women s leadership conference: Women and Leadership around the World Faith Wambura Ngunjiri, Susan R. Madsen, Karen A. Longman, Cynthia Cherrey, 2015-07-01 Women and Leadership around the World is the third volume in a new series of books (Women and Leadership: Research, Theory, and Practice) that will be now being published to inform leadership scholars and practitioners. The purpose of this volume is to explore areas of women's leadership in four regions around the world: the Middle East, Europe, North America, and Asia Pacific. Hence, we have included 14 chapters that cover a wide range of important topics relevant to women and leadership within specific contexts around the world. Our goal for this volume is to provide readers with explorations of women's experiences as leaders, including recent research studies, analysis and interpretation of statistics unpacking the status of women in various sectors and countries, stories of influential women leaders with national or local spheres of influence, and including recommendations for positive change to increase women's access to positions of authority. The volume contributors use various theories and conceptualizations to problematize, historicize, and analyze women's limited access to power, and their agency as leaders from the grassroots to the national scene, from education to non-profits and business organizations. Overall, the book contributes interpretations of the status of women in various countries, presenting the stories behind the numbers and statistics and uncovering not only challenges but also opportunities for resiliency and effectiveness as leaders. The authors offer recommendations for change that cross national boundaries, such as structural changes in organizations that would open the door for more women to access positions of authority and be effective as leaders. It is rare to find a book with such a diverse array of topics and countries, making this a timely contribution to the literature on women and leadership. The authors remind us to continue to expand the literature base on women and leadership, drawing from both qualitative and quantitative studies as well as conceptual explorations of women as leaders in different countries, regions, indigenous communities, and across different

sectors. The more we know, the better informed will be our efforts to create appropriate leadership development activities and experiences for emerging women leaders and girls around the world. This book contributes significantly to that very effort.

Next, scholars discuss novel research that can guide women in navigating their journeys to leadership, including on followership, competition, representation of women in politics, and the role of biology in leadership. This must-have volume offers cutting-edge perspectives and a guide for women to navigate their own journeys to impactful leadership.

women s leadership conference: Women and Leadership Genevieve Brown, Beverly J. Irby, 2001 While our culture aids and encourages men in their achievement, women are often discouraged. Women as a group have not been as successful as men in the fields which have traditionally been assigned achievement value. Common internal barriers for women include low confidence, perceived lack of advancement opportunities, poor self-image, and weak determination and motivation. Coupled with difficult experiences, such barriers can persuade some women to relinquish their aspirations for a career in administration. In various ways, both subtle and direct, our culture discourages women from expressing their intelligence. For some who weather the

difficulties, the results can be highly confirming and motivating. As women strive to achieve professional success and recognition, they still feel societal pressure to assume more conventional roles. Although cultural sexism is a consistent theme in these women's stories, so are strength, determination and inspiration.

women s leadership conference: Young Women and Leadership Katrina Lee-Koo, Lesley Pruitt, 2020-04-07 Through a range of case studies in Asia and the Pacific, this edited collection highlights the extent of the unique ways in which young women lead to create change in their own lives and their communities, as well as in the structures, cultures, and institutions in which they live and work. This volume challenges and reshapes the boundaries and relationships of power that animate traditional attitudes to leadership by exploring the often overlooked role of women as leaders and drivers of social change. The text draws on a number of complex case studies in Asia and the Pacific in order to demonstrate how young women around the world have developed organised approaches to leadership that are often collective, collaborative, and transformative. However, as the authors reveal, they also deviate from traditional forms of leadership that have dominated the literature and public understanding. This book will be of interest to students and scholars of the theory and/or practice of leadership. More broadly, it will also be useful for students and scholars of political science, international studies, peace and conflict studies, international and community development, leadership studies, cultural studies, youth studies, and gender studies.

women s leadership conference: Recognizing Women's Leadership Tiffani Lennon, 2014-08-26 According to recent data on women leaders across all major sectors in the United States, women are outperforming men but earning less and still hitting the glass ceiling. This book uncovers the best practices to remedy these inequities, optimize performance, and benefit both genders. In compiling and analyzing 2011-2012 data on women leaders across all major sectors in the United States, author Tiffani Lennon, JD, uncovered proof that women are outperforming men—yet salaries and positional leadership roles are disproportionate to the performance and accomplishments of women in nearly all sectors. *Recognizing Women's Leadership: Strategies and Best Practices for Employing Excellence* presents a comprehensive look at agencies and organizations with the smallest pay gap and the largest percentage of female positional leaders to reveal best practices and strategies that ensure gender parity and optimal business performance, including impact, revenue, and efficacy. The study examined in this book included approximately 1,500 for-profit companies, not-for-profit businesses, and other organizations and associations throughout the country to establish the number of women leaders among the top echelon in each industry. Researchers also calculated leadership performance by identifying the frequency with which women received industry distinctions and awards, were top revenue generators, and achieved best-sellers list status, among other sector-specific criteria. The ramifications of the study's findings portend the future of the United States as a global competitor and as such need to be part of the public discourse surrounding the state of the American economy.

women s leadership conference: Faith in America Charles H. Lippy, 2006-09-30 Over the last 25 years, there has been much talk of the presumed decline in religious participation in America. In addition, from the 1960s on, surveys that mark the influence of religion in American life have shown a mixed response. Many suggest that religion is losing influence in the culture as a

whole; others indicate that while organized religion may be experiencing challenges, spirituality is on the upswing. At the same time, however, there have been signs that religious life in the U.S. is extraordinarily healthy. But religion in America has changed, to be sure, in a number of ways. And it has changed us and our culture in return. This timely set looks at the major forces that are changing the shape of religion in American life. With an influx of immigrants from Asia, Latin America, and other regions, the diversity of religion has grown to include Buddhism, Hinduism, Islam, and other faiths. Latin American and African American communities have experienced changes in the ways they practice their faith and in turn influence American culture in general. Women have entered the clergy in record numbers, and the push for allowing women and gays to enter the clergy in religions that limit or prohibit their roles is on the increase. In addition, gay couples are leading the same-sex marriage movement, and other social issues such as abortion, stem-cell research, end of life care, etc., are still being debated. Interest over how people actually live out their religion or spirituality has mushroomed in recent decades, thanks in part to the information revolution and popular culture. What folks do when they gather together to worship, and where they come together, has changed dramatically with the advent of the Internet and the role of sports in American life. So much has changed, and faith in America has become more important than ever—as part of our culture, our way of life, and the way we relate to each other and the world around us. The essays found in these pages shed light on our understanding of these transformations and help us comprehend the enormous role of religion in our society and in our world.

women s leadership conference: *Women, Religion and Leadership* Barbara Denison, 2017-07-28 *Women, Religion and Leadership* focuses on women from the traditional context of women as leaders with chapters observing various aspects of leadership from specifically chosen religious female leaders and going on to examine the legacies they leave behind. This book seeks to identify and analyse the gendered issues underlying the structural lack of recognition for women within the church and to examine the culturally constructed narratives related to these women for evidence of their leadership despite the exclusionary rules applied to force their submission to the dominating forces. Finally this book intends to draw out of these women's stories the various lessons of leadership that invoke current relevancies among prevailing leadership paradigms. Written by experts from disciplines as varied as leadership and communication studies to sociology, and history to medievalist and English scholars; *Women, Religion and Leadership* will prove key reading for scholars, academics and researchers in these and related disciplines.

women s leadership conference: *Towards a New Understanding of Masculine Habitus and Women and Leadership in Public Relations* Martina Topić, 2022-09-30 This edited volume analyses leadership in the public relations (PR) industry with a specific focus on women and their leadership styles. It looks at how women lead, the influence of the socialisation process on leadership styles, the difference between feminine and masculine leadership styles, and the impact of leadership style on career opportunities for women. The book features case studies exploring leadership in PR around the world in an attempt to answer a central research question: is there a masculine habitus in the PR industry despite the rise of women in PR? The authors of each chapter conducted original research on women working in PR within their own country and provide original insights into the position of women in a feminised industry, as well as proposing new and original theoretical frameworks for future research. Written for scholars, researchers and students of PR and communication, this book will also be of interest to those studying gender studies, leadership and organisational analysis, and sociology.

women s leadership conference: *Policy Discourses, Gender, and Education* Elizabeth J. Allan, 2008 Despite over thirty years of activism and legislation to eliminate discrimination, parity has yet to be achieved for women in academe. This book describes policy discourse analysis as a framework for considering how those involved in policy-making efforts may make use of discourses that inadvertently undermine the intended effect of the policies they set forth. Allan illustrates the methods of policy discourse analysis by describing their use in a study of twenty-one women's commission reports. In so doing, she highlights the important work of university women's

commissions while uncovering policy silences and making visible the powerful discourses framing gender equity policy initiatives in higher education. Her findings reveals how dominant discourses of femininity, access, professionalism, race, and sexuality contribute to constructing women's status in complex and at times, contradictory ways. This important volume will interest researchers across a number of disciplines including policy studies, educational leadership, higher education and cultural studies of education.
