technology companies in vancouver: The Thin Edge of Innovation Roger Hayter, Jerry Patchell, Kevin Rees, 2025-02-14 Aligned with global trends in post-industrialization, the economy of Metro Vancouver is changing, but along its own trajectory. The focus is shifting away from resource-based activities to local entrepreneurial initiatives across a remarkable range of industries, from software to craft beer, biopharmaceuticals to mountain bikes. This evolution is being shaped by local business and the city's location on the national and global periphery. The Thin Edge of Innovation focusses on the performance of signature businesses in these entrepreneurial sectors to grow and foster industrial clusters and integrate with the global economy. The contributors give a mixed report card to this economic transition. Within Metro Vancouver, innovation has stimulated economic diversification and promises to deliver high-income jobs. But this diversification has also been thinly spread and lacks deep local roots or dominant anchor companies. This constructive study examines the distinctive opportunities facing Metro Vancouver. Despite challenges, it reveals a region with undoubted potential for sustained, broadly beneficial local development

technology companies in vancouver: Vancouver'S Vengeance Barry Deane Stewart, 2013-07-03 In 1791, Captain George Vancouver is given a great opportunity to gain fame and fortunesail to the Pacific coast of North America and explore the coastline for the long-sought Northwest Passage back across the continent while taking possession of the vast territories of northwest America from the Spanish. Four years later, he returns home to dismissal and ridicule. He dies three years later at the age of forty, a sickly, impoverished man desperately trying to complete the publication of his journals. What happened? Now, there are two large collections of rare books related to the early exploration of northwestern America coming to auction, a major event in the modern world of antiquarian books. Many dealers and individual collectors are positioning themselves to be the successful bidders. The centerpiece of the auctions is a heretofore unknown, astonishing copy of the journals of George Vancouver printed over two hundred years ago. How much will it sell for? Is this, in some way, a vindication of Vancouver, maybe even his vengeance? The emergence of the special copy of Vancouvers journals causes President Ray Cartwright to re-examine the unique Sir Francis Drake document he bought years ago. Is it really legitimate? How can he find out? What should he do if its a fake?

technology companies in vancouver: The Capacity to Innovate Sarah Giest, 2021-04-07 In The Capacity to Innovate, Sarah Giest provides insight into the collaborative and absorptive capacities needed to provide public support to local innovation through cluster organizations. The book offers a detailed view of the vertical, multi-level, and horizontal dynamics in clusters and cluster policy and addresses how they are managed and supported. Using the biotechnology field as an example, Giest highlights challenges in the collaborative efforts of public bodies, private companies, and research institutes to establish a successful ecosystem of innovation in this sector. The book argues that cluster policy in collaboration with cluster organizations should focus on absorptive and collaborative capacity elements missing in the cluster context in order to improve performance. Currently, governments operate at different levels – from the local to the supranational – in order to support clusters, and cluster policies are often pursued alongside other programs, leading to uncoordinated efforts and ineffective cluster strategies. The Capacity to Innovate advocates for a coordinated effort by government and cluster organizations to support capacity elements lacking within the specific cluster context.

technology companies in vancouver: Vancouver Book of Everything Samantha Amara, 2008-08-15 The go-to book on Canada's west coast gem—from affordable activities to crime and punishment, slang to weather, people to politics, and much more. From "Gassy" Jack Deighton and the Klondike Gold Rush to the Chinese Head Tax to Japanese Internment, the Strathcona Protest, Vancouver Canucks and the 2010 Olympic Winter Games to profiles of the original "Dominic Da Vinci," Larry Campbell, famed author Douglas Coupland, and environmentalist David Suzuki, no book is more comprehensive than the Vancouver Book of Everything. No book is more fun. Well-known Vancouverites weigh in on every aspect of their beloved city. Historian Chuck Davis gives us his top five events that shaped its history; author Jen Sookfong Lee gives us her top five best things about living in Vancouver; Vancouver Sun restaurant critic Mia Stainsby gives us the city's top five cheap eats and Global TV's meteorologist, Mark Madryga, offers up his top five Vancouver weather events. From the city's First People and infamous weather to its slang, heinous crimes, and the ubiquitous Japa dog, it's all here. Whether you are a lifelong resident or visiting for the first time, there is no better resource about the city of Vancouver, you'll love the Vancouver Book

technology companies in vancouver: New Economic Spaces: New Economic Geographies James W. Harrington, Richard Le Heron, 2017-11-28 As a core volume in the Dynamics of Economic Space series, contributors from North America, Australasia, Europe and the Middle East each address the constitutive processes of new economic and institutional spaces and the theoretical, methodological and policy-engaging practices of emerging economic geographies. Together, they provide a timely and important overview of the current debates about the geographies of economic change. As national and regional economies change rapidly, so the frameworks, concepts and methods used to describe and analyse those processes also need to evolve. This volume puts forward a comprehensive analysis of a range of different and innovative means currently available, through which to view regional economic activities and interactions.

technology companies in vancouver: Knowledge Borders Kathrine E. Richardson, 2017-04-28 Key sections of the North American Free Trade Agreement (NAFTA) deal with temporary labor mobility. Ideally, NAFTA status provisions should make the temporary movement of professionals easier across the border of all NAFTA countries. However, in the case of some key sectors, it is arguably not the case. Within the context of recent literature on cross-border trade, city regions, regionalism, international labor mobility, and post-September 11 security measures, this book probes the dynamics of transitory immigration of 'knowledge-workers' between the North American west coast city regions of Vancouver, Seattle, and the greater San Francisco Bay and Silicon Valley area. This book includes in-depth interviews with Canadian and US immigration officials, immigration attorneys and executives and professional staff of new technology firms and Fortune 500 companies. It ultimately explores whether or not the Canada-US border is an impediment to the development of a cross-border high-tech clusters.

technology companies in vancouver: Canadian Film and Video Loren R. Lerner, 1997-01-01

This extensive bibliography and reference guide is an invaluable resource for researchers, practitioners, students, and anyone with an interest in Canadian film and video. With over 24,500 entries, of which 10,500 are annotated, it opens up the literature devoted to Canadian film and video, at last making it readily accessible to scholars and researchers. Drawing on both English and French sources, it identifies books, catalogues, government reports, theses, and periodical and newspaper articles from Canadian and non-Canadian publications from the first decade of the twentieth century to 1989. The work is bilingual; descriptive annotations are presented in the language(s) of the original publication. *Canadian Film and Video / Film et vidéo canadiens* provides an in-depth guide to the work of over 4000 individuals working in film and video and 5000 films and videos. The entries in Volume I cover topics such as film types, the role of government, laws and legislation, censorship, festivals and awards, production and distribution companies, education, cinema buildings, women and film, and video art. A major section covers filmmakers, video artists, cinematographers, actors, producers, and various other film people. Volume II presents an author index, a film and video title index, and a name and subject index. In the tradition of the highly acclaimed publication *Art and Architecture in Canada* these volumes fill a long-standing need for a comprehensive reference tool for Canadian film and video. This bibliography guides and supports the work of film historians and practitioners, media librarians and visual curators, students and researchers, and members of the general public with an interest in film and video.

technology companies in vancouver: The Future of Tech Is Female Douglas M Branson, 2018-07-10 "Technology has the worst record of promoting and retaining female executive...[This] book wanders through this paradox . . . to provide solutions. —Harvard Law Review Tech giants like Apple and Google are among the fastest growing companies in the world, leading innovations in design and development. The industry continues to see rapid growth, employing millions of people: in the US it is at the epicenter of the American economy. So why is it that only five percent of senior executives in the tech industry are female? Underrepresentation of women on boards of directors, in the C-suite, and as senior managers remains pervasive in this industry. As tech companies are plagued with high-profile claims of harassment and discrimination, and salary discrepancies for comparable work, what prevents women from reaching management roles, and, more importantly, what can be done to fix it? *The Future of Tech is Female* considers the paradoxes involved in women's ascent to leadership roles, suggesting industry-wide solutions to combat gender inequality. Drawing upon fifteen years of experience in the field, Douglas M. Branson traces the history of women in the information technology industry in order to identify solutions for the issues facing women today. Branson unpacks the plethora of reasons women should hold leadership roles, both in and out of this industry. An invaluable resource for anyone invested in gender equality in corporate governance, *The Future of Tech is Female* lays out the steps toward a more diverse future for women in tech leadership "[Branson] combines meticulous research and thorough documentation in a very readable, thought-provoking narrative." —Choice "A crucial book on a crucial subject." —Deborah Rhode, E.W.
