who would win in a fight questions: *Bear v. Shark* Chris Bachelder, 2002-02-19 So it's kind of like a parlor game, then?... The question is apparently of Ancient Eastern extraction.... It seems to be a gut thing. The answer just feels right and then you come up with reasons.... Given a relatively level playing field -- i.e., water deep enough so that a Shark could maneuver proficiently, but shallow enough so that a Bear could stand and operate with its characteristic dexterity -- who would win in a fight between a Bear and a Shark? In this brilliant satire of our media-saturated culture, the sovereign nation of Las Vegas -- the entertainment capital of the world -- is host to *Bear v. Shark II*. After a disappointing loss in the first matchup between the land and the sea, the bear is back with a vengeance and out for blood. All of America is obsessed with the upcoming spectacle, so tickets are hard to come by. With an essay entitled *Bear v. Shark: A Reason to Live*, young Curtis Norman wins

a national writing contest and four tickets to the event. The Normans load up their SUV and embark on a road trip to Vegas. As they head cross-country, the family is besieged by a dizzying barrage of voices: television and radio personalities, public service announcements, bear and shark pundits, Freudians, theologians, and self-published authors, in addition to the Bear v. Shark fanatics, cultists, and resisters they meet at roadside gas stations and restaurants. Overwhelmed by factoids, statistics, and ten-second debates, the Normans -- along with the rest of country -- can't seem to get their facts straight, much less figure out a way to actually communicate with one another. Sound bites and verbal tics predominate; misheard, misunderstood, and just plain mistaken information is absorbed, mangled, and regurgitated to hilarious effect; and the most inane subjects -- from the disappearance of Dutch culture to the Shakespearean bias toward the bear -- are vigorously and obsessively debated. These meaningless exchanges of misinformation leave Mr. Norman disenchanted, world-weary, and ambivalent about the impending show, but the family eventually makes it to Vegas for an apocalyptic and surprisingly emotional ending. Written in quick, commercial-like segments that mirror the media it satirizes, Chris Bachelder's debut is a fiercely funny, razor-sharp novel about the odd intersection of zealotry and trivia, about the barriers to human connection in a society that values entertainment above all else. Through a clever act of novelistic subterfuge, Bachelder makes us laugh at our penchant for absurd and useless information while drawing us into a dazzling spectacle of his own imagination.

who would win in a fight questions: *21 Dog Years* Mike Daisey, 2002-06-17 Boy meets dot-com, boy falls for dot-com, boy flees dot-com in horror. So goes one of the most perversely hilarious love stories you will ever read, one that blends tech culture, hero worship, cat litter, Albanian economics, venture capitalism, and free bagels into a surreal cocktail of delusion. In 1998, when Amazon.com went to temp agencies to recruit people, they gave them a simple directive: send us your freaks. Mike Daisey -- slacker, onetime aesthetics major, dilettante -- seemed perfect for the job. His ascension from lowly temp to customer service representative to business development hustler over the course of twenty-one dog years is the stuff of both dreams and nightmares. With lunatic precision, Daisey describes the lightless cube farms in which book orders were scrawled on Post-its while technicians struggled to bring computers back online; the fourteen-hour days fueled by caffeine, fanaticism, and illicit day-trading from office desks made from doors; his strange compulsion to send free books to Norwegians; and the fevered insistence of BizDev higher-ups that the perfect business partner was Pets.com -- the now-extinct company that spent all its assets on a sock puppet. In these pages, you'll meet Warren, the cowboy of customer service, capable of verbally hog-tying even the most abusive customer; Amazon employee #5, a reclusive computer gamer worth a cool \$300 million, who spends at least six hours a day locked in his office killing goblins; and Jean-Michele, Mike's girlfriend and sparring partner, who tries to keep him grounded, even as dot-com mania seduces them both. At strategic intervals, the narrative is punctuated by hysterically honest letters to CEO Jeff Bezos -- missives that seem ripped from the collective unconscious of dot-com disciples the world over. *21 Dog Years* is an epic story of greed, self-deception, and heartbreak, a wickedly funny anthem to an era of bounteous stock options and boundless insanity.

who would win in a fight questions: Batman and the Multiplicity of Identity Jeffrey A. Brown, 2018-12-12 Concentrating primarily on contemporary depictions of Batman in the comic books, this book analyzes why Batman is so immensely popular right now in America and globally, and how the fictional Dark Knight reveals both new cultural concerns and longstanding beliefs about American values. The organizing premise is that while Batman is perceived as a very clearly defined character, he is open to a wide range of interpretations and depictions in the comics (what Henry Jenkins refers to as multiplicities), each of which allows access to different cultural issues. The idea of Batman functions as an anchoring point out of which multiple Batmen, or Batman-like characters, can occupy different positions: Grim Batman, Gay Batman, Female Batman, Black Batman, Cute Batman, and so on. Each iteration opens up a discussion of different cultural issues pertinent to modern society, such as sexuality, ethnicity, feminism and familial relationships.

who would win in a fight questions: Conditionality & Coercion Isabela Mares, Lauren E. Young, 2019-10-17 In many recent democracies, candidates compete for office using illegal strategies to influence voters. In Hungary and Romania, local actors including mayors and bureaucrats offer access to social policy benefits to voters who offer to support their preferred candidates, and they threaten others with the loss of a range of policy and private benefits for voting the wrong way. These quid pro quo exchanges are often called clientelism. How can politicians and

their accomplices get away with such illegal campaigning in otherwise democratic, competitive elections? When do they rely on the worst forms of clientelism that involve threatening voters and manipulating public benefits? *Conditionality and Coercion: Electoral Clientelism in Eastern Europe* uses a mixed method approach to understand how illegal forms of campaigning including vote buying and electoral coercion persist in two democratic countries in the European Union. It argues that we must disaggregate clientelistic strategies based on whether they use public or private resources, and whether they involve positive promises or negative threats and coercion. We document that the type of clientelistic strategies that candidates and brokers use varies systematically across localities based on their underlying social coalitions. We also show that voters assess and sanction different forms of clientelism in different ways. Voters glean information about politicians' personal characteristics and their policy preferences from the clientelistic strategies these candidates deploy. Most voters judge candidates who use clientelism harshly. So how does clientelism, including its most odious coercive forms, persist in democratic systems? This book suggests that politicians can get away with clientelism by using forms of it that are in line with the policy preferences of constituencies whose votes they need. Clientelistic and programmatic strategies are not as distinct as previous have argued. *Oxford Studies in Democratization* is a series for scholars and students of comparative politics and related disciplines. Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war. The geographical focus of the series is primarily Latin America, the Caribbean, Southern and Eastern Europe, and relevant experiences in Africa and Asia. The series editor is Laurence Whitehead, Senior Research Fellow, Nuffield College, University of Oxford.
