women in leadership institute: Theorizing Women & Leadership Julia Storberg-Walker, Paige Haber-Curran, 2017-01-01 *Theorizing Women and Leadership: New Insights and Contributions from Multiple Perspectives* is the fifth volume in the *Women and Leadership: Research, Theory, and Practice* series. This cross-disciplinary series, from the International Leadership Association, enhances leadership knowledge and improves leadership development of women around the world. The purpose of this volume is to provide a forum for women to theorize about women's leadership in multiple ways and in multiple contexts. Theorizing has been viewed as a gendered activity (Swedberg, 2014), and this series of chapters seeks to upend that imbalance. The chapters are written by women who represent multiple disciplines, cultures, races, and subject positions. The diversity extends into research paradigm and method, and the chapters combine to illuminate the multiple ways of knowing about and being a woman leader. Twenty-first century leadership scholars acknowledge the importance of context, and many are considering post-heroic leadership models based on relationships rather than traits. This volume contributes to this discussion by offering a diverse array of perspectives and ways of knowing about leadership and leading. The purpose of the volume is to provide readers with not only interesting new ideas about women and leadership, but also to highlight the diverse epistemologies that can contribute to theorizing about women leaders. Some chapters represent typical social scientific practices and processes, while others represent newer knowledge forms and ways of knowing. The volume contributors adopt various epistemological positions, ranging from objective researcher to embedded co-participant. The chapters link their new findings to existing empirical or conceptual work and illustrate how the findings extend, amend, contradict, or confirm existing research. The diversity of the chapters is one of the volume's strengths because it illuminates the multiple ways that leadership theory for women can be advanced. Typically, research based on a realist perspective is more valued in the academy. This perspective has indeed generated robust information about leadership in general and women's leadership in particular. However, readers of this volume are offered an opportunity to explore multiple ways of knowing, different ways of researching, and are invited to de-center researcher objectivity. The authors of the chapters offer conceptual and empirical findings, illuminate multiple and alternative research practices, and in the end suggest future directions for quantitative, qualitative, and mixed-methods research.

women in leadership institute: *Women in Academic Leadership* Susan J. Bracken, Jeanie K. Allen, Diane R. Dean, 2023-07-03 Colleges and universities benefit from diversity in their leadership roles and profess to value diversity--of thought, of experience, of person. Yet why do women remain under-represented in top academic leadership positions and in key positions along the academic career ladder? Why don't they advance at a rate proportional to that of their male peers? How do internal and external environmental contexts still influence who enters academic leadership and who survives and thrives in those roles? *Women in Academic Leadership* complements its companion volumes in the *Women in Academe* series, provoking readers to think critically about the gendered nature of academic leadership across the spectrum of institutional types. It argues that leadership, the academy, and the nexus of academic leadership, remain gendered structures steeped in male-oriented norms and mores. Blending research and reflection, it explores the barriers and dilemmas that these structures present and the professional strategies and the personal choices women make in order to successfully surmount them. The authors pose questions about how women leaders negotiate between their public and private selves. They consider how women develop a vital sense of self-efficacy along with the essential skills and knowledge they need in order to lead effectively; how they cultivate opportunity; and how they gain legitimacy and maintain authenticity in a male-gendered arena. For those who seek to create an institutional environment conducive to equity and opportunity, this book offers insight into the pervasive barriers facing women of all colors and evidence of the need for a more complex, multi-dimensional view of leadership. For women in academe who seek to reach their professional potential and maintain authenticity, it offers encouragement and a myriad of strategies for their growth and development.

Madsen, 2014-09-01 *Women and Leadership in Higher Education* is the first volume in a new series of books (*Women and Leadership: Research, Theory, and Practice*) that will be published in upcoming years to inform leadership scholars and practitioners. This book links theory, research, and practice of women's leadership in various higher education contexts and offers suggestions for future leadership development strategies. This volume focuses on the field of higher education, particularly within the context of the United States—a sector that serves a majority of students at all degree levels who are women, yet lacks parity by women in senior leadership roles. The book's fifteen chapters present both hard facts regarding the current demographic realities within higher education and fresh thinking about how progress can and must be made in order for U.S. higher education to benefit from the perspectives of women at the senior leadership table. The book's opening section provides data and analysis in addressing "The State of Women and Leadership in Higher Education"; the second section offers descriptions of three effective models for women's leadership development at the national and institutional levels; the third section draws from recent research to present "Women's Experiences and Contributions in Higher Education Leadership." women in leadership institute: Understanding Women's Avoidance of Leadership in Higher Education Schnackenberg, Heidi L., 2025-06-27 Despite increasing numbers in higher education, women remain underrepresented in leadership positions within academic institutions. This disparity raises important questions about the factors influencing women's decisions to avoid or withdraw from leadership positions. Understanding women's avoidance of leadership roles in higher education requires an exploration of systemic barriers, cultural expectations, institutional climates, and personal experiences that shape career choices. Examining these dynamics may provide further insights into the structural and social mechanisms that discourage women from pursuing leadership and identify strategies to foster more inclusive and equitable academic environments. *Understanding Women's Avoidance of Leadership in Higher Education* explores the phenomena of women's leadership avoidance within higher education organizations. It examines the inequities in higher education work environments and suggests solutions for the encouragement and advancement of women in leadership positions. This book covers topics such as gender and diversity, teacher training, and workplace culture, and is a useful resource for educators, sociologists, academicians, researchers, and scientists.

women in leadership institute: *Why Congress Needs Women* Michele A. Paludi, 2016-01-18 This book addresses women's civil strategies for negotiation and leadership through careful analysis of social science research and management theory as well as interviews with women legislators, documenting how women in Washington are affecting the development of the world at all levels. In October 2013, after the war between Republican and Democratic men in Congress resulted in a government shutdown, Time magazine referred to the women legislators as the only adults left in Washington. In *Why Congress Needs Women: Bringing Sanity to the House and Senate*, editor Michele A. Paludi and various contributors explain how women in Washington have redefined leadership and power by embracing a transformational leadership style: a style that incorporates empowerment, ethics, nurturance, inclusiveness, and social justice, transcending their own self-interests for the good of the group—or, in the case of the shut-down, for the good of the nation. A resource that will prove invaluable for anyone interested in politics and leadership as well as students taking courses in politics, women's studies, gender studies, or management, the chapters provide an in-depth review of the ways women in Washington are striving to find lasting solutions to our nation's challenges. The contributors document the mindset and methodologies women legislators are using to achieve their legislative goals and work toward creating gender-equitable environments in Washington's well-established climate where bullying, harassment, and sexual exploitation is perceived as normative. Insights from interviews with women senators and congress members enhance the scholarship discussed in this book.
