women in leadership conferences: *Women and Leadership in Higher Education* Karen A. Longman, Susan R. Madsen, 2014-09-01 *Women and Leadership in Higher Education* is the first volume in a new series of books (*Women and Leadership: Research, Theory, and Practice*) that will be published in upcoming years to inform leadership scholars and practitioners. This book links theory, research, and practice of women's leadership in various higher education contexts and offers suggestions for future leadership development strategies. This volume focuses on the field of higher education, particularly within the context of the United States—a sector that serves a majority of students at all degree levels who are women, yet lacks parity by women in senior leadership roles. The book's fifteen chapters present both hard facts regarding the current demographic realities within higher education and fresh thinking about how progress can and must be made in order for U.S. higher education to benefit from the perspectives of women at the senior leadership table. The book's opening section provides data and analysis in addressing "The State of Women and Leadership in Higher Education"; the second section offers descriptions of three effective models for women's leadership development at the national and institutional levels; the third section draws from recent research to present "Women's Experiences and Contributions in Higher Education Leadership." The book concludes with five shorter chapters written by current and former college and university presidents who offer "Lessons from the Trenches" for the benefit of those who follow. In short, the thesis of the book is that our world is changing; higher education collectively, as well as institutions of all types, must change. Bringing more women into leadership is critical to the goal of moving our society and world forward in healthier ways.

women in leadership conferences: Black Female Leaders in Academia: Eliminating the Glass Ceiling With Efficacy, Exuberance, and Excellence Butcher, Jennifer T., 2022-06-24 Discussions surrounding the bias and discrimination against women in business have become paramount within the past few years. From wage gaps to a lack of female board members and leaders, various inequities have surfaced that are leading to calls for change. This is especially true of Black women in academia who constantly face the glass ceiling. The glass ceiling represents the metaphor for prejudice and discrimination that women may experience in the attainment of leadership positions. The glass ceiling is a barrier so subtle yet transparent and strong that it prevents women from moving up. There is a need to study the trajectory of Black females in academia specifically from faculty to leadership positions and their navigation of systemic roadblocks encountered along their quest to success. *Black Female Leaders in Academia: Eliminating the Glass Ceiling With Efficacy, Exuberance, and Excellence* features full-length chapters authored by leading experts offering an in-depth description of topics related to the trajectory of Black female leaders in higher education. It provides evidence-based practices to promote excellence among Black females in academic leadership positions. The book informs higher education top-level administration, policy experts, and aspiring leaders on how to best create, cultivate, and maintain a culture of Black female excellence in higher education settings. Covering topics such as barriers to career advancement, the power of transgression, and role stressors, this premier reference source is an essential resource for faculty and administrators of higher education, librarians, policymakers, students of higher education, researchers, and academicians.

women in leadership conferences: **The Pentecostal Gender Paradox** Joseph Lee Dutko, 2023-11-16 The distinct subjects of eschatology and gender equality have seen an explosion of interest in recent decades, particularly within Pentecostal scholarship. Pentecostalism is regarded ideally as both an eschatological and egalitarian movement. However, many Pentecostals have lamented the inconsistency between the early egalitarian impulse of the movement and its current restrictive practices. This situation has been described as the so-called Pentecostal "gender paradox," referring to the conflicting freedoms and limitations experienced by Pentecostal women. Pentecostals have also recognized the waning eschatological fervor within the movement and its shifting eschatological convictions, leading to calls to rediscover the eschatological heart of the movement. Despite the renewed interest in both eschatology and women's equality, little research has been done to put these two areas into conversation with each other: eschatological convictions are often absent in the debate on gender roles in the church. For Pentecostals, eschatology has often been about urgency in "saving souls" rather than attending to social issues, but could Pentecostal eschatology be the key to (re)discovering greater equality for women in the church? Is the waning of both eschatology and women's equality within Pentecostalism potentially interrelated? For over one hundred years the role of women in Pentecostalism has been debated without a firm consensus. By examining gender solely through an eschatological lens in history, Scripture, and praxis, this work provides a valuable and creative contribution to one of the most important theological and global issues of our time, women's (in)equality. This book is also one of the first comprehensive studies to approach a single social issue solely through an eschatological lens and to provide attention to developing a thorough and methodologically connected eschatological praxis. By uncovering the unified eschatological-egalitarian narrative thread within both the Pentecostal and biblical story, this work suggests that the present end of women's inequality begins with fidelity to the future eschaton of gender equality.
