women in leadership conference 2023: Proceedings of the 2023 3rd International Conference on Business Administration and Data Science (BADS 2023) Bijay Kumar Kandel, Anuranjan Misra, Junfeng Liao, Changiz Valmohammadi, 2023-12-26 This is an open access book. In the current situation of rapid economic development, the competition in the market is increasingly fierce. The drawbacks of traditional enterprise management and the backward management concept have seriously hindered the normal development of enterprises. In order to improve their competitive advantages and market share, enterprises must optimize their management methods and build a modern business administration system. In this situation, enterprises can only promote their development process by improving their business management mode and formulating scientific business management policies. Data science is one of the most important tools for optimizing business administration. Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to extract value from data. Data scientists use a combination of skills (including statistics, computer science and business knowledge) to analyze data collected from the Web, smartphones, customers, sensors and other sources. Data is the cornerstone of innovation, and data scientists gather information from data, discovering hidden trends from raw data and generating insights that companies can use to transform business problems into research projects that can then be translated back into practical solutions. Based on this, BADS 2023 discusses the state of modern business administration and the corresponding improvement measures in the context of the current reality, and It also provides a platform for scholars in related fields to exchange and share information, discuss how the two affect each other, and promote the modernization of business administration by studying certain business administration issues. To open new perspectives, broaden horizons, and examine the issues being discussed by the participants. Create an international-level forum for sharing, research and exchange that will expose participants to the latest research directions, results and content in different fields, thus inspiring them to come up with new research ideas.

women in leadership conference 2023: Queering Reproductive Justice Candace Bond-Theriault, 2024-08-06 The futures of reproductive justice and LGBTQIA+ liberation are intimately connected. Both movements were born out of the desire to love and build families of our choosing—when and how we decide. Both movements are rooted in broader social justice liberationist traditions that center the needs of Black and brown communities, the LGBTQIA+ community, gender-nonconforming folks, femmes, poor folks, parents, and all those who have been forced to the margins of society. Taking as its starting point the idea that we all have the human right to bodily autonomy, to sexual health and pleasure, and to exercise these rights with dignity, Queering Reproductive Justice sets out to re-envision the seemingly disparate strands of the reproductive justice and LGBTQIA+ movements and offer an invitation to reimagine these movements as one integrated vision of freedom for the future. Candace Bond-Theriault asserts that for reproductive justice to be truly successful, we must acknowledge that members of the LGBTQIA+ community often face distinct, specific, and interlocking oppressions when it comes to these rights. Family formation, contraception needs, and appropriate support from healthcare services are still poorly understood aspects of the LGBTQIA+ experience, which often challenge mainstream notions of the nuclear family, and the primacy of blood-relatives. Blending advocacy with a legal, rights-based framework, Queering Reproductive Justice offers a unified path for attaining reproductive justice for LGBTQIA+ people. Drawing on U.S. law and legislative history, healthcare policy, human rights, and interviews with academics and activists, Bond-Theriault presents incisive new recommendations for queer reproductive justice theory, organizing, and advocacy. This book offers readers an invitation to join the conversation, and ultimately to join the movement to that is unapologetically queering reproductive justice.
