women s leadership camp goldman sachs: *Scandalous Economics* Aida A. Hozic, Jacqui True, 2016-03-10 Of all of the lies, fragile alliances, and predatory financial dealings that have been revealed in the wake of the Global Financial Crisis of 2008, we have yet to come to terms with the ways in which structural inequalities around gender and race factor into (and indeed make possible) the current economic order. *Scandalous Economics* is about silences - the astonishing neglect of gender and race in explanations of the Global Financial Crisis. But, it is also about noises - the sexual scandals and gendered austerity policies that have relegated public debate, and the crisis itself, into political oblivion. While feminist economists and movements such as Occupy Wall Street have pointed to the distributional inequalities that are an effect of financial deregulation, scholars haven't really grappled with the representational inequalities inherent in the way we view the politics of the market. For example, capitalism won't be made more equitable simply by appointing women to leadership positions within financial firms or corporations. And the next crisis will not be averted if our understandings of gendered inequalities are framed by sexual scandals in media and popular culture. We need to look at the activities and the privileges of the advantaged - the TED women of the crisis -- as much as the victimization of the disadvantaged - to fully grasp the interplay between gender and economy in this fragile age of restoration. *Scandalous Economics* breaks new ground by doing precisely this. It argues that normalization of the post-GFC economic order in the face of its obvious breakdown(s) has been facilitated by co-optation of feminist and queer perspectives into national and international responses to the crisis. *Scandalous Economics* builds upon the Occupy movement and other critical analysis of the GFC to comprehensively examine gendered material, ideational and representational dimensions that have served to make the crisis and its effects, 'the new normal' in Europe and America as well as Latin America and Asia.

women s leadership camp goldman sachs: *A Global Idea* Maysoun Sukarieh, 2023-08-15 *A Global Idea* outlines how youth—as shown by the Arab Spring uprisings and subsequent state responses—became a prominent social and political category during the first two decades of the twenty-first century in the Middle East. Drawing on ethnographic fieldwork, interview data, and textual analysis, Maysoun Sukarieh explains that the spread of youth as an important category is linked to the operation of a global youth development complex, a diverse transnational network of state, private sector, civil society, and international development aid organizations that worked through key urban areas such as Washington, DC, Amman, and Dubai. In its analysis of the arrival, extension, and embedding of the youth development complex in the Middle East during this period, *A Global Idea* addresses a broader question that is of global and not just regional concern. How are certain ideas that are central to the working and reproduction of global capitalism able to travel the world so that they are found virtually everywhere?

women s leadership camp goldman sachs: Human Capital in Gender and Development

Sydney Calkin, 2018-05-11 *Human Capital in Gender and Development* addresses timely feminist debates about the relationship between feminism, neoliberalism, and international development. The book engages with human capital theory, a labour economics theory associated with the Chicago School that now animates a wide range of political and economic governance. The book argues that human capital theory has been instrumental in constructing an economistic vision of gender equality as a tool for economic growth, and girls and women of the global South as the quintessential entrepreneurs of the post-global financial crisis era. The book's critique of human capital theory and its role in Gender and Development gives insights into the kinds of development interventions that typify the 'Gender Equality as Smart Economics' agenda of the World Bank and other international development institutions. From the World Bank, to NGOs, and private businesses, discourses about the economic benefits of gender equality and women's empowerment underpin a range of development interventions that aim to unlock the 'untapped' potential of the world's women. Its implications are both conceptual and material, producing more interventionist forms of development governance, increased power by private sector actors in development, and de-politicization of gender equality issues. *Human Capital in Gender and Development* will be of particular interest to feminist scholars in Politics, International Relations, Development Studies, and Human Geography. It will also be a useful resource for teaching key debates about feminism, neoliberalism, and international development.

Developing Countries Colin Latchem, 2018-01-29 This book is the first comprehensive account of developments in open and distance non-formal education in developing countries for over more than 20 years. It includes many instructive and inspiring examples of how international agencies such as UNESCO, FAO, WHO, UNICEF, USAID and the Commonwealth of Learning and national providers are using radio, TV, online and mobile learning, telecentres and other means to achieve the Education for All, Millennium Development and Sustainable Development Goals. It describes the educational needs of the world's most disadvantaged, vulnerable and least formally educated children, youth and adult populations, including the disabled, refugees and prisoners. It also reports on the successes, outcomes, constraints and shortcomings of using open and distance methods and technology to deliver literacy and numeracy programmes, equivalency, 'second chance' or alternative schooling, life skills and rural community development programmes and income generation and vocational training outside the framework of the formal education system. It concludes with suggestions for the extension and improvement of such lifelong learning. Designed to encourage further research and development in these capacity-building practices outside the established formal system, this is a must-read for all policy-makers, managers, educators, students and researchers interested in non-formal education for individuals, families and communities in the

women s leadership camp goldman sachs: Women Leadership in Emerging Markets Shireen Chengadu, Caren Scheepers, 2017-07-06 This book focuses on the increase in female leadership over the last fifty years, and the concrete benefits and challenges this leads to in organizations. It moves beyond the typical focus on developed, Western contexts and answers the call for research on how women in emerging markets rise above the proverbial "glass ceiling". The authors integrate two underdeveloped topics that are highly relevant to modern business: women in leadership roles, and women in emerging markets. They examine how women leaders in a range of professional services—including accounting, consulting, law, engineering and medicine—have managed to navigate their careers while considering the role emerging markets play in their work. Based on cutting-edge research, the topics are brought to life through examples and profiles of leading women across Africa, the Middle East and the Far East. These narratives, told in the leaders' own words, are key to understanding women's achievements and the barriers they face. Students of leadership, diversity, gender studies, and human resource management will learn much from this insightful book.
