technical sergeant results 2024: Tuskegee Airmen Samuel de Korte, 2024-04-30 The history of 332nd Fighter Group, the only segregated Fighter Group that served in combat during the Second World War. During the Second World War, the Tuskegee Airmen had not one but two enemies to overcome: the German Luftwaffe and Jim Crow. In this book, the inspiring history of these men is recounted detailing the struggles the men faced at home and abroad. The Tuskegee Airmen were black American pilots who served in the Army Air Corps during the Second World War. However, before earning their wings, these men and women needed to prove themselves to their white countrymen. After all, the racism prevalent at the time meant that black Americans were deemed unsuitable for the demands of modern war. After completing their training and conducting their first combat missions, the real enemy was waiting for them: the Luftwaffe. As a result of their role escorting the bombers, as well as their bright red tails, the Tuskegee Airmen of 332nd Fighter Group earned the nickname the 'Red Tails'. The units served with distinction in several fierce engagements, such as the 99th Fighter Squadron, who fought in the skies over Anzio on 27 and 28 January 1944, and the 332nd Fighter Group, who earned a Distinguished Unit Citation for its mission to Berlin on 24 March 1945.

technical sergeant results 2024: *Just My Story A Slave of Destiny* John R. Simpson, Sr., 2024-06-18 Having worked for almost fifty years of my life and ultimately retiring from two separate careers, I found myself sitting at home, obsessed with the question, what do I do now? I watched numerous daily programs on TV. I knew I had to do something or risk the chance of just fading away. During these thought processes, I wondered back over my life, day in and day out. For some reason, I found it difficult to believe that I had accomplished so much in my life yet so little. I knew there was more to come. After stumbling upon some memories, which I thought were long forgotten, I just knew I had to put those thoughts to paper before they were forgotten again. Thus began three years of writing my life story, so much so that some publishers recommended I write two books. The motivation to write my life story was also a desire to leave my two children, five grandchildren, and now five great-grandchildren some semblance of not only my life story but that of our immediate ancestors. This book is my legacy in my own words, the way I saw it, for them and others who may be interested in the story of a little boy from Selma, Alabama.

technical sergeant results 2024: Homosexuality in the German Armed Forces Klaus Storkmann, 2024-12-30 Until 1979, homosexual men were systematically exempt from military service in the Bundeswehr. Although homosexuality alone was no longer a cause for being unfit for service, the principle applied to homosexual soldiers was: compulsory military service yes, career

no. In most cases, same-sex orientation made it impossible to become an officer. And it was classified as a security risk. It was not until 2000 that the Federal Ministry of Defense changed its course. Klaus Storkmann is the first to examine the Bundeswehr's handling of homosexual soldiers on the basis of interviews, court records and papers of the Federal Ministry of Defense. A comparison with other armed forces and the public service in the Federal Republic of Germany places the Bundeswehr actions in a larger context. The study proves that homosexuality has always been an issue in the military and continues to be so in many places; it is based on retrospective views on former German armed forces, in particular the National People's Army of the GDR, and includes side glances at armies of other states.

technical sergeant results 2024: A Spirit of Service John Norberg, 2024-12-01 A Spirit of Service: Purdue University and the United States Military is a richly illustrated, comprehensive look at the intersection of this great land-grant university and the US military since classes first began in 1874. Spearheaded by the Purdue University College of Engineering in recognition of its 150th anniversary, this book examines how Purdue Boilermakers have played a consequential role in defending democracy, freedom, and independence in times of war and great duress. Pioneering Purdue contributions include more than one hundred faculty working on the Manhattan Project, learning how to better cool machine gun barrels, and making radar practical—all during World War II—as well as the transition from vacuum tubes to semiconductors, Dorothy Stratton advancing the role of women in the military, the founding of the National Society of Black Engineers, the first School of Engineering Education, the first university airport, and, most famously, Neil Armstrong, a US Navy officer and Purdue alumnus, and the first human to set foot on the moon. Today Purdue is at the forefront of drones, hypersonics, energetics, artificial intelligence, space exploration, cybersecurity, semiconductors, and much more. In fact, approximately one-third of US spaceflights have included a Boilermaker astronaut, and many of those alumni served in the military. This large number of astronauts partially stems from a Purdue-Air Force Academy program to provide advanced degrees to graduating officers. A Spirit of Service tells the stories of men and women who lived this history, from ROTC students to a Medal of Honor recipient, from soldiers at the front during the Great War to a man who witnessed the December 7, 1941 attack on Pearl Harbor, from a pilot who led thousands of planes in bombing missions over Germany during World War II to military astronauts, from trailblazing female officers and pilots to twenty-first-century teachers and researchers who are creating the future. This volume records the stories of Purdue men and women whose patriotism, leadership, and heroism have preserved life, liberty, and the pursuit of happiness for generations of Americans—past, present, and future.

technical sergeant results 2024: Ethics and the Practice of Forensic Science Robin T. Bowen, 2024-03-08 Integrity and honesty are the hallmarks of science - and especially so in the case of forensic science - making the study and practice of ethics essential to the field. Ethics and the Practice of Forensic Science, Third Edition directly addresses common stressors that can induce, or lead professionals - working in forensic laboratories, law enforcement, the judicial system, and at crime scenes - to commit misconduct. While forensic scientists, investigators, and experts are intrinsically ethical by nature, the reality is that these individuals face challenges including departmental or political pressures, lack of training, and conflicting standards. The difference, however, is that the work done by forensic professionals has the ability to compromise another person's freedom, potentially leading to arrest, incarceration, and miscarriages of justice. Police and forensic professionals confront ethical dilemmas every day, some situations that fall within clear protocols or standards and others that frequently have no definitive answers. Ethics and the Practice of Forensic Science, Third Edition includes updated information and case studies, as well as recent research findings focused on ethics in forensic science. Chapters examine investigation and police culture through the lens of professional challenges, incorporating important information about the history of wrongful convictions, and including recent developments in overturned wrongful convictions, and the work of various innocence projects. Throughout the book, case examples of bias, ethical violations, and instances of tampering with evidence present the dangers of compromising one's ethical standards. Through such cases, the book sheds light on the problem and offers alternative courses of action - presenting examples of what to do, and what not to do, when faced with ethical decisions in gathering, handling, analyzing, and presenting evidence.
