratings: their personal preference, and their estimate of the preference of their role counterpart. These involvement ratings produced four dependent variables: Principal Preferences, Principal Estimates, Teacher Preferences, and Teacher Estimates. For each variable, item responses were clustered to form index sub-scores that measured attitudes toward five education domains: Administration and Coordination, Human Relations, Teacher Support, Classroom Learning, and Evaluation. Systematic planned comparisons were conducted to determine the most important principal-teacher issues within and between countries, and how issues change across index domains. Typical results indicate low awareness of each other's aspirations and expectations. The first and last chapters of this book discuss the potential of teacher leaders to become agents of change within their own schools. Several social-psychological competencies are then described for these teachers in their work.
