women s leadership symposium: *Communicative Understandings of Women's Leadership Development* Elesha L. Ruminski, Annette Holba, 2012-01-01 Communicative Understandings of Women's Leadership Development: From Ceilings of Glass to Labyrinth Paths, edited by Elesha L. Ruminski and Annette M. Holba, intertwines the disciplines of communication studies, leadership studies, and women's studies to offer theoretical and practical reflection about women's leadership development in academic, organizational, and political contexts. Women's leadership development exists at the intersection of consciousness-raising, communication competence, and education to increase one's knowledge and practice of leadership, which makes the weaving together of these three disciplines important. Thus, Communicative Understandings of Women's Leadership Development claims a space for women's leadership studies and acknowledges the paradigmatic shift from discussing women's leadership using the glass ceiling phenomenon to what Eagly and Carli (2007) identify as the labyrinth of leadership. Recognizing this metaphoric shift is crucial because many women now develop leadership amid the postmodern flux of organizational change; hierarchical, top-down systems are being eroded in lieu of transformational, collaborative, even improvisational leadership processes. Women's leadership studies is emerging as a fruitful interdisciplinary area that reframes the debate about whether we live, work, and learn within a third-wave feminist or post-feminist context. While this area might include feminist theorizing, it also might not emphasize such epistemologies. For this reason, Ruminski and Holba's edited collection explores and highlights a variety of feminist and non-feminist intersections, and is thus an important and timely contribution to both marking where we are with women's leadership development in higher education and how women can further develop themselves as leaders.

women s leadership symposium: *Women in Sports* Maylon Hanold, 2018-03-22 Providing key data, insights, and ways of thinking about women and sports, this book is an excellent resource for high school and undergraduate students as well as for sport organizations serving girls and women. Women are participating in sports in record numbers, and thanks in part to Title IX and a growing interest in women's sports, they're breaking records and achieving remarkable success in sports in every conceivable manner. However, women still struggle for equitable treatment in a variety of sports and face different obstacles than do their male counterparts. How can these issues be solved? Are women in sports being treated fairly? This book provides a comprehensive yet accessible overview of the state of women's participation in sports by referencing both current events and research. Additionally, it offers a breadth of information pertaining to work in sports made available to girls and women. Key aspects include a detailed history of women in sports since 1900 as well as a discussion of current issues surrounding their participation in high school and college athletics, recreational sports, physical activity, and leadership in sports organizations. In particular, the material not only recounts history and analyzes issues but also presents perspectives as to how and why sports continue to be simultaneously a means of empowerment and a conduit for the marginalization of girls and women.

women s leadership symposium: *Feminism, Republicanism, Egalitarianism, Environmentalism* Yulia Maleta, 2019-08-23 This book addresses hegemonic ruling class masculinity and emphasized femininity within renewables organisational governance, and critiques Anglo-Celtic male privilege, as a barrier to women's leadership participation. Primarily using the Australian socio-political context, the author considers the patriarchal control of organisations and renewables governance, and argues that women-led emphasized femininity-resistance strategies can challenge the hegemonic status of ruling elites to create a leadership that is less power oriented, more collaborative and open to change. Utilising detailed interviews with Australian women environmentalists, together with feminist, sociological and social movement theory, whilst considering the historic context of Red Vienna and contemporary political challenges (Brexit, Monarchism etc.), it puts forward an innovative policy framework for an Australian Bill of Rights Act and republican constitutional change. Written for academics, activists and policymakers alike, this book offers a unique insight into women's inequity within patriarchal institutionalist governance. It will be engaging and inspiring reading for feminist and environmentalist activists and practitioners, in addition to professional associations focussing on gender, justice and environmental change. Academics and postgraduates in Gender Studies, Ecofeminism, Sociology and Organisational Studies will also find the book of key interest in its interdisciplinary discussions of Sustainable

Scientific-Technological Development Initiatives (SSTDI) and feminism in an Australian political context.

women s leadership symposium: *Girl at Sea* Joanna Sprtel Walters, 2015-09-22 A Naval officer's memoir about finding one's voice. Women have bravely served in the U.S. Navy for nearly a century, but they have only been allowed to serve in combat roles for the last twenty-five years. When the combat exclusion law was lifted in 1993, women in the Navy soon had a new range of opportunities available to them. The repeal of the law finally gave women the chance to serve on combatant ships for the first time. Among the first women to step onto these warships as a new crewmember was Joanna Sprtel Walters. In her memoir *Girl at Sea*, she shares her story beginning with training at the US Naval Academy through her service in the fleet aboard combatant warships. As a member of the class of 1994, she was among the first group of women out of the Academy to have selected warfare specialties. This real-life account sheds light on a ground-breaking time in our country's history as gender barriers continue to be torn down within all divisions of our Armed Forces. Walters's story will resonate with anyone who has ever had to bump their head against a glass ceiling and then fight their way through it. Her story covers difficult topics such as a sexual assault and extortion case at the end of her time at the Academy; struggling to prove herself on a ship where men felt women were invading their spaces; earning the hard-fought respect of her first division; recovering from the career suicide of engaging in a forbidden relationship; fighting to stay in the Navy and then thriving in the most difficult of environments; and her eventual blossoming into a strong Division Officer with an MBA under her belt. Through her successes and failures, Walter's hopes to inspire others to reach beyond what they thought they were capable of and find their own inner strength. Skyhorse Publishing, along with our Arcade, Good Books, Sports Publishing, and Yucca imprints, is proud to publish a broad range of biographies, autobiographies, and memoirs. Our list includes biographies on well-known historical figures like Benjamin Franklin, Nelson Mandela, and Alexander Graham Bell, as well as villains from history, such as Heinrich Himmler, John Wayne Gacy, and O. J. Simpson. We have also published survivor stories of World War II, memoirs about overcoming adversity, first-hand tales of adventure, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

women s leadership symposium: *Leadership in War and Peace* Joan Johnson-Freese, 2025-03-31 This book offers a gendered perspective on leadership in war and peace, considering leadership in its complexity and presenting a practical examination of both leadership successes and failures. The work challenges readers to think through and discuss specific aspects of leadership, including how and why leadership diversity matters and the ethical challenges presented by the revolving door of the military-industrial complex. Further, leaders responsible for decisions involving war and peace must be able to understand, appreciate, and communicate effectively with everyone they work with and have a repertoire of leadership styles to use depending on context. The book represents an excellent tool for developing such skills, as it uniquely considers leadership through both male and female lenses, along with the experiences and perspectives of multiple military, government, and industry leaders interviewed by the author, making it both relatable and informative. This book will be of much interest to students of gender studies, leadership studies, defense studies, and military studies in general, as well as military and security practitioners.

women s leadership symposium: The Routledge Companion to Indian Ethics
Purushottama Bilimoria, Amy Rayner, 2024-01-22 This companion volume focuses on the application and practical ramifications of Indian ethics. Here Indian dharma ethics is moved from its preeminent religious origins and classical metaethical proclivity to, what Kant would call, practical reason – or in Aristotle’s poignant terms, ēhikos and phronēis –and in more modern parlance normative ethics. Our study examines a wide range of social and normative challenges facing people in such diverse areas as women’s rights, infant ethics, politics, law, justice, bioethics and ecology. As a contemporary volume, it builds linkages between existing theories and emerging moral issues, problems and questions in today’s India in the global arena. The volume brings together contributions from some 40 philosophers and contemporary thinkers on practical ethics, exploring both the scope and boundaries or limits of ethics as applied to everyday and real-life concerns and socio-economic challenges facing India in the context of a troubled globalizing world. As such, this collection draws on multiple forms of writing and research, including narrative ethics, interviews, critical case studies and textual analyses. The book will be of interest to scholars, researchers and students of Indian philosophy, Indian ethics, women and infant issues, social justice, environmental ethics, bioethics, animal ethics and cross-cultural responses to dominant Western moral thought. It will also be useful to researchers working on the intersection of Gandhi, sustainability, ecology, theology, feminism, comparative philosophy and dharma studies.

women s leadership symposium: Blue Helmet Edward H. Carpenter, 2025-03 Blue Helmet: My Year as a UN Peacekeeper in South Sudan tells the story of a country, a conflict, and the institution of peacekeeping through the eyes of a senior American military officer working on the ground in one of the most dangerous countries on the planet. South Sudan is rich in natural resources, and its fertile soil could make it the breadbasket of East Africa. Yet it remains the poorest and most corrupt country in the region, plagued by disease, famine, and ethnic strife. Abductions, sexual violence, death, and displacement affect tens of thousands of people each year. Edward H. Carpenter pulls readers into his world, allowing them to experience the powerful, poignant realities of being a peacekeeper in South Sudan. In the process, the author reveals how the United Nations really conducts its missions: what it tolerates and how it often falls short of achieving the aims of its charter--equal rights, justice, and economic advancement for all people--with the use of armed forces limited to serving those common interests by keeping the peace and preventing the scourge of war. It is a story that is eye-opening, unsettling, and always compelling. Global leaders may fairly claim that they have done everything they can to help South Sudan help itself: they've dispatched thousands of peacekeepers and provided billions of dollars in aid. So why is the UN still struggling to fulfill its mandate to protect civilians and safeguard the delivery of humanitarian assistance? What could be done better? Bringing the reader to the forefront of action, Blue Helmet answers these questions and raises others about how modern peacekeeping missions are organized and overseen, shedding light on some of the contradictions at the heart of peacekeeping.
